Stuart M. Siegfried  
Environmental Compliance Coordinator  
Public Utilities Commission of Ohio  
180 East Broad Street  
Columbus, Ohio 43215 - 3793

Dear Mr. Siegfried:

I support wind turbine development in Union Township, Champaign County, Ohio.

Wind is a free commodity, is renewable, is clean and has no waste products.

Wind turbines sited over many acres would be harder to target by terrorist activities. Terrorist attack on nuclear facilities could cause radiation issues that could destroy the quality of life in our country.

Wind turbines could provide an economic stimulus for an agricultural township such as ours. Additional benefits could include township road improvements.

I attended EverPower Renewables' public meeting at Triad School on June 10, 2008, and found the information to be well presented and very helpful. EverPower Renewables was willing to answer all questions and did not shy away from possible negative aspects of wind turbine development. EverPower appears to be making every effort to be a "good neighbor" to our community.

For these reasons I think that the Ohio Power Siting board should grant EverPower Renewables with certification for the Buckeye Wind Farm.

Sincerely,

David A. Hayden
