Existing Affected Tariff Pages

5.0 NETWORK SERVICES DESCRIPTIONS

5.1 Service Offerings

The following Network Services for residence/business customers and for carriers certificated by the Public Utilities Commission of Ohio are offered in this tariff:

(D)

Standard Business Line
Single and Multiple Analog PBX Trunk
Digital Voice Grade DS-1 Trunk Service
Directory Assistance
Operator Service
Local Calling Service
Message Telecommunications Service
Custom Calling Features
Trunk Side Features
Non Published Service
900/976 Blocking/Unblocking
Maintenance Visit Charges
Directory Listings
Calling Card Services
Emergency Services Calling
Integrated Services Digital Network (ISDN) Primary Rate Interface (PRI)
Direct Inward Dial (DID)
Internet Service Provider (ISP)
Standard Business Line Plus
Digital Access Service (DAS)
Business Line Connect
Dedicated Long Distance Services

All services offered in this tariff are subject to order processing charges where the Customer requests new services or changes in existing services, as well as indicated Non-Recurring and Monthly Recurring Charges. Charges for Local Calling Service and Measured Telecommunications Service are assessed on a measured rate basis and are additional to the charges shown for Standard Residence/Business Line, Basic PBX Trunk and Digital Voice Grade DS-1 Trunk Service, as are other service charges.

5.0 NETWORK SERVICES DESCRIPTIONS - RETAIL PRICE LIST (cont'd)

5.2 Standard Residence Line

The Standard Residence Line provides a Customer with a single, analog, voice-grade telephonic communications channel which can be used to place or receive one call at a time. Standard Residence Lines are provided for the connection of Customer-provided wiring and single station sets or facsimile machines. *(See Section 6.2 for Price Ranges, See Section 10.1 for Price List Rate).*

5.3 Standard Business Line

The Standard Business Line provides a Customer with a single, analog, voice-grade telephonic communications channel which can be used to place or receive one call at a time. Standard Business Lines are provided for the connection of Customer-provided wiring and single station sets or facsimile machines. *(See Section 6.3 for Price Ranges See Section 10.2 for Price List Rate).*

5.4 Single and Multiple Analog PBX Trunk

Basic PBX Trunk Service provides a Customer with a single, voice-grade telephonic communications channel which can be used to place or receive one call at a time. Basic Trunks are provided for connection of Customer-provided private branch exchanges (PBX) to the public switched telecommunications network. Each Basic PBX Trunk is provided with touch tone signaling and may be configured into a hunt group with other Company-provided Basic PBX Trunks. The signal is an analog signal at the DSO level.

Basic Trunks may be equipped with Direct Inward Dialing (DID) capability and DID number blocks for additional charges. *(See Section 6.4 for Price Ranges, See Section 10.3 for Price List Rate).*

5.0 NETWORK SERVICES DESCRIPTIONS - RETAIL PRICE LIST (cont'd)

5.5 Digital Voice Grade DS-1 Trunk Service

Digital Voice Grade DS-1 Trunk Service provides business Customers with PBX or PBX-like equipment or other telephonic equipment with access to switch port. Customers can purchase this capability for both primary service (listed directory number) and diversity purposes. Customers must have the ability to terminate DS1 signal. The signal is delivered as a digital signal at the DS1 level.

The connection to the Customer's equipment is accomplished using a DS1 for digital connectivity.

Customers can subscribe to PBX Trunk Service - Digital/DS1 for local telecommunications services. Customers can also use this service for intraLATA and interLATA toll calling capability and for access to long distance carriers.

DID trunk signaling enables a PBX to switch an incoming call directly to the intended extension number without the need for an attendant. Digital Voice Grade DS-1 Trunk Service includes access to 911 service. *(See Section 6.6 for Price Ranges, See Section 10.5 for Price List Rates).*

5.6 Directory Assistance

Provides for identification of telephone directory numbers, via an operator or automated platform. Customers are provided with a maximum of 2 listings per each call to Directory Assistance. *(See Section 6.7 Price Ranges, See Section 10.6 for Price List Rates).*

5.7 Operator Service

[RESERVED FOR FUTURE]

Issued: May 24, 1998

5.0 NETWORK SERVICES DESCRIPTIONS - RETAIL PRICE LIST (cont'd)

5.8 Local Calling Service

Flat Service - A flat rate is in effect from originating NXX to terminating NXX.

Measured Service - Calls are billed in one (1) minute increments with an initial billing period of one (1) minute. Fractional minutes are rounded to the next full minute. *(See Sections 6.2, 6.3, 6.4, and 6.6 for Price Ranges, See Sections 10.1, 10.2, 10.3, and 10.5 for Price List Rates)*

5.9 Message Telecommunications Service

Message Telecommunications Service (MTS) is a communications service which is available for use by Customers twenty-four (24) hours a day. MTS enables a User of an exchange access line to place/receive calls to/from any station on the public switched telecommunications network bearing an NPA-NXX designation associated with points outside the Customer's Local Calling Area, but within the boundaries of the State of Ohio.

5.9.1 Switched Outbound Service

ICG Switched Outbound Service provides the customer with 1+ direct dial dialing. Except as otherwise provided below, ICG offers Switched Outbound Service to the following customer types:

I. Commercial Customers

A. On-Switch

B. Resale

C. Stand-alone - MTS Service offered to customers of ICG that do not have local Service with ICG.

II. Internet Enrollment Customers - MTS Service offered customers enrolled via the Internet.

(D)
(D)
(C)

5.9.1.1 IntraLATA Switched Outbound Service

IntraLATA Switched Outbound Service enables a User of an exchange access line to place calls to any station on the public switched telecommunications network bearing an NPA-NXX designation associated with points outside the Customer's Local Area, but within the LATA. *(See Section 6.9.1.1 for current pricing)*

5.9.1.2 InterLATA/Intrastate Switched Outbound Service

InterLATA/Intrastate Switched Outbound Service enables a User of an exchange access line to place calls to any station on the public switched telecommunications network bearing an NPA-NXX designation associated with points outside the Customer's Local Area, within the state, but outside the LATA. InterLATA/Intrastate Switched Outbound Service is an add-on to Interstate Switched Outbound Service. *(See section 6.9.1.2 for current pricing)*

Issued: June 18, 2001

Effective: July 18, 2001

5.0 NETWORK SERVICES DESCRIPTIONS - RETAIL PRICE LIST (cont'd)

5.9 Message Telecommunications Service (cont'd)

5.9.2 Switched Inbound Service (ICG Toll Free)

ICG Toll Free Service is an Inbound service which permits calls to a customer's station in one location from stations located elsewhere and in which the ICG Toll Free customer is billed for the calls rather than the call originator's. ICG offers Toll Free Service to the following customer types:

- I. Commercial
- II. Internet Enrollment

(D)
(T)

5.9.2.1 IntraLATA Switched Inbound Service

IntraLATA Switched Inbound Service enables a User of an exchange access line to receive calls from any station on the public switched telecommunications network bearing an NPA-NXX designation associated with points within the LATA. IntraLATA Switched Inbound Service is an add-on to Interstate Switched Inbound Service. *(See section 6.9.2.1 for current pricing)*

5.9.2.2 InterLATA/Intrastate Switched Inbound Service

InterLATA/Intrastate Switched Inbound Service enables a User of an exchange access line to receive calls from any station on the public switched telecommunications network bearing an NPA-NXX designation associated with points outside the Customer's Local Area, within the state, but outside the LATA. InterLATA/Intrastate Switched Inbound Service is an add-on to Interstate Switched Inbound Service. *(See section 6.9.2.2 for current pricing)*

5.9.2.3 Per-Call Payphone Service Charge

Customer shall pay ICG a per-call service charge for all originating payphone traffic on ICG Toll Free Service. *(See section 6.9.2.2 for current pricing)*

5.10 Custom Calling Features

Call Waiting: permits the end-user engaged in a call to receive a tone signal indicating a second call is waiting; and, by operation of the switch hook, to place the first call on hold and answer the waiting call. The customer may alternate between the two calls by operation of the switch hook, but a three-way conference call cannot be established. *(See Section 6.10 for Price Ranges, See Section 10.9 for Price List Rates).*

Issued: June 18, 2001

Effective: July 18, 2001

Director, Regulatory and Government Affairs
161 Inverness Drive West
Englewood, Colorado 80112

5.0 NETWORK SERVICES DESCRIPTIONS - RETAIL PRICE LIST (cont'd)

5.10 Custom Calling Features (cont'd)

Three Way Calling: permits the end-user to add a third party to an established connection. When the third party answers, a two-way conversation can be held before adding the original party for a three-way conference. The end-user initiating the conference controls the call and may disconnect the third party to reestablish the original connection or establish a connection to a different third party. The feature may be used on both outgoing and incoming. . *(See Section 6.10 for Price Ranges, See Section 10.9 for Price List Rates).*

Call Forwarding: permits the end-user to automatically forward (transfer) all incoming calls to another telephone number, and to restore it to normal operation at their discretion. . *(See Section 6.10 for Price Ranges, See Section 10.9 for Price List Rates).*

Call Forwarding Busy: permits the forwarding of incoming calls when the end-user's line is busy. The forwarded number is fixed by the end-user service order. *(See Section 6.10 for Price Ranges, See Section 10.9 for Price List Rates).*

Call Forwarding No Answer: permits the forwarding of incoming calls when the end-user's line remains unanswered after end-user-designated number of rings. The number of rings and the forwarded number are fixed by the customer service order. *(See Section 6.10 for Price Ranges, See Section 10.9 for Price List Rates).*

Speed Calling (8 or 30): permits the customer to place calls to other telephone numbers by dialing a one or two digit code rather than the complete telephone number. The feature is available as an eight code list or a thirty code list. Either code list may include local and/or toll telephone numbers. To establish or change a telephone number in a code list, the customer dials an activating code, receives a second dial tone and dials either a one or two digit code (for the eight code and thirty code lists, respectively) plus the telephone number. *(See Section 6.10 for Price Ranges, See Section 10.9 for Price List Rates).*

Vanity Number Service: Vanity Number Service is an optional feature by which a new Customer may request a specific or unique telephone number and fax number for use with the Company provided Exchange Services. This service provides for the assignment of a customer requested telephone number other than the next available number from the assignment control list.

Issued: May 24, 1998

161 Inverness Drive West
Englewood, Colorado 80112

5.0 NETWORK SERVICES DESCRIPTIONS - RETAIL PRICE LIST (cont'd)

5.10 Custom Calling Features (cont'd)

Vanity Number Service (cont'd)

Vanity Number Service is furnished subject to the availability of facilities and the requirements of Exchange Service as defined by the Company. The Company reserves all rights to the Vanity Numbers assigned to customer's and may, therefore, change them if required.

Monthly recurring charges apply per Vanity number. *(See Section 6.10 for Price Ranges, See Section 10.9 for Price List Rates)*

(M)

|
(M)

Caller ID (w/o name): Caller ID allows a Customer to identify the telephone number from which a call is being made. The telephone number of the person initiating the call is displayed on a customer-provided display device unless the caller utilizes per call blocking or subscribes to per line blocking.

Caller ID (with name): Displays the name and telephone number of an incoming call. Information is displayed on a specialized CPE not provided by the Company.

Multi-Ring: Multi-Ring Service will be provided only in Telephone Company central offices where facilities permit.

Multi-Ring Service will enable a Customer to have as many as two telephone numbers associated with a single exchange service. Customers subscribing to this service will be able to receive calls dialed to two separate telephone numbers without having a second exchange service. A distinctive ringing pattern will be provided for each of the additional telephone numbers to facilitate identification of incoming calls.

5.0 NETWORK SERVICES DESCRIPTIONS - RETAIL PRICE LIST (cont'd)

5.10 Custom Calling Features (cont'd)

911 Location Manager - 911 Location Manager (9LM) is an additional capability of E911 emergency response systems that provides end-users using a private telephone switch, such as a PBX or Centrex, with the Automatic Line Identification (ALI) feature(s) for individual telephone stations served by the private switch. This additional capability allows the private switch to identify individual subscriber address and location information to the Public Safety Answering Point (PSAP) operator. The customer maintains and updates their own ALI database information via the use of the third party vendor's website.

The 9LM feature capability consists of ALI database updates (i.e., the ability of the PBX end-user to update the ALI database) and the transport of 9LM calls to an E911 SR – Selective Router.

Customers must order the database functionality from third party vendor. Any customer premise equipment required to support this service must be provided by the customer. This feature is only available in conjunction with Fully Configured Digital Trunks and Digital Access Plan B service.

5.0 NETWORK SERVICES DESCRIPTIONS - RETAIL PRICE LIST (cont'd)

5.10 Custom Calling Features (cont'd)

Per Call Blocking: Enable Customers to prevent the disclosure of their telephone number on per call basis to the called party. The disclosure of the calling party's number can be prevented on a per call basis by dialing a preassigned access code before making a call. This action must be repeated each time a call is made to prevent the disclosure of the calling party's telephone number. If the called party has a display device, a privacy indication will appear instead of the calling party's telephone number. Per Call Blocking will be provided on a universal basis to all eligible Customers.

Per Line Blocking: Enables Customers to prevent the disclosure of their telephone number on all outgoing calls, without the necessity of an activation code. If the called party has a display device, a privacy indication will appear instead of the calling party's telephone number. Per Line Blocking will be provided at no monthly charge on an optional basis to non-published Customers. The service is also available for subscription to published customers at a monthly charge of \$1.50 for Business Customers. Law Enforcement, Domestic Shelters and other special agencies will be offered free Per Line Blocking. Per Line Blocking will not be available to public, semi-public, and two-party service Customers. (C)

Retained Number (DNCF) with 4 Paths: DNCF- Directory Number Call forwarding allows a customer to retain their current number. It will call forward to new telephone numbers issued by ICG. DNCF includes the capability to accept 4 call paths (concurrent calls) per retained number.

5.11 Trunk Side Features

Hunting: Routes a call to an idle station line in a prearranged group when the called station line is busy. . (See Section 6.10 for Price Ranges, See Section 10.9 for Price List Rates)

5.0 NETWORK SERVICES DESCRIPTIONS (cont'd)

5.12 Non Published Service

This service provides for suppression of printed and recorded directory listings. *(See Section 6.13 for Price Ranges, See Section 10.12 for Price List Rates).*

5.13 900/976 Blocking/Unblocking

This service provides the option of blocking, or subsequent unblocking, all 900 and 976 calls on a per call and per line basis. The Company will provide for per-line blocking where the Company's switching facilities permit. *(See Section 6.11 for Price Ranges, See Section 10.10 for Price List Rates).*

5.14 Miscellaneous

(T)

5.14.1 Maintenance Visit Charges

(T)

Maintenance Visit Charges apply when the Company dispatches personnel to a Customer's premises to perform work necessary for resolving troubles reported by the Customer and the trouble is found to be caused by the Customer's facilities.

Maintenance Visit Charges will be credited to the Customer's account in the event trouble is not found in the Company facilities, but the trouble is later determined to be in those facilities.

The time period for which the Maintenance Visit Charges is applied will commence when Company personnel are dispatched at the Customer premises and end when work is completed. The rates for Maintenance of Service vary by time per Customer request. *(See Section 6.12 for Price Ranges, See Section 10.11 for Price List Rates).*

5.14.2 Order Processing Charge

(M)

Non-recurring charges apply to processing service orders for new service, for changes in service, and for changes in the Customer's PIC code. *(See Section 6.12.2 for Price Ranges, See Section 10.11.2 for Price List Rates)*

(M)

5.15 Directory Listings

For each Customer of Company-provided Exchange Service(s), the Company shall arrange for the listing of the Customer's main billing telephone number in the directory(ies) published by the dominant Local Exchange Carrier in the area at no additional charge. At a Customer's option, the Company will arrange for additional Business listings for an additional charge. *(See Section 6.13 for Price Ranges, See Section 10.12 for Price List Rates).*

5.0 NETWORK SERVICES DESCRIPTIONS (cont'd)

5.16 Calling Card Services

The Company's Calling Card Services are offered to Customers of its local exchange (dial tone) services, such as Standard Business Line and Digital Voice Grade DS-1 Trunk Service. The Company's Calling Card Services are accessed by dialing a toll-free number and entering the Calling Card Number (are code, phone number, and PIN). *(See Section 6.14 for Price Ranges, See Section 10.13 for Price List Rates).*

(C)

5.17 Emergency Services Calling Plan

Access (at no additional charge by the Company) to emergency services by dialing 0 - or 9-1-1.

5.18 Integrated Services Digital Network (ISDN) Primary Rate Interface (PRI)

Integrated Services Digital Network (ISDN) is a set of transmission protocols that provides end-to-end digital connectivity and integration of voice, data and video, on a single Customer loop to support a wide variety of services via the public switched network. The Primary Rate Interface (PRI) consists of a 23B+D configuration with 23 64Kbps Bearer (B) digital channels and 1 64Kbps Data (D) digital channel. The B channels are designed for voice, data, image and sound transmissions. B channels can support synchronous, asynchronous or isochronous services at rates up to 64Kbps. B channels can be aggregated for higher bandwidth applications. The D channel PRI provides the out of band signaling, call control and messaging.

PRI is provided through standard four wire DS-1 (1.544Mbps) point to point, private line facilities that enables Customer control of the 24 individual channels. PRI supports 1+, 0+, 7 digit, and 10 digit IntraLATA and InterLATA services, as well as 01+ and 011+ international calling. PRI allows Customers to direct InterLATA voice, data and video over the Public Switched Telephone Network to the pre-subscribed IXC carrier of their choice, as well as 10XXX casual dialing. PRI also allows access to Public Switched Network services, such as Two-Way, Incoming Only, Outgoing Only and DID.\

Issued: June 18, 2001

5.0 NETWORK SERVICES DESCRIPTIONS - RETAIL PRICE LIST (cont'd)

5.18 Integrated Services Digital Network (ISDN) Primary Rate Interface (PRI) (cont'd)

Multiple PRI interfaces can be combined to function as one group. Utilizing a Backup D Channel arrangement, Customers are able to link up to 20 DS-1s together, providing a maximum of 479 64Kbps B channels controlled by a single D (signaling) channel.

In order to accommodate unusual network traffic loads created by the use of this service, the Company will not offer any new or additional PRI service, under the rates, terms, and conditions in effect prior to the effective date of October 1, 1998, to any Customer after the effective date of October 1, 1998. To further insure proper network capacity and assist Customers that desire additional capacity, the Company will waive the application of non-recurring charges for Customers that, as of the filing hereof, are already customers of the Company's PRI service and elect to migrate to the Company's Digital Access Service.

(See Section 6.6.3 for Price Ranges, See Section 10.5 for Price List Rates).

5.19 Direct Inward Dial (or "DID"): A service attribute that routes incoming calls directly to stations, by-passing a central answering point. *(See Section 6.5 for Price Ranges, See Section 10.4 for Price List Rates).*

5.20 Internet Service Provider (ISP): A service that the Company offers to Customers wanting to access the Internet.

5.21 Standard Business Line Plus: Standard Business Line Plus is a local exchange service provided by ICG using Lucent Technologies 5ESS switches. It is classified as a central office switched service similar to a standard business line with the same identical calling patterns. The advantage to Standard Business Line Plus over a standard business line is the enhanced features it provides. Standard Business Line Plus offers the following features at no extra charge:

- DID to DOD Call Transfer
- Three Way Calling
- Touch Tone
- Hunting
- Consultation Hold

For an additional monthly charge Customers can order these additional features:

- Call Forward Variable
- Call Forward Don't Answer
- Call Forward Busy
- Message Waiting (sutter dial tone)

Standard Business Line Plus can be used with PBXs, Hybrids and Key Systems. It is an ideal product for new businesses and small to medium sized businesses.

(See Section 6.3.3 for Price Ranges, See Section 10.2.3 for Price List Rates).

5.0 NETWORK SERVICES DESCRIPTIONS - RETAIL PRICE LIST (cont'd)

5.22 Digital Access Service

Digital Access Service (DAS) provides Customers with inbound and outbound digital access and transport capability to and from the public switched telephone network or other telecommunications facilities via a DS-1 signal. This Service is available under two distinct pricing plans, Plan A or Plan B, with the appropriate plan determined by the Company based on the Customer's usage profile as described herein.

This service is only available to Customers located in buildings that are served by ICG's network or in hybrid digital access buildings. This service is only available within calling areas served by ICG available NXXs. ICG reserves the right to reconfigure the network as necessary, which could include moving rate centers from one switch serving area to another, which may affect Customer charges.

Rates and charges for this service are exclusive of all other rates and charges for Company services. End users may incur local usage, toll or other charges in accordance with services they have purchased from the Company or their local exchange service provider.

This service is only available where facilities and operating conditions permit.

5.22.1 Plan A -- Inbound Services

This Service is for Customers whose traffic would otherwise pose a risk of call blocking on the Company's network due to unusually long call holding times and/or unusual traffic patterns. Where the Customer's usage of any Service offered by the Company is likely to be 80% or more inbound traffic and/or has an average per call holding time in excess of 30 minutes, the Customer's usage will be deemed within a potential blocking profile. The Company reserves the right to require any Customer who seeks to establish any new Service with the Company after the effective date of October 1, 1998 and whose traffic is forecast to be within this profile to purchase this Service if, in the judgement of the Company, the Customer's usage poses a significant risk of interfering with Service to other Customers of the Company by creating call blocking conditions.

5.0 NETWORK SERVICES DESCRIPTIONS (cont'd)

5.20 Digital Access Service (cont'd)

5.20.1 Plan A — Inbound Services (cont'd)

Plan A service arrangements are designed for data applications, which terminate into Customer Premises Equipment (CPE).

This Service does not provide for E-911 or Operator Services connectivity and the Customer must separately arrange for Local Exchange Service from the Company or another certificated local exchange service provider to obtain such connectivity.

5.20.2 Plan B

(T)

5.20.2.1 Plan B — Inbound, Outbound, Two-way Services

(T)

This Service is for Customers whose traffic patterns are other than those described in 5.20.1. Plan B can be arranged as inward-only, including Direct Inward Dialing service, outward-only, or Two-way, and may include voice or data applications.

5.20.2.2 Plan B — High Volume

(N)

This service is for customers anticipating high volume outward-only or two way traffic. A minimum of 20 Plan B High Volume PRI's is required per customer, the minimum term for this option is 1 year. A per minute average rate will apply should customers exceed allotted minutes of use. Customers must purchase a Digital Access Loop at the current tariffed rate. Caller ID and Hunting will be included, all other features may be added at the current tariffed rate. EOS is not available with this option.

(N)

5.20.3 Plan C — National Services

This service is for Plan A Customers whose aggregate volume meets or exceeds 200 PRI's in multi-state locations. The Customer must contract for a minimum two year term in order to receive the volume discounts.

A Rate Stability option is available for Plan A Customers whose aggregate volume meets or exceeds 250 PRI's. The customer must contract for a minimum three year term in order to be eligible for the Rate Stability plan.

5.0 NETWORK SERVICES DESCRIPTIONS (cont'd)

5.20 Digital Access Service (cont'd)

5.20.4 Plan D --- EOS/DS-3 Component

This pricing component provides a circuit equivalent to 28 DS-1's and operates at 44.736 mbps. This pricing component replaces the Digital Access Loop, EOS IntraLATA transport and/or EOS InterLATA transport provisioned at the DS-1 level and available in requested markets

5.20.4.1 Plan E – Regional Services

This service is for Plan A Customers whose aggregate volume falls into the following categories; 25-49 PRI, 50-99 PRI or 100+ PRI, in one or multi-state locations.

5.20.4.2 Plan F - Long-Term Collocated Service

To obtain this service a Plan A customer must have collocation in every ICG office and provide service in all ICG markets. The customer will be obligated for an minimum term of five years and must provide aggregated volumes from 200,000 to 500,000 PRI within multi state locations. This plan is only available for agreements signed prior to January 4, 2002.

5.20.4.3 Plan G- Long-Term, High Volume, Multi-state Service

To obtain this service a Plan A customer must maintain collocation in every ICG office, where feasible, and provide service in all ICG markets. The customer will be obligated for a minimum 66 month term and must provide aggregated volumes of at least 100,000 PRI.

If a Plan G customer chooses to terminate PRI circuits prior to the end of the term of the agreement, the following termination liability will apply :

During the first year of the agreement: 100% of the MRC for the canceled PRI circuits multiplied by the number of months remaining in the term.

During the second and third years: 85% of the MRC for the canceled PRI circuits multiplied by the number of months remaining in the term.

During the fourth and fifth years: 70% of the MRC for the canceled PRI circuits multiplied by the number of months remaining in the term.

5.0 NETWORK SERVICES DESCRIPTIONS - RETAIL PRICE LIST (cont'd)

5.24 Dedicated Long Distance Service

Dedicated Long Distance consists of circuits "dedicated" to long distance traffic connecting the customer's premises with ICG's dedicated long distance points of presence. Dedicated long distance will only be offered to customers within the ICG local services footprint, in both the Ameritech and Cincinnati Bell Serving areas. Dedicated long distance does not utilize a local exchange carrier's switch. Dedicated long distance provides only voice grade circuits.

Fractional cents will be rounded to the nearest cent. For example, if the customer's call is less than \$0.085, the charge is \$0.08. If the customer's call is equal to or higher than \$0.085, the charge is \$0.09.

5.24.1 Plan A

This plan includes Dedicated Inbound and Dedicated Outbound Services. Customers subscribing to this plan will receive a 40% discount on all IntraLATA/Intrastate and InterLATA/Intrastate calls. See Section 6.18 for price ranges, see section 10.17 for Price List Ranges.

5.24.2 Plan B

TBD

5.25 Business Essentials

Business Essentials provides the customer with a bundled solution for their local and long distance service. The Business Essentials bundle contains one Standard Business Line Plus line including the following features; hunting, 3 Way calling, call transfer, consultation hold, Caller ID, Call Waiting, and Call Forwarding Variable/Busy/ No Answer. Business Essentials also includes a discounted long distance rate for all long distance calls (IntraLATA/intrastate, InterLATA/intrastate, interstate, outbound and inbound calls), calling card and international calls are not included and are charged at the regular tariffed rates.

Business Essentials rates and services are only available with the bundled offering. Early termination penalties apply for cancellation of any component of the bundle prior to the end of the term of the agreement. Customers may upgrade their service at any time without penalty.

In Compliance with Rule 4901:1-5-16(B), O.A.C., the monthly rate for a Standard Business Line in the Ameritech serving area is \$19.90; the monthly rate for a Standard Business Line in the Cincinnati Bell Serving area is \$38.40.

6.0 NETWORK SERVICES - RETAIL PRICE LIST (cont'd)

6.6 Digital Voice Grade DS-1 Trunk Service *(see Section 10.5 of this tariff for Price List Rates).*

Digital Voice Grade DS-1 Trunk Service provides line connections from an end user's Private Branch Exchange ("PBX"), Key System, or other telephonic device to the Switch Port. Digital Voice Grade DS-1 Trunk Service is available as a DS1 (1.544 Mbps). Service on a Digital Trunk is available on a measured rate basis for business customers only. A minimum order of 12 voice grade connections (active DSO trunks) is required. Charges for Local Calling Service and Message Telecommunications Service are assessed on a measured rate basis and are additional to charges for Digital Voice Grade DS-1 Trunk Service. These charges only apply to ICG Customers. *(see Sections 6.4 and 6.9 for Price Ranges, see Sections 10.3 and 10.8 for Price Lists).*

The Customer may opt to utilize Digital Voice Grade DS-1 Trunk Service for outgoing calls only, or for outgoing and incoming calls. In the latter case, direct inward dial ("DID") numbers must be purchased from the Company.

6.6.1.1 Digital Voice Grade DS-1 Trunk Service (24 Channels).

The Company's Calling Card Services are offered to Customers of its local exchange (dial tone) services, such as Standard Business Line, and PBX Trunk Service. Calling Card calls are billed in six (6) second increments with a thirty (30) second call minimum. After the initial thirty (30) second minimum, each fractional call is rounded up to the nearest one-tenth of a minute. (C)

The Company's Calling Card Services are accessed by dialing a toll-free number and entering the Calling Card Number (area code, phone number, and PIN).

6.15 Bad Check Charges

<u>Minimum</u>	<u>Maximum</u>
\$21.25	\$26.25

*Material on this page was previously located on page 100.

6.0 NETWORK SERVICES - RETAIL PRICE LIST (cont'd)

6.16 Digital Access Service

(N)

6.16.1 Rate Element Descriptions -- Standard Features (Plans A and B)

- .1 DS1 Central Office Access Port.** The port is used to connect the Digital Access Loop to the ICG serving switch. Monthly recurring and non-recurring installation charges apply per DS-1 ordered. Three access port options are available.

Option 1 (23B +Primary D Channel): ICG provisions 23, 64Kbps Bearer (B) channels and one 64Kbps Delta (D) channel over a 1.544Mbps DS1 transport facility.

- All 23 64Kbps Bearer channels must originate in one ICG switch and physically terminate within the same rate center as the Customer's physical location.
- Available only within calling areas served by ICG NPA-NXXs.
- May be combined with Options 2 and 3 to form a larger DAS Serving Arrangement, up to a maximum of 478 64Kbps B channels or 20 DS-1 facilities. Each DAS Serving Arrangement requires the purchase of at least one Option 1.
- Provides one rate center per DAS Serving Arrangement within a single ICG switch local serving area.

Option 2 (24B): ICG provisions 24, 64Kbps Bearer channels over a 1.544Mbps DS1 transport facility. The 24 Bearer (B) channels in Option 2 are controlled by the Delta (D) channel from Option 1.

- The customer may order DAS arrangements that combine an Option 1 configuration with multiple Option 2 configurations to form a larger trunk group (up to a maximum of 478 64Kbps B channels). ICG requires a minimum purchase of one Option 1 configuration per DAS arrangement; therefore, ICG will not provision Option 2 as a stand alone product.

- All 24 64Kbps Bearer channels must originate in one ICG switch and physically terminate within the same rate center as the Customer's physical location.
- Provides one rate center per DAS Serving Arrangement within a single ICG switch local serving area.

Option 3 (23B + Backup D Channel): For redundancy purposes, the customer may purchase 23B and Backup Delta (D) channel which is provisioned over a separate T-1 facility from the 23B + Primary D Channel. Option 3 combines multiple digital access loops on a loop interface to function as one group.

- A minimum purchase of Option 1 is required per DAS Serving Arrangement; therefore, ICG will not provision Option 3 as a stand-alone product.

- .2 Digital Access Loop.** The Digital Access Loop is a digital 1.544Mbps DS1 trunk facility ordered from the Customer Premises to the ICG network point of presence, or from the Customer collocation space within the ICG network point of presence. A Digital Access Loop must be purchased on every order associated with the purchase of a Central Office Port (Options 1, 2, and 3). Digital Access Loops are not for sale without Options 1, 2, or 3. Monthly recurring and non-recurring installation charges apply per DS1 ordered. The Digital Access Loop is offered only where facilities and operating conditions permit and is not offered across LATA boundaries. The Digital Access Loop charge will be waived if the Customer is collocated.

6.0 NETWORK SERVICES - RETAIL PRICE LIST (cont'd)

6.16 Digital Access Service (cont'd)

6.16.1 Rate Element Descriptions -- Standard Features (cont'd)

- .3 DAS Subgroup:** This feature allows customers who subscribe to multiple associated service types within a single DAS serving arrangement to create subgroups, thereby dedicating a certain number of channels to a particular service type. DAS subgroup is available with Plan B only.
- .4 Caller Identification:** This feature displays the billing phone number of the calling party on specially designed customer-provided telephone equipment. Caller ID will only be provided when the phone number information is available to ICG. Caller ID will provide the phone number only.
- .5 Hunting within a DAS Subgroup/Arrangement:** This feature provides the ability to send traffic from one DAS to another within the same DAS Service Arrangement. Hunting within a DAS Arrangement may be sequential or uniform call distribution. DAS Service Arrangements may only be comprised of DAS from one Plan (Plan A or Plan B).

(N)

6.16.2 Rate Element Descriptions -- Optional Features

- .1 Called Number:** this feature provides the ability for ICG's customer to prioritize inbound calls from their customers, based on the dialed digits. The customer may choose to designate multiple DAS subgroups within a single DAS Serving Arrangement, as facilities and operating conditions permit. The customer will be required to purchase DAS Subgroups and additional telephone numbers to implement the called number functionality.
- .2 Expanded Originating Service (EOS):** EOS is available only with Plan A, and is an inbound Foreign Exchange-like digital dial tone service, using a DS1 transmission facility for delivery. EOS consists of two parts, and is subject to the following provisions:
 - ICG provides phone numbers (NPA-NXX's) for multiple calling areas within a switch service area. The customer may purchase phone numbers from calling areas within the same LATA as the physical customer's premises, or outside of the LATA that ICG has designed for this feature.
 - EOS also includes the ability to aggregate traffic from multiple calling areas within an ICG switch serving area. The aggregation of traffic from multiple calling areas may take place within the same LATA as the customer's premises or in another LATA that ICG has designed for this feature. Traffic from multiple ICG switch serving areas may not be aggregated within the same DAS Serving Arrangement. Separate DAS Serving Arrangements must be purchased per ICG switch.

6.16 Digital Access Service (cont'd)

6.16.2 Rate Element Descriptions -- Optional Features (cont'd)

.2 Expanded Originating Service (EOS) (cont'd)

- Traffic from calling areas that are served by different ICG switches requires a minimum purchase of one Central Office Port and Digital Access Loop per switch serving area.
- InterLATA EOS requires the purchase of EOS InterLATA transport components in addition to the EOS charges outlined in the Digital Access Tariff.
- DID, if selected as an option, is necessary per local calling area requested by the Customer. Monthly recurring and non-recurring installation charges apply as specified below.
- Because the hunting feature is provisioned as an inbound-only service, E-911 connectivity is unavailable; therefore, the customer is required to separately arrange for Local Exchange Service from ICG or another certified local exchange service provider to provide E-911 services.

6.0 NETWORK SERVICES - RETAIL PRICE LIST (cont'd)

6.16 Digital Access Service (cont'd)

6.16.2 Rate Element Descriptions -- Optional Features (cont'd)

- .3 Overflow Among DAS Arrangements:** provides the ability to send traffic from one DAS Service Arrangement to other when the previous DAS Service Arrangement is full. In order to implement Overflow among DAS Service Arrangements, the customer must have more than one DAS Service Arrangement, each designated by a separate telephone number. Overflow among DAS Arrangements can only occur among DAS Service Arrangement with the same Plan (A or B) type. This feature will be available as facilities and operating conditions permit.

Monthly Recurring Charge and Non-Recurring Charges apply per overflow to each DAS Service Arrangement. For example, a customer ordering overflow among three DAS service arrangements will be assessed two overflow charges.

- .4 DID:** enables incoming calls to be completed to CPE without attendant intervention through the out-pulsing of digits. Charges per number block apply in full, regardless of the number of DID numbers actually utilized by the Customer.

- .5 Number Block Charges:** provides the ability for the Customer to order additional telephone numbers. Charged per block of 20 phone numbers. There will be no ability to reserve numbers for future use except by purchasing number blocks (subject to availability).

- .6 Additional Trunk Phone Number:** ICG will provide one (1) phone number per DAS Serving Arrangement. Individual telephone numbers are available for purchase on a per number basis as facilities and operating conditions permit.

- .7 Change:** Changes relate to the reconfiguration of existing service and/or the modification of any network component. A change is per customer request and per service address. There are two pricing components involved within a change request.

1-24 = a request of 24 lines (DS-0) or less.

25+ = a request of 25 lines (DS-0) or more.

There is a separate charge for each component respectively.

- .8 Redirected Number Delivery:** Enables the Customer to "trap" a number that has been call forwarded during the calling process using redirection information for further call processing decisions on an incoming call.

8.0 MISCELLANEOUS SERVICES

8.1 Busy Line Verify and Line Interrupt Service

8.1.1 Description

Upon request of a calling party the Company will verify a busy condition on a called line.

A) The operator will determine if the line is clear or in use and report to the calling party.

B) The operator will interrupt the call on the called line only if the calling party indicates an emergency and requests interruption.

8.1.2 Regulations

A) A charge will apply when:

1) The operator verifies that the line is busy with a call in progress.

2) The operator verifies that the line is available for incoming calls.

3) The operator verifies that the called number is busy with a call in progress and the Customer requests interruption. The operator will then interrupt the call, advising the called party the name of the calling party. A separate charge will apply for both verification and interruption.

Issued: May 24, 1998

Effective: May 24, 1998

Filed under authority of Order of the Public Utilities Commission of Ohio, in
Case No. 90-9004-TP-TRF.

8.0 MISCELLANEOUS SERVICES (cont'd)

8.1 Busy Line Verify and Interrupt Services (cont'd)

8.1.2 Regulations (cont'd)

- B) No charge will apply when:
- 1) When the calling party advises that the call is to or from an official public emergency agency.
- C) Busy Verification and Interrupt Service is furnished where and to the extent that facilities permit.
- D) The Customer shall identify and save the Company harmless against all claims that may arise from either party to the interrupted call or any person.

9.0 SPECIAL ARRANGEMENTS

9.1 Special Construction

9.1.1 Basis for Charges

Where the Company furnishes a facility or service for which a rate or charge is not specified in the Company's tariffs, charges will be based on the costs incurred by the Company and may include: (1) non-recurring type charges; (2) recurring type charges; (3) termination liabilities; or (4) combinations thereof.

9.1.2 Basis for Cost Computation

The costs referred to in 9.1.1 preceding may include one or more of the following items to the extent they are applicable:

- A) cost installed of the facilities to be provided including estimated costs for the rearrangements of existing facilities. Cost installed includes:
 - 1) equipment and materials provided or used,
 - 2) engineering, labor and supervision,
 - 3) transportation, and
 - 4) rights of way;
- B) cost of maintenance;
- C) depreciation on the estimated cost installed of any facilities provided, based on the anticipated useful service life of the facilities with an appropriate allowance for the estimated net salvage;
- D) administration, taxes and uncollectible revenue on the basis of reasonable average costs for these items;

Issued: May 24, 1998

Effective: May 24, 1998

Filed under authority of Order of the Public Utilities Commission of Ohio, in
Case No. 90-9004-TP-TRF.

161 Inverness Drive West
Englewood, Colorado 80112

9.0 SPECIAL ARRANGEMENTS (cont'd)

9.1 Special Construction (cont'd)

9.1.2 Basis for Cost Computation (cont'd)

- E) license preparation, processing and related fees;
- F) tariff preparation, processing and related fees;
- G) any other identifiable costs related to the facilities provided; or
- H) an amount for return and contingencies.

9.1.3 Termination Liability

To the extent that there is no other requirement for use by the Company, a termination liability may apply for facilities specially constructed at the request of the customer.

- A) The termination liability period is the estimated service life of the facilities provided.
- B) The amount of the maximum termination liability is equal to the estimated amounts for:
 - 1) Cost installed of the facilities provided including estimated costs for rearrangements of existing facilities and/or construction of new facilities as appropriate, less net salvage. Cost installed includes the cost of:
 - a) equipment and materials provided or used,
 - b) engineering, labor and supervision,
 - c) transportation, and
 - d) rights of way;

9.0 SPECIAL ARRANGEMENTS (cont'd)

9.1 Special Construction (cont'd)

9.1.3 Termination Liability (cont'd)

B) (cont'd)

- 2) license preparation, processing, and related fees;
- 3) tariff preparation, processing, and related fees;
- 4) cost of removal and restoration, where appropriate; and
- 5) any other identifiable costs related to the specially constructed or rearranged facilities.

- C) The applicable termination liability method for calculating the unpaid balance of a term obligation. The amount of such charge is obtained by multiplying the sum of the amounts determined as set forth in Section 9.1.3(B) preceding by a factor related to the unexpired period of liability and the discount rate for return and contingencies. The amount determined in Section 9.1.3(B) preceding shall be adjusted to reflect the redetermined estimate net salvage, including any reuse of the facilities provided. This product is adjusted to reflect applicable taxes.

9.2 Individual Case Basis (ICB) Arrangements

Arrangements will be developed on a case-by-case basis in response to a bona fide special request from a Customer or prospective Customer to develop a competitive bid for a service not generally available under this tariff. ICB rates will be offered to the Customer in writing and on a non-discriminatory basis. Contracts resulting from a special request will be submitted for approval and filed with the PUCO

9.0 SPECIAL ARRANGEMENTS (cont'd)

9.3 Special Promotions

The Carrier may from time to time engage in special promotional trial service offerings of limited duration (not to exceed ninety days on a per customer basis for non-optional, recurring charges) designed to attract new subscribers or to increase subscriber awareness of a particular tariff offering. Requests for promotional offerings will be presented to the Commission for its review in accordance with rules and regulations established by the Commission, and will be included in the Carrier's tariff as an addendum to the Carrier's price lists.

9.4 Discounts

The Company may, from time to time as reflected in the price list, offer discounts based on monthly volume (or, when appropriate, "monthly revenue commitment" and/or "time of day" may also be included in the tariff).

10.0 CURRENT RATES AND CHARGES NETWORK SERVICES - RETAIL (PRICE LIST)

10.5 Digital Voice Grade DS-1 Trunk Service (see Section 6.6 of this tariff for Price Ranges).

Digital Voice Grade DS-1 Trunk Service provides line connections from an end user's Private Branch Exchange ("PBX"), Key System, or other telephonic device to the Switch Port. Digital Voice Grade DS-1 Trunk Service is available as a DS1 (1.544 Mbps). Service on a Digital Trunk is available on a measured rate basis for business customers only. A minimum order of 12 voice grade connections (active DSO trunks) is required. Charges for Local Calling Service and Message Telecommunications Service are assessed on a measured rate basis and are additional to charges for Digital Voice Grade DS-1 Trunk Service. These charges only apply to ICG Customers. (see Sections 6.4 and 6.9 for Price Ranges, see Sections 10.3 and 10.8 for Price Lists).

The Customer may opt to utilize Digital Voice Grade DS-1 Trunk Service for outgoing calls only, or for outgoing and incoming calls. In the latter case, direct inward dial ("DID") numbers must be purchased from the Company.

10.5.1.1 Digital Voice DS-1 Trunk Service, Ameritech Serving Area
(see Section 6.6.1.1 of this tariff for Price Ranges).

10.13 Calling Card Services (see Section 6.14 of this tariff for Price Ranges).

Charge per minute \$0.276 per minute
(within continental US)

ICG's Calling Card Service is offered to all ICG local exchange and long distance customers or as a standalone service. Service is offered twenty-four (24) hours a day, seven (7) days a week to all valid terminating locations. Intrastate service is sold as an add-on to interstate service. Access to ICG's Calling Card Service is via a toll free number. The Customer must input a valid Authorization Code in addition to the destination number with area code.

Calling Card calls are billed in six (6) second increments with a thirty (30) second call minimum. After the initial thirty (30) second minimum, each fractional call is rounded up to the nearest one-tenth of a minute. Fractional cents will be rounded to the nearest cent.

Usage of the Calling Card affirms that the Customer agrees to the terms and conditions set forth by this tariff and supporting material sent to the Customer together with the Calling Card.

11.0 PROMOTIONAL OFFERINGS

11.1 Long Distance Promotion

From September 1, 2000 until October 15, 2000, customers who subscribe to ICG long distance service will be given a \$50.00 credit towards their long distance usage for the first three months of ICG service. This credit will be given at the account level. Customers must subscribe to a minimum one year term in order to receive the credits. Existing ICG customers who do not currently subscribe to ICG long distance service are also eligible for this promotion. Early termination penalties apply as outlined in this tariff.

11.2 Grand Opening

From July 9, through July 31, 1997, for retail business Customers that switch their Local Exchange Telecommunications Service to the Company from the incumbent provider, the Company will waive Non-Recurring Charges, as well as Service order and Change Charges, specified in Sections 6.3 through 6.16 of this PUCO Tariff No. 2. To be eligible for this promotion, the Customer must agree in writing to remain a Customer of the Company's Business Local Exchange Telecommunications Service (which include; Standard Business Line, Single and Multiple Analog PBX Trunk, Direct Inward Dial (DID), Digital Voice Grade DS-1 Trunk Service, Integrated Services Digital Network (ISDN) Primary Rate Interface (PRI), Local Calling Service and Message Telecommunications Service for a minimum term of one year. The Company retains the right to limit the number of DID numbers ordered by a Customer as specified in Section 6.5 of this PUCO Tariff No. 2 to conserve this scarce resource pending the availability of permanent number portability. If the Customer terminates any service on which such non-recurring charges have been waived for any reason prior to the expiration of such one year period, the Company shall charge the Customer in full for each of the non-recurring charges that has previously been waived.

11.0 PROMOTIONAL OFFERINGS

11.3 "Satisfaction Guaranteed" Promotion

From September 1, 1999 and continuing for 180 days thereafter, the company will offer a "Satisfaction Guaranteed" promotion. If the Customer is not fully satisfied with the Company's service within the first ninety days after the Company activates service to the Customer, and if the Customer wishes to return to the Customer's previous local exchange service provider, the Company will pay non-recurring charges the Customer may incur for restoration of the Customer's previous local exchange (dial tone) service, excluding any extra upgrades and features, from the Customer's previous local exchange provider, and excluding any upgrades and additional features provided by the Company to the Customer. The Company's obligation under this Promotion to reimburse the Customer for non-recurring charges shall not exceed \$500.00 per Customer under any circumstances, and further provided that the Customer may not avail of the "Satisfaction Guaranteed" Promotion more than once during the period of this Promotion. Additionally if the Customer's telephone numbers were changed upon the Company's activation of service, the Company is not obligated to restore local exchange service under the previous telephone numbers. This "Satisfaction Guaranteed" Promotion is available to all Customers whose Service from the Company was activated within 90 days prior to the effective date of this tariff filing and to all Customers whose Service from the Company is activated after the effective date of this tariff filing.

11.4 Digital Access Services Promotion

From December 20, 2001 to February 15, 2002, new and existing high volume customers who order "Plan A" Digital Access Services with a 12 month term agreement will receive the following pricing:

Month 1-6 \$275.00 per month, per PRI
Months 7-12 \$475.00 per month, per PRI

New customers must order at least 200 PRI in order to receive this promotion. Existing customers must have at least 200 PRI currently in service with ICG and may order new additional circuits under this promotion. This promotion does not apply to any existing PRI services with ICG; existing agreements cannot be renewed in order to receive this promotion. There will be no installation charges applied for circuits installed under this promotion. All other features and Plans of Digital Access Service can be ordered under the regular tariffed rates. Early termination penalties will apply for disconnections prior to the end of the one-year term agreement.

11.0 PROMOTIONAL OFFERINGS

11.6 Installation Credit Promotion

Beginning June 22, 2000 through October 1, 2000, for new customers of the eligible services listed herein, (T)
that switch their Local Exchange Telecommunications Service to the Company from an ILEC, and for
existing Customers that add one or more of the following eligible services to their existing service, the
Company will offer Non-recurring Installation credits pursuant to this Installation Credit Promotion and the
particular tariffed services ordered by the customer. This promotion applies to the following eligible
services: Standard Single/Multiple Business Line, ICG Standard Business Line Plus, Single/Multiple
Analog PBX Trunk, Digital Voice Grade DS-1/Digital Trunks, and Digital Access Service (DAS). Other
than the Installation Credit described in this section, all other recurring and non-recurring charges listed in
this tariff as applicable to the eligible services continue to apply.

In order to qualify for this Installation Credit promotion, the customer must maintain a minimum of 10 lines
or trunks with the Company for the duration of 90 days from date of contract signature. If the Customer
does not maintain at least 10 active lines or trunks in service for at least 90 days after the contract signature
date, the Company will bill to the Customer and the Customer shall be responsible for payment of the full
amount of the credit that was previously extended to the Customer by the Company under this "Installation
Credit". New Service Contracts must be signed and dated by both ICG Telecom Group and the Customer
by October 1, 2000 and all services must be installed by December 1, 2000 in order to be eligible for this (T)
promotion. (T)

This is to attest that ICG will offer this promotion to eligible customers on a non-discriminatory basis.
