Public Utilities Commission of Ohio

Case Number 07-829-GA AIR

Why is the PUCO allowing the gas company to charge the \$ 17.50 per month distribution cost when we are paying \$5.70 today plus some MCF charge . This would double and/or almost triple this charge for me. I am retired and live on a fixed income and cannot absorb utility increases to help pay for some *others expenses*

it appears that your organization is not looking out for the consumer, if not what is the reason to have you guys your supposed to make sure things are fair for the average consumer .

The fixed charge should be eliminated and everything put into the MCF charge . so that those who use the most gas pay their fair share and it is related 100% based on who uses the system not the standard fixed charge that we pay for nothing .
