PUCO

To Whom It May Concern:

I am writing about 07-829-GA-AIR.

I am astounded that you seem to think that Dominion needs to make a larger profit than they already make. And I am even more astounded that you think the fixed monthly charge should be raised. People like me who keep thermostat at 60° in the winter in order to: ① not use any more than my fair share of natural resources - ② be able to pay my bills - should not be paying for people who are very irresponsible about use of gas.

Please listen to Congressman Kucinich, the OCC, & the individuals who attended hearings & are writing to you. Companies deserve to make enough of a profit so they can pay their employees reasonable wages & pay their other bills. What Dominion is asking is pure selfishness & greed on part of their top people. Do the job you are supposed to do, PUCO. Dominion does not need an increase.

Sincerely,
Margaret D. Kacerek
