RE: Vectren Energy Delivery: 07:1080-GA-AIR

We believe that Vectren's proposal to increase delivery rates is NOT reasonable and any increase should be limited—certainly not 27 million in a year. There should be documented itemized reports to substantiate ANY increase at all!

We feel that Vectren is overstating its costs and investments, used a flawed system of budgeting and is asking customers to pay for equipment that is in use or has never been in use.

In addition, the restructured rates would have an adverse effect on lower usage, lower-income customers and create disincentives to use less natural gas through energy efficiency efforts.

We urge the PUCO to act in the best interest of ALL customers in reducing these rates.

Yours truly,

Don Prizler
