FILE

To Whom it may concern,

About the prices in the
AEP 45% raise over the next 3
years. My wife + I are on a
fixed income. Several people in
the area are retired. My check
has not increased since I retired.
I can understand a 5 or 6%
increase but 15%!! a year
is too much. My electric bill
doubled when we went from
Allegheny Power to AEP.
It sounds to me like AEP is
like all other companies - only
interested in making more
money. So you should think
twice about giving them → over

Such a large increase. Many people
in the area have small retirements
and that much of an increase would
really have a terrible effect on their
living.

Thank you,
Phillip O Mayle
