Dear Chairman Schriber:

On October 28, 2008, the Board granted the certificate amendment requested in this case by Columbus Southern Power Company (CSP). In the process of obtaining easements for this project, one of the private property owners requested that CSP relocate the centerline out of a wooded area through a clearing instead. CSP plans to implement this minor change and a map of the adjustment is attached. This adjustment should not be considered an amendment since, consistent with OAC 4906-5-10(A)(6), it is within 2,000 feet of the study corridor, will not impact any additional landowners, and will not create further impacts within the planned right-of-way of the proposed facility.

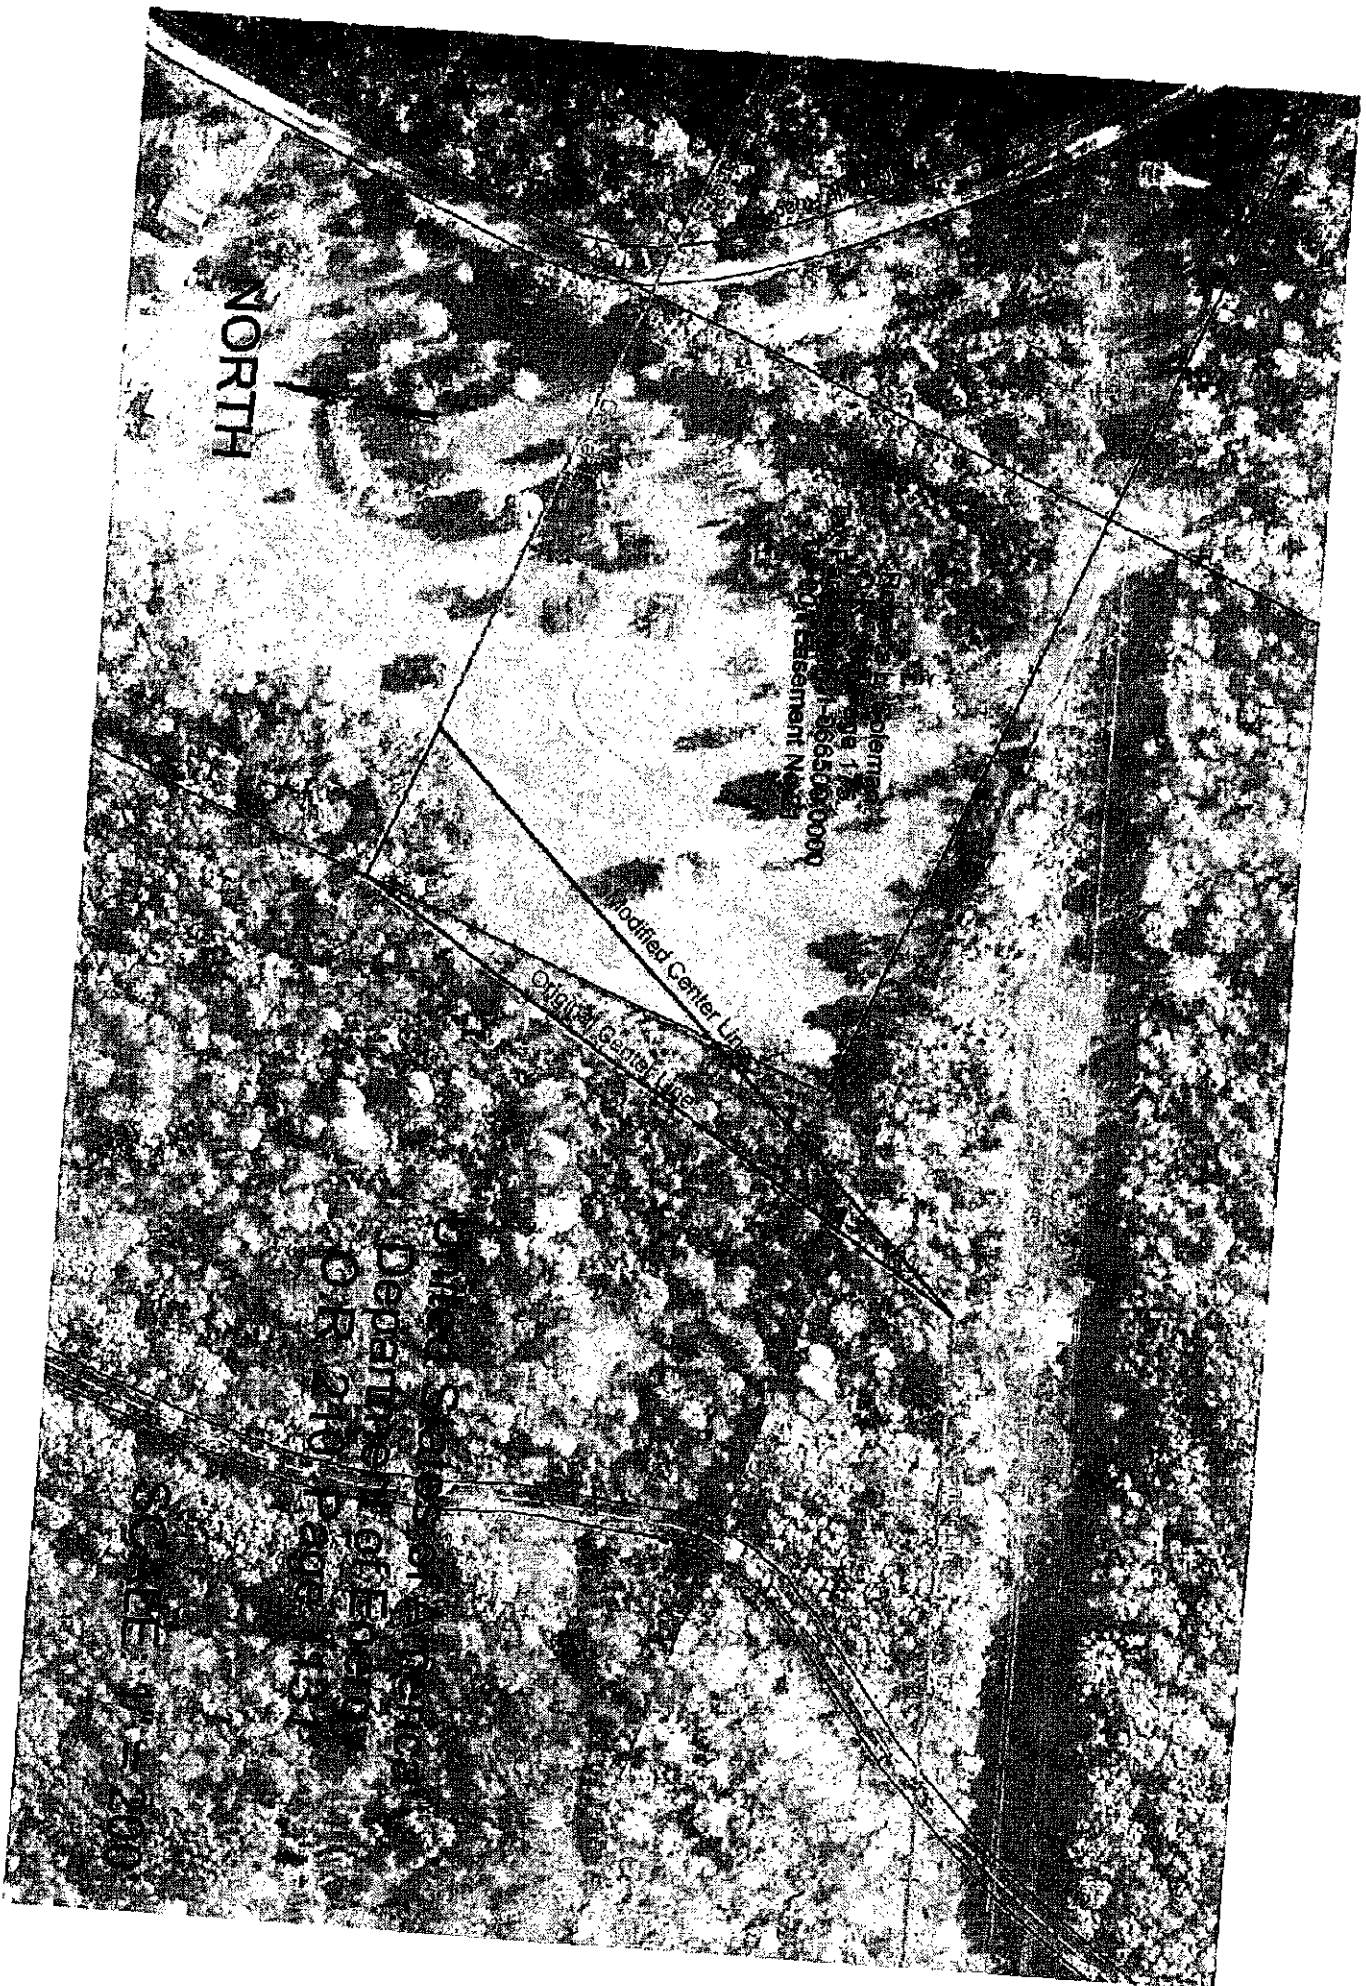

Please let me know if you have any questions or need additional information concerning this minor change. Thank you for your attention to this matter.

Cordially,

Steven T. Nourse
