Re: Amendments to Choice One Communications of Ohio Inc. d/b/a One Communications  
Access Services Tariff, P.U.C.O. Tariff No. 2

Dear Ms. Crockron:

Choice One Communications of Ohio Inc. d/b/a One Communications hereby provides an original and five (5) copies of an ATA (Carrier to Carrier; introduce or change c-t-c service tariffs) filing for the above-referenced tariff. The amended pages have an issued date of November 4, 2008 and an effective date of December 5, 2008.

Included in this application you will find the following:

- Telecommunications Application Form
- Exhibit A: Tariff sheets currently in effect that are to be revised as a result of the proposed changes.
- Exhibit B: Copy of the proposed tariff sheets that will introduce the proposed changes.
- Exhibit C: Overview and detail of requested changes.

Please date-stamp the enclosed extra copy of this cover letter and return to me in the self-addressed, postage-paid envelope provided. Thank you for your attention to this matter. If you have any questions or need additional information on this proposed filing, please do not hesitate to contact me directly at (616) 988-7341 or via email at [Swalters@onecommunications.com](mailto:Swalters@onecommunications.com) or Linda Manske at (616) 988-7017 or via email at [Lmanske@onecommunications.com](mailto:Lmanske@onecommunications.com).

B	The Tariff pages subject to the proposed change(s), reflecting the change, with the change(s) marked in the right margin.
C	A short description of the nature of the change(s), the intent of the change(s), and the customers affected.
D	A copy of the notice provided to customers, along with an affidavit that the notice was provided according to the applicable rule(s).

**Section III. – Attestation**

Registrant hereby attests to its compliance with pertinent entries and orders issued by the Commission.

**AFFIDAVIT**

***Compliance with Commission Rules and Service Standards***

I am an officer/agent of the applicant corporation, Choice One Communications of Ohio Inc. d/b/a One Communications, and am authorized to make this statement on its behalf.

(Name)

I attest that these tariffs comply with all applicable rules, including the Minimum Telephone Service Standards (MTSS) Pursuant to Chapter 4901:1-5 OAC for the state of Ohio. I understand that tariff notification filings do not imply Commission approval and that the Commission's rules, including the Minimum Telephone Service Standards, as modified and clarified from time to time, supersede any contradictory provisions in our tariff. We will fully comply with the rules of the state of Ohio and understand that noncompliance can result in various penalties, including the suspension of our certificate to operate within the state of Ohio.

I declare under penalty of perjury that the foregoing is true and correct.

BILLING AND COLLECTION (Cont'd)

## 8.5 MEET POINT BILLING

In cases where the Customer chooses to originate and terminate its switched traffic with the Company via the use of another Local Exchange Carrier's (LEC) tandem facilities (tandem connection), Meet Point Billing (MPB) will apply. Both the Company and the other LEC will issue bills to the Customer for services rendered.

With tandem connection, both the Company and the other LEC will prepare its own bill and bill charges in accordance with its own tariff, unless other arrangements are made that are mutually agreeable to both the Company and the Customer. Mileage sensitive charges will be proportionately billed in accordance with industry standards.

## 8.6 CHARGEABLE OPTIONAL FEATURES

800 Database Access Service is provided to all customers in conjunction with switched access service. When a 1+800+NXX-XXXX call is originated by an end user, the Company will utilize the SS7 network to query an 800 database to identify the Customer to whom the call will be delivered, and to provide vertical features based on the dialed digits. The call will then be routed to the identified Customer over switched access.

A Basic or Vertical Feature Query charge is assessed for each query launched to the 800 database. The Basic Query provides for the identification of the customer to whom the call will be delivered and includes area of service routing which allows routing of 800 calls by telephone companies to different interexchange carriers based on the Local Access Transport Area (LATA) in which the call originates. The Vertical Feature Query provides the same customer identification function in addition to vertical features which may include: (1) call validation, ensuring that call originates from subscribed service areas; (2) POTS translation of 800 numbers; (3) alternate POTS translation, which allows subscribers to vary the routing of 800 calls based on factors such as time of day, place of origin of the call, etc.; (4) multiple carrier routing, which allows subscribers to route to different carriers based on factors similar to those in (3).

## 8.6.1 Rates and Charges

800 Data Base Access Service	Minimum	Maximum
- Base Query, per query:	\$0.0010	\$0.0100
- Vertical Features:		
800 to POTS translation, per query	\$0.0005	\$0.0050
All other, per query	\$0.0015	\$0.0150

**BILLING AND COLLECTION** (Cont'd)

**8.5 MEET POINT BILLING**

In cases where the Customer chooses to originate and terminate its switched traffic with the Company via the use of another Local Exchange Carrier's (LEC) tandem facilities (tandem connection), Meet Point Billing (MPB) will apply. Both the Company and the other LEC will issue bills to the Customer for services rendered.

With tandem connection, both the Company and the other LEC will prepare its own bill and bill charges in accordance with its own tariff, unless other arrangements are made that are mutually agreeable to both the Company and the Customer. Mileage sensitive charges will be proportionately billed in accordance with industry standards.

**8.6 CHARGEABLE OPTIONAL FEATURES**

800 Database Access Service is provided to all customers in conjunction with switched access service. When a 1+800+NXX-XXXX call is originated by an end user, the Company will utilize the SS7 network to query an 800 database to identify the Customer to whom the call will be delivered, and to provide vertical features based on the dialed digits. The call will then be routed to the identified Customer over switched access.

A Basic or Vertical Feature Query charge is assessed for each query launched to the 800 database. The Basic Query provides for the identification of the customer to whom the call will be delivered and includes area of service routing which allows routing of 800 calls by telephone companies to different interexchange carriers based on the Local Access Transport Area (LATA) in which the call originates. The Vertical Feature Query provides the same customer identification function in addition to vertical features which may include: (1) call validation, ensuring that call originates from subscribed service areas; (2) POTS translation of 800 numbers; (3) alternate POTS translation, which allows subscribers to vary the routing of 800 calls based on factors such as time of day, place of origin of the call, etc.; (4) multiple carrier routing, which allows subscribers to route to different carriers based on factors similar to those in (3).
