Re: Buckeye TeleSystem, Inc.
Case No. 08-1038-TP-ATA
Amended Application to Amend Tariff PUCO No. 3
Updated 7th Revised Page No. 104 and Revised Exhibit C

Dear Ms. Jenkins:

On Friday, November 21, I filed an Amended Application on behalf of Buckeye TeleSystem, Inc. in the above case. After further discussions with the Staff, I am filing two documents which supersede those which were filed on Friday. The first is proposed 7th Revised Page No. 104 which was contained in Exhibit B. I would ask that the attached page supersede that which was filed on Friday, November 21.

In addition, I am submitting a revised Exhibit C which should supersede the Exhibit C that I filed on Friday, November 21.

Thank you in advance for your cooperation.

Revised Exhibit C (November 24, 2008)

Description of and Rationale for the Proposed Tariff Change:

In this application, Buckeye TeleSystem is amending its Tariff, PUCO #3, to change certain local switching end office per minute rates, an adjustment brought about by changes in the Local Switching rate charged by AT&T-Ohio. The new charges represent the lowest of the three ILECs in Buckeye's service area and apply to all carriers with whom the Company exchanges traffic. The Company also is adding certain language relative to Local Number Portability.

With respect to the Local Transport Termination rate of \$.000142 on 4th Revised Page No. 103-A, this rate is a composite of the ZONE 2 rates of AT&T. The four elements of the AT&T ZONE 2 rates:

Tandem Switched Termination – \$.0001030;

Common Multiplexing per Access Minute using Tandem Transport – \$.0000150;

Minutes of use weighted rate for the Host/Remote Transportation Termination - \$.0000227; and

Minutes of Use weighted rate for the Host/Remote Multiplexing-\$.0000011

The Buckeye proposed Local Transport Termination rate of \$.000142 is designed to assess the same total charge to the IXC that would be assessed by AT&T ILEC for the same distribution of traffic to the exchanges in which BTS provides services in competition with AT&T ILEC. To simplify the charging to the IXCs, Buckeye has chosen to combine a number of the transport related rate elements into a single Transport Termination Rate element.

The Tandem Switched Transport Termination rate of \$.000142 on 7th Revised Page No. 104 is also based upon the same AT&T rate elements as set forth above.

With respect to the Data Base 800 Query Charges, Buckeye has adopted the AT&T 800 Call-Routing Query Charge and the 800 Carrier-ID-Only Charge rate elements. Buckeye has not included the 800 Routing Options Charge.

The Call Routing Query Charge only applies when POTS Translation and Routing Options are embedded in the LEC Data Base 800 system. Most IXCs do not

make use of this capability and instead perform these functions in their own 800 Data Bases.

Buckeye is not currently assessing the 800 Routing Option Charge to the Carrier-ID-Only functions, but the 800 Call-Routing Query Charge. AT&T Data Base 800 identifies to Buckeye if the Query includes any POTS translation and/or routing Options.
