INVESTIGATIVE DIVISION
PUBLIC UTILITIES COMMISSION OF OHIO

Peoples

I am writing this letter because like other people all over the state I cannot stand much more of the raises of cost, on my natural gas bill & my electric bill, plus grocery store prices. I thought you people were supposed to control the rates for utilities, yet the Gas Co. & the A.E.P. are wanting to raise their prices.

As it is now the Electric company wants to raise it 15 percent a year for the next 3 years. I understand also the Gas Co. wants to raise their prices also.

This is ridiculous.

I'm on a fixed income (retired) and I can't stand you people letting them do this.

I have to eat, pay doctor bills, buy clothes, pay for my car, and house also.

My fixed income is less than 30,000 per year. I also pay for life insurance.

How much longer do you people think me & other people in my income class can hold on? Do you people even care?

Would you rather let us go on bankruptcy, then welfare? Then you people would really have to support us as taxpayers of this state.
