TARIFF FORMAT

- A. Sheet Numbering - Sheet numbers appear in the upper-right corner of the sheet. Sheets are numbered sequentially. However, new sheets are occasionally added to the Tariff. When a new sheet is added between sheets already in effect, a decimal is added. For example, a new sheet added between Sheets 14 and 15 would be 14. 1.
- B. Sheet Revision Numbers - Revision numbers also appear in the upper-right corner of the sheet. These numbers are used to determine the most current sheet version on file with the Commission. For example, the 4th revised Sheet 14 cancels the third revised Sheet 14. Because of various suspension periods, deferrals, etc., the Commission follows in their Tariff approval process, the most current sheet number on file with the Commission is not always the Tariff page in effect. Consult the Check Sheet for the sheet currently in effect.
- C. Paragraph Numbering Sequence - There are nine levels of paragraph coding. Each level of coding is subservient to its next higher level of coding.
- 2
 - 2.1
 - 2.1.1
 - 2.1.1.A
 - 2.1.1.A.1
 - 2.1.1.A.1.(a)
 - 2.1.1.A.1.(a).1
 - 2.1.1.A.1.(a).I.(i)(1)
- D. Check Sheets - When a Tariff filing is made with the Commission, an updated check sheet accompanies the Tariff filing. The check sheet lists the sheets contained in the Tariff, with a cross reference to the current revision number. When new sheets are added, the check sheet is changed to reflect the revision. All revisions made in a given filing are designated by an asterisk (*). There will be no other symbols used on this sheet if these are the only changes made to it (i.e., the format, etc. remains the same, just revised revision levels on some sheets). The Tariff user should refer to the latest check sheet to find out if a particular sheet is the most current sheet on file with the Commission.

SECTION 2 - RULES AND REGULATIONS2.10 TIMING OF CALLS2.10.1 When Billing Charges Begin and Terminate for Phone Calls

Customer's long distance usage charge is based on the actual usage of Carrier's network. Usage begins when the called party picks up the receiver (i.e., when two-way communication, often referred to as "conversation time," is possible). When the called party picks up is determined by hardware answer supervision in which the local telephone company sends a signal to the switch or the software utilizing audio tone detection. When software answer supervision is employed, up to 60 seconds of ringing is allowed before it is billed as a usage of the network. A call is terminated when the calling or called party hangs up.

2.10.2 Billing Increments

Unless otherwise specified in this tariff, the minimum call duration for billing purposes is sixty (60) seconds. After the initial sixty (60) second minimum billing increment, calls are billed in six (6) second increments. All partial increments are rounded up to the next whole increment.

2.10.3 Per-Call Billing Charges

Billing will be rounded to the nearest penny for each call.

2.10.4 Uncompleted Calls

There shall be no charge for uncompleted calls.

2.11 START OF BILLING

For billing purposes, the start of service is the day following acceptance by the Customer of Carrier's service or equipment. The end of service date is the last day of the minimum notification of cancellation or any portion of the last day, after receipt by Carrier of notification of cancellation as described in Section 2.6.4 of this Tariff.

Any special interface equipment or facilities necessary to achieve compatibility between the facilities of Carrier and other participating carriers shall be provided at the Customer's expense.

2.12.2 Interconnection with the facilities or services of other carriers shall be under the applicable terms and conditions of the other carriers' tariffs. The Customer is responsible for taking all necessary legal steps for interconnecting his or her customer provided terminal equipment of communications systems with Carriers' facilities. Customers shall secure all licenses, permits, rights-of-way, and other arrangements necessary for such interconnections.

2.13 CALCULATION OF DISTANCE

Usage charges for all mileage-sensitive products are based on the airline distance between rate centers associated with the originating and terminating points of the call.

2.14 OTHER RULES

2.14.1 Horizon reserves the right to validate the credit worthiness of Customers through available verification procedures. Each Customer will be required to establish credit in accordance with Rules 4901:1-17-03, 4901:1-17-06, and 4901:1-5-13 of the Ohio Administrative Code. INTEREXCHANGE TELECOMMUNICATIONS SERVICES

SECTION 3 - DESCRIPTION OF SERVICES3.1 DESCRIPTION OF PROPOSED SERVICES3.1.1 Basic Message Telecommunications Service (MTS)

MTS is an intercity usage-based service which is available for access by residential subscribers on a full time basis. It consists of those service components required for telecommunications between the calling and called parties. The subscriber will employ one of the following dialing patterns to use this service:

- A. In all equal access exchanges, the subscriber's telephone lines(s) can be programmed (presubscribed) by the Local Exchange Company (LEC) to automatically route "1+" InterLATA calls to the Carrier network);
- B. To access the Carrier network from an equal access office for an IntraLATA call or when calling from a telephone line not presubscribed to HDL, subscribers would dial office for an IntraLATA call or when calling from a telephone line not presubscribed to Carrier, subscribers would dial "10XXXX" and then the called telephone number; or
- C. From non-equal offices, subscribers would dial an access telephone number, receive a second dial tone, then dial their authorization code and the called telephone number.
- D. In the event that Carrier determines that provision of MTS via a seven digit access number imposes a significant risk of fraudulent use of its service, Carrier, at its discretion, may choose not to process new orders for service and/or may, after written notice, cancel existing customers' authorization codes. Basic MTS is provided only where facilities and billing capabilities permit.
- E. Rate periods, as defined in Section 1.1, are applicable as indicated and are based on the local prevailing time at the point from which the call is made. The evening rate shall also apply on Carrier-specified holidays from 8:00 a.m. to 11:00 p.m., except when a lower rate would normally apply. Carrier-specified holidays are New Year's Day, Martin Luther King's Birthday (federally observed), President's Day, Memorial Day (federally observed), Independence Day, Labor Day, Columbus Day, Veteran's Day, Thanksgiving Day, and Christmas Day. Calls that begin in one rate period and terminate in another will be prorated accordingly, on a per minute basis.

SECTION 3 - DESCRIPTION OF SERVICES3.1 DESCRIPTION OF PROPOSED SERVICES3.1.2 Horizon Calling Card Services

Calling card services allow a customer to have a call billed to their Horizon Long Distance calling card rather than to the phone line from which the call is originated. Whether or not the calling line is presubscribed to Carrier, to place a call, the customer will dial either a local access number or a toll free 800/888 access number into Carriers calling card platform. The customer will then be prompted to enter in their calling card number plus their personal identification number (PIN). Once the card is validated, the customer will be prompted to enter the number they wish to call and the call will be processed. Horizon Long Distance calling cards do not require live operator intervention.

3.1.3 Operator Assisted Services

Both traditional and AOS operator assistance is available on station-to-station calls, collect calls, calls billed to a third number and calling card calls. From presubscribed lines, customers can obtain operator assistance by dialing "00". From any line, customers can obtain Carrier operator assistance by dialing "10XXXX." Operator assisted services are provided only where facilities and billing capabilities permit.

3.1.4 Directory Assistance Services

Directory Assistance Service is available to customers who dial 1+ (NPA) + 555-1212 from lines presubscribed to Carrier or who dial 10XXXX + 1 + (NPA) + 555-1212 from lines not presubscribed to Carrier. Directory Assistance service is provided only where facilities and billing capabilities permit.

3.1.5 Commercial Message Telecommunications Service (MTS)

Commercial Message Telecommunications Service (MTS) is an intercity usage-based service for customers classified as business customers by their local exchange provider. Commercial MTS is accessed in the same manner that Basic MTS service is accessed and except where otherwise noted is a similar product. Commercial MTS is provided only where facilities and billing capabilities permit.

SECTION 3 - DESCRIPTION OF SERVICES**3.1 DESCRIPTION OF PROPOSED SERVICES****3.1.6 Toll Free Service**

Toll Free service is an intercity usage-based service where calls are dialed with a specific prefix (800 or 888) and paid for by the subscriber of the service rather than the calling party. The customer is responsible for all charges for use of the Carrier network arising from calls placed to the customer's toll free number. For Basic Consumer Service, the toll free service customer shall not have any ownership interest or proprietary right in any particular toll free service number. Carrier shall not be liable, at all, for the use, misuse or abuse of a customer's toll free service by third parties, including without limitation, the customer's employees or members of the public who dial the customer's toll free number by mistake. Compensation for any injury that the customer may suffer due to the fault of other than the Carrier must be sought from such other parties. Each toll free telephone number must be placed in actual and substantial use by the customer.

The customer may be required to provide calling pattern information necessary for Carrier to evaluate whether it may result in network blockage and Carrier may suspend installation until adequate facilities are available. In situations where heavy call volumes are expected in a short period of time Carrier may require the customer to supply a traffic forecast, identify the anticipated busy hour, the geographical marketing areas and the schedule of promotional activities. Customers may not use ANI Delivery to invoice their customers in connection with services other than common carrier services.

Customers can choose Carrier to serve as their Responsible Organization (Resp Org) for the administration of their toll free number(s). A Resp Org is the entity responsible for managing and administering toll free subscriber's records in the Toll Free Service Management System (SMS/800). The SMS/800 recognizes one Resp Org for each 800/888 number. In its capacity as Resp Org, Carrier will reserve, assign, activate or change, upon receipt of a verified request, toll free numbers for a customer or potential customer and will administer toll free numbers, in accordance with customary industry standards and practices, the terms of this service description and the effective procedures of the SMS/800. When a customer decides not to utilize the reserved, assigned or activated toll free number, the customer must notify Carrier within 48 hours so that Carrier may release the toll free number to the pool of numbers available for assignment in accordance with industry practice and standards. If the customer owes the company \$1000 or more and that amount is 30 days past due, Carrier may refuse to request an SMS Resp Org change on the customer's behalf until the obligation is fully paid.

INTEREXCHANGE TELECOMMUNICATIONS SERVICES

SECTION 3 - DESCRIPTION OF SERVICES3.1 DESCRIPTION OF PROPOSED SERVICES3.1.6 Toll Free Service (cont'd.)

Toll free numbers are incidental to the inbound calling services with which they are associated and, as such, may not be sold, transferred or otherwise conveyed independent of inbound transmission services. The assignment of a toll free telephone number for use with company-provided inbound transmission service confers on the customer no proprietary interest whatsoever in the number assigned. It shall be a violation of the customer's service agreement if the customer seeks to acquire, or does acquire, any toll free number associated with inbound service provided by the company for the primary purpose of selling, brokering, bartering or releasing for a fee (or other consideration) to another party that number, independent of the service with which is associated. In any instance in which the company learns that a customer or prospective customer is attempting to sell or otherwise transfer or assign a toll free number to another person, in violation of the service provisions, Carrier may immediately and without notice release the number from reserved status, or it may immediately, upon written notice to the customer, discontinue the furnishing of service via the number, which ever course of action is appropriate.

3.1.7 Minimum Monthly Billing

Several Horizon Long Distance products require customers to meet a minimum billing amount. If a customer, who chooses a product that requires a minimum billed amount, does not meet or exceed that amount, Horizon will charge the customer the difference between the minimum billing amount and the actual billed amount.

3.1.8 Toll Free Recurring Charges

Horizon Long Distance offer Toll Free Products (800/888) that require customers to pay recurring monthly charges. Horizon will bill customers the appropriate charge, depending upon which product the customer has chosen.
