The first month in a new home, imagine reading a newsletter stating an ~~increase~~ in the water. What did I do? At first I was angry at myself for missing this detail. Then I fought back, walking around my new neighborhood. As I met my new neighbors, I started to see a trend - EVERYONE had some thing negative about this water company. From horrible smelling, horrible tasting water to bad customer service. I heard babies would get diarrhea after drinking the tap water! I heard most people wouldn't even give the water to their pets! And then it all hit home when I became very ill myself, suffering from kidney stones! My point is that for what we pay - it should be at least clean and healthy! I wonder if I drink the water in my back yard (Allum creek) would it be cleaner?!

We petitioned, we wrote letters, we went to hearings and still we end up with MORE of an increase - this is not right! Are you laughing at us?! What would you do if this was your home? For your info - we haven't even lived here long enough to take care of the (07) clean up! Enough is enough !!!!!!
