Case No. 08-\_\_-EL-BLN

**Motion for Waiver of Notice Requirements  
For  
Letter of Notification**

American Transmission Systems, Incorporated and Ohio Edison Company (collectively "ATSI") move for a waiver of the requirement of Rule 4906-5-02(A)(1) that a Letter of Notification be filed ninety days before planned start of construction of the Carlisle-Lorain 138 kV Transmission Line Tap to the National Bronze West River Substation . The reason for the requested waiver is to meet National Bronze's in-service date of November 27, 2008 for its new substation. Construction must commence on or before October 1, 2008 to meet the customer's requested in-service date.

The project is located to near the intersection of West River Road and Detroit Road in Sheffield Village, Lorain County, Ohio. This project consists of the installation of an approximately 3,700 feet long, single circuit radial transmission line tap to a new customer substation being constructed by National Bronze at its Sheffield Village facility.

This project was initiated at the request of the customer in order to meet its increased electrical requirements, and accordingly, ATSI was unable to make a filing in advance of the ninety-day notice period. ATSI proposes to start construction on this project as early as October 1,

2008, in order to meet the customer's proposed in-service date for its new substation. ATSI submits that good cause exists for granting the waiver, and moves this Board to grant a waiver of the ninety-day filing requirement of Rule 4906-5-02(A)(1).

Respectively submitted,
