Re: Rockies Express Pipeline LLC  
Docket No. CP07-208  
**Weekly Report #30, Period Ending January 14, 2009**

Dear Ms. Bose:

Pursuant to Environmental Mitigation Measure 7 in the Appendix to the Federal Energy Regulatory Commission's May 30, 2008 Order in Docket No. CP07-208, Rockies Express Pipeline LLC hereby submits its weekly construction progress report for activities for the week ending January 14, 2009.

If you have any questions regarding this report, please contact Crystal Heter at (303) 914-7795.

Respectfully submitted,

/s/ Shippin Howe

**FERC Weekly Report**

**Weekly Report #:** 30

**Start:** 1/8/2009 **End:** 1/14/2009

**Environmental Training (this week / to date):**

**245.5 man hours / 11198.75 man hours**

**221 persons / 7989 persons**

---

**Spread/Facility** A1

**Name** Janik, Kevin

**Summary**

The following construction activities were observed by the environmental inspection team throughout the Spread A1 corridor: Stringing and bending are now completed. Typical station construction at the Mexico CS, grade and topsoiling, fencing, equipment-cleanliness inspection, ditching, welding pipe-gang, tie-ins, lowering-in and backfill, clean-up with two crews, hydro-testing, HDD's, and installation and maintenance of ECD's and signage.

Environmental training is ongoing as necessary. The waterbody crossing schedule has been updated in that table. Three dedicated environmental crews are working. See variance request table attached to this report for additional information on variances. Cultural monitors were onsite as required this week near MP 70 and between MP 38 & 42.

An NCR was recorded on 01/09/09 at MP 45.4; please see compliance tables for more information.

**Next Week**

Environmental Inspection team will continue inspection of contractor activities. Daily morning briefings will continue to be conducted between Contractor, Rockies inspection management, and Compliance Monitor, when available.

---

**Spread/Facility** A2

**Name** Padgett, Jack

**Summary**

The following construction activities were observed by the environmental inspection team throughout the Spread A2 corridor: Road access/approaches, topsoil measurement and topsoiling, HDD/boring, hydrotesting, ditching, drain tile locating and repairs, stringing, welding, tie-ins, coating, lowering-in, backfill, installation of signs, and installation and maintenance of ECDs.

Contractor has three environmental crews working at this time. Environmental training is ongoing as necessary. See variance request table attached to this report for additional information on variances. Cultural monitoring was not required on Spread A-2 this period.

An NCR was recorded on 01/09/09 at MP 85.2; please see compliance tables for more information.

**Next Week**

Environmental Inspection team will continue inspection of contractor activities. Daily morning briefings will continue to be conducted between Contractor, Rockies inspection management, and Compliance Monitor, when available.

---

**Spread/Facility**      B**Name** Zagar, Steve**Summary**

The following construction activities were observed by the environmental inspection team throughout the Spread B corridor: Compressor and Meter Station inspections, trenching, road boring, tie-in, lowering-in and backfill for tie-ins, decompaction, clean-up and restoration, tile repair, and installation and maintenance of ECDs.

Environmental inspectors have been placing appropriate signage and environmental training is ongoing as necessary. See variance request table attached to this report for additional information on variances. The contractor has two environmental crews working. The waterbody crossing schedule has been updated and attached. Cultural monitoring was not required onsite this period.

There were no NCR's recorded this period.

**Next Week**

Environmental Inspection team will continue inspection of contractor activities. Daily morning briefings will continue to be conducted between Contractor, Rockies inspection management, and Compliance Monitor, when available.

---

**Spread/Facility**      C**Name** Harker, Margie**Summary**

The following construction activities were observed by the environmental inspection team throughout the Spread C corridor: Permanent drain tile repairs, clean-up and restoration, and installation and maintenance of ECDs.

Environmental inspectors are placing and maintaining appropriate signage. The contractor has one dedicated environmental crew working. Environmental training is ongoing as necessary. See variance request table attached to this report for additional information on variances. Cultural monitoring is not required at any work locations on the spread.

There were no NCR's recorded this period.

**Next Week**

Above remaining construction activities will continue. Environmental Inspection team will continue inspection of contractor activities and sensitive resources. Daily morning briefings will continue to be conducted between Contractor, Rockies inspection management, and Compliance Monitor, when available.

---

**Spread/Facility**      D**Name** Padgett, Jackie**Summary**

The following construction activities were observed by the environmental inspection team throughout the Spread D corridor: Clearing, grading, topsoil depth measurement and topsoiling, ditching, stringing, bending, lower-in, backfill, clean-up and restoration, road bores, HDD's, hydrotesting, bridge and mat placement, installation, inspection, and maintenance of ECD's is occurring. Environmental inspectors have been placing appropriate signage. Contractor has three environmental crews working. See variance request table attached to this report for additional information on variances. The waterbody crossing schedule has been updated and attached. Environmental training is ongoing as needed. Cultural monitoring was not required onsite this period.

There were no NCR's recorded this period.

**Next Week**

Environmental Inspection team will continue inspection of contractor activities. Daily morning briefings will continue to be conducted between Contractor, Rockies inspection management, and Compliance Monitor, when available.

---

**Spread/Facility** E**Name** Edlin, Mike**Summary**

The following construction activities were observed by the environmental inspection team throughout the Spread E corridor: Grading completed this week, topsoil depth measurement and topsoiling, ditching, stringing, bending, lower-in, backfill, road bores, HDD's, bridge and mat placement, installation, inspection, and maintenance of ECD's is occurring. Environmental inspectors have been placing appropriate signage. Contractor has five environmental crews working. See variance request table attached to this report for additional information on variances. The waterbody crossing schedule has been updated and attached. Environmental training is ongoing as needed. Cultural monitoring was not required onsite this period. Eagle monitor was onsite this week as appropriate.

NCR's were recorded on 01/08/09 at MP 310; and on 01/14/09 at MP 306.4; please see compliance tables for more information.

**Next Week**

Environmental Inspection team will continue inspection of contractor activities. Daily morning briefings will continue to be conducted between Contractor, Rockies inspection management, and Compliance Monitor, when available.

---

**Spread/Facility** F1**Name** Hayes, Brian**Summary**

The following construction activities were observed by the environmental inspection team throughout the Spread F1 corridor: Activities included EI's placing appropriate signage, installation, maintenance, and inspection of appropriate ECD's, topsoil measurement, clearing, grading, bridge/mat installations, trenching, stringing, bending, coating, welding, lower-in, backfill, tie-ins, clean-up, road bores, and hydrotest. Cultural monitoring on the spread was not required this period. Contractor has two environmental crews working. See variance request table attached to this report for additional information on variances. Environmental training is ongoing as needed.

NCR's were recorded this period on 01/10/09 at MP 399.9; on 01/13/09 at MP 395; and on 01/13/09 at MP 397; please see compliance tables for more information.

**Next Week**

Environmental Inspection team will continue inspection of contractor activities. Daily morning briefings will continue to be conducted between Contractor, Rockies inspection management, and Compliance Monitor, when available.

---

**Spread/Facility** F2**Name** Schwarz, Wes**Summary**

The following construction activities were observed by the environmental inspection team throughout the Spread F2 corridor: Activities this week included the installation, maintenance, and inspection of appropriate ECD's, mainlining between 7 Mile and 4 Mile Creeks, clearing, grading, topsoil testing and topsoiling, ditching, and stringing and bending, and welding. See variance request table attached to this report for additional information on variances. Cultural monitoring was not required onsite this period. Environmental training is ongoing as needed.

An NCR was recorded on 01/09/09 at MP 404.8; please see compliance tables for more information.

**Next Week**

Environmental team will continue inspection of contractor activities. Daily morning briefings will continue to be conducted between Contractor, Rockies inspection management, and Compliance Monitor, when available.

---

**Spread/Facility** Arlington CS**Name** Kinney, Mike**Summary**

The following construction activities were observed at the station: Typical station work throughout the site continues, grouting, utility piping, warehouse erection, nitrogen tests of various lines, meter building erection, set Unit 3 engine, electrical work, miscellaneous excavations, backfill and compaction is ongoing, adding more gravel to drive/parking areas, maintenance of appropriate ECD's, continuing receipt of ancillary materials and equipment, and environmental training. There were no environmental compliance issues. The station recorded nine inches of snow totals this period.

**Next Week**

The above typical station construction activities will continue and expand as warranted.

---

**Spread/Facility** Bainbridge CS**Name** Franzene, Eric**Summary**

Work included typical station construction, including various excavations, concrete pours, general building/footing construction, housekeeping daily, delivery and receipt of ancillary material and equipment, and the installation, maintenance, and inspection of ECDs. Environmental Inspectors from Spread D also monitored activities at the station and found them to be in compliance.

**Next Week**

The above typical station construction activities will continue and expand as warranted.

---

**Spread/Facility** Bertrand CS**Name** Vanya, Kevin**Summary**

The chief inspector reports the following activities occurring on site: Typical station construction, utility ditching, erection of office/warehouse, miscellaneous electrician work, conduit, various excavations, welding fab work, pulling of cables and wires, receipt of ancillary materials and equipment, place sheeting and roof on compressor building, jeep and backfill utility piping, installation, inspection, and maintenance of appropriate ECD's, and environmental training. Housekeeping efforts occur daily. Utility and electrical typical work continues. The station had some 50 MPH winds to contend with this period, causing some damage to ECD's. All were repaired by the end of period.

**Next Week**

The above typical station construction activities will continue and expand as warranted.

---

**Spread/Facility** Blue Mound CS**Name** Suggs, Garvin**Summary**

Activities this week included inspection and maintenance of appropriate ECD's, building erection, various excavations and backfill, pipe fabrication, sandblasting, rebar tie-off, miscellaneous concrete pours and grouting, various plumbing activities, glycol lines, underground instrument lines, welding, and coating, office/warehouse erection, compressor building erection, hydrotest, electrical and conduit placement, environmental training as necessary, and the delivery and receipt of ancillary materials and equipment. There were no compliance issues.

**Next Week**

The above typical station construction activities will continue and expand as warranted.

---

**Spread/Facility** Chandlersville**Name** Connelly, Mike**Summary**

Activities this week included fabrication and welding, environmental training, building framework, roof, wall sections, welding, electrical and conduit work, flooring, support blocks, concrete work as weather allows, delivery and receipt of ancillary material and equipment, and the installation, maintenance, and inspection of appropriate ECD's.

**Next Week**

The above typical station construction activities will continue and expand as warranted.

---

**Spread/Facility** Hamilton CS**Name** Rhea, Richard**Summary**

Typical start up compressor station construction is occurring and will expand as weather permits. Pre-fab forms were moved in, excavations, anchor bolts, various electrical, compaction under compressor building, set up office trailers, mobilize cranes.

**Next Week**

Above listed typical station activities will continue and expand.

**Summary**

Work this week included concrete blocks under header, main door of compressor building, finish trim, main lighting and electrical work, finish backfill at tank farm area, low lines to blow down silencers, laying ESD lines, other typical station construction, installation and maintenance of appropriate ECD's, and environmental training. Spread A1 EI's routinely make compliance checks at the station, with no compliance issues noted.

**Next Week**

Above typical station activities will be ongoing and will include more delivery and receipt of ancillary equipment.

FERC Weekly Report

Compliance Tracking

Spread/ Facility	Date	Report ID	Reported By	MP	Type	Summary	Corrective Action	Cost
<hr/>								
<hr/>								
Noncompliance								
Resolved								
A1	1/8/2009	DMcPherson01 0809	Daryl McPherson	CM	45.4	Failure to Adhere to Plan/Procedures	Concrete weight coating of pipe occurred in a waterbody zone prior to a variance being submitted and approved.	No resources were threatened or impacted. Crews clean-up operations area where coating had been completed. Resolved with meeting with contractor regarding proper procedural protocol. Resolved.
A2	1/9/2009	A203-39822-2	Dewey Knuckles	EI	85.28	Failure to Adhere to Plan/Procedures	NCR written against AIMA for dewatering volume that created a 2 ft. X 150 ft. deep erosion rut in agricultural land. It is noted that there was 4 inches of rain over the holiday break, leading to heavy saturation and inundation conditions. Overload of drain tile and berms caused an overflow that eroded from tile berm to the next tile inlet.	Activities were shut down and structure rebuilt. Crews were given tailgate on proper dewatering. ROW agent contacted LO for reimbursement; landowner wishes to fix the erosion himself. Area will be monitored through completion of repairs. Resolved.

Spread/ Facility	Date	Report ID	Reported By	MP	Type	Summary	Corrective Action	Cost
							No notifications were made. Crew contacted. Employee was dismissed from the project. Vehicle recovered. Resolved.	
E	1/8/2009	Jblackwell-010809	Jason Blackwell	CM	310	Off ROW Travel	Contractor's street sweeper was found parked off-ROW on a private lane by FERC Monitor. No damage or threat to property or resources.	
E	1/14/2009	E03-39827-1	Mike Edlin	EI	306.3	Failure to Adhere to Plan/Procedures	SPCC plan was not implemented for a 6 inch pump within 20 feet of a waterbody. Secondary containment was not utilized.	No discharge or spills/leaks occurred while pump was in use. Contractor admits mistake during management ERL conference call. Operations were halted and a containment structure was built within an hour. Retraining occurred the morning of 01/15/09 for the tie-in crew involved.  LEI was directed to expand the spread of a lessons-learned information release to all other tie-in crews on the project. Resolved.
F1	1/13/2009	Ssumpter-011309-1	Shonda Sumpter	CM	395	Failure to Adhere to Plan/Procedures	Improper dam and pump method was implemented that did not afford continuous downstream flows. Pump ran water through dewatering structure, then three bale filters, to discharge to ag land. Water then flowed over land and back into an upstream location.	Operations were shut down and the dam and pump system re-set to allow for continuous flow. LEI reports that this stream was not impacted and no sensitive species were threatened at any time. The LEI had 28 personnel crew, foreman, and the EI working the area attend environmental re-training on proper dam and pump mitigation methods and proper open cut installation methods. Resolved.

Spread/ Facility	Date	Report ID	Reported By	MP	Type	Summary	Corrective Action	Cost
F2	1/9/2009	Ssumpter-010909	Shonda Sumpster CM 399.9	Failure to Adhere to Plan/Procedures	Dewatering	Lack of sediment barriers across full ROW at flowing stream. An intermittent stream began flowing after rain/snow events and monitor located stream banks with no barriers.	There was no Off-ROW discharge associated with this NCR. Contractor responded after notification and used sediment logs as barriers. Crew was given tailgate by EIS to ensure timely response if streams begin to flow. Resolved.	
F1	1/9/2009	Ssumpter-010909	Shonda Sumpster CM 404.8	Failure to Adhere to Plan/Procedures	Dewatering	FERC CM recorded an NCR where sediment-laden discharge was occurring from dewatering structure. CM report reflects that an EI re-set a straw bale in the dewatering structure and the flow began to immediately flow cleaner.	This dewatering NCR was resolved with resetting the bale at the structure. However, the LEI wishes to protest this NCR, as they did not feel that maintenance needed to a dewatering structure warranted an NCR; and further, the staff related that no discharge occurred.	

Resolved - Protest

F1 1/9/2009 Ssumpter-010909

**Corrective Action**

**Cost**

Spread/ Facility	Date	Report ID	Reported By	MP	Type	Summary
F1	1/13/2009	Ssumpter-011309-2	Shonda Sampier CM	397	Failure to Adhere to Plan/Procedures	ECD's had not been put in place across ROW at a waterbody, allowing ROW spoil to enter WB, waterbody ID and refueling restriction zone signs were missing.

LEI relates that CM made contact about the NCR at 1330 hrs regarding this as a problem area, leaving 24 hours to make repairs once contractor was notified. CM never advised LEI that this would be an NCR. All ECD's were in place before the LEI even received the NCR notice in email from REX reporting Coordinator, which was prior to 24 hours expiring. The WB in question was a minor pooling of non-flowing water surrounded by grassy vegetative area where there had been no close ground disturbance to create a contractor-generated discharge. Straw logs were put in place to resolve any question of threat. LEI protests this NCR. Also noted is that zero impact to any resources occurred due to missing signs that needed maintenance.

**Problem Area**

**Resolved**

Problem Area	Resolved	Report ID	Reported By	MP	Type	Summary
A1	1/12/2009	A102-39825-2	Dennis Strong	EI	42.8	Spill

A truck that had been off-loaded from a barge onto Blackburn Island was on a wetland mat when a board broke and punctured the diesel fuel tank. Crews immediately responded to the clean up. Truck was removed from the island and has been repaired. Clean up materials were removed and taken to the Bowling Green contractor yard for containment disposal. Residual residue on the mat planking was vaporized using a hand bottle/torch, with no other damage or threat to resources. Cleaned up and resolved.

Spread/ Facility	Date	Report ID	Reported By	MP	Type	Summary	Corrective Action	Cost
F1	1/6/2009	F108-39819-2	Herbert Register	EI	380.0	Other	Silt fence segregating topsoil and subsoil piles was effective as deployed. However, recent inundation rains caused soil saturation and created heavy conditions that knocked out the silt fence. Topsoil and subsoil are beginning to mix and crews do not have access due to conditions, to bring in equipment to make repairs.	Follow-up report F108-39822-2 reflects crews accessed area on foot and remedied the situation by replacing some fence and shovelling soils away from each other. Resolved.

**Variance Tracking**

Spread	Variance ID	MP/ Location	Level	Date Submitted	Date Approved / Denied	Description	Justification	Status	Stipulations
A1	CM-A1-002	42.7	Level 2	1/8/2009	1/8/2009	Request a variance to employ a directional drilling rig and supporting equipment at the exit side of the Mississippi River HDD.	The additional drill rig will enhance the safety and efficiency of the directional drill. The additional rig results in easier handling of the drill stem and assists in the reaming passes. The use of an assisting rig is a standard industry practice.	Approved	1. Per L. Turner, notify Levee Board of drill rig placement. 2. Take noise measurements prior to equipment operation and during full operation. If noise levels exceed 55db or a change of 9db at the nearest NSA, employ noise mitigation measures.

<b>Spread Variance ID</b>	<b>MP/ Location</b>	<b>Level</b>	<b>Date Submitted</b>	<b>Date Approved / Denied</b>	<b>Description</b>	<b>Justification</b>	<b>Status</b>	<b>Stipulations</b>
A1	WS-A1-011	44.4	Level 2	1/12/2009	Request an additional 50 feet of ATWS along the north edge of the r/w between the above-referenced mileposts.	Due to the ground conditions and the extra depth required to install the pipe here, the currently allotted 75-ft right-of-way is insufficient to work safely. The soils in this area are saturated wetland/floodplain soils and the water table is very high. In addition, there is an approximately 50 foot wide flowing waterbody directly adjacent to the wetland. The extra depth is being required by the Sny Levee Drainage District, which has jurisdiction over this waterbody. In addition to the required 6 feet of cover, they specify 6 inches of concrete coating around the entire pipe amounting to an additional foot.	Pending FERC	
A2	PM-A2-067	143.91	Level 1	1/12/2009	Three (3) dewatering structures have been placed on IL-CS-075,000 off of the right-of-way between WB-IL-142-A and County Road 22. Welded Construction, L.P. requests variance to go off right-of-way to remove these dewatering structures during restoration.	Dewatering structures were placed off the right-of-way in a well vegetated area to maximize workspace. Removal is required per final restoration.	Approved	Land Agent's signature indicates Land Owner's approval.

<b>Spread Variance ID</b>	<b>MP/ Location</b>	<b>Level</b>	<b>Date Submitted</b>	<b>Description</b>	<b>Justification</b>	<b>Status</b>	<b>Stipulations</b>
A2	WS-A2-066	71.68	Level 1	1/9/2009 Welded Construction, L.P. requests variance to place dewatering structures as needed, off the REX East right-of-way, south of the right-of-way between Moiezuma and Hillview Roads. FERC Monitor and Environmental Inspection will be consulted prior to the placement of any dewatering structures. Land Agent signature indicates Land Owners' approval. PEPL signature indicates PEPL approval. Welded will use rubber tired ATVs to access de-watering structure locations.	The above location consists of a high water table and standing water throughout the right-of-way. Approximately 1500 bag weights will be used in this area, requiring a wide ditch. A dry, as possible, ditch is necessary for safe construction of REX East Pipeline.	Approved	Equip./wheeled traffic to stay on grassy strip. Foot traffic on field area.

<b>Spread</b>	<b>Variance ID</b>	<b>MP/ Location</b>	<b>Level</b>	<b>Date Submitted</b>	<b>Date Approved / Denied</b>	<b>Description</b>	<b>Justification</b>	<b>Status</b>	<b>Stipulations</b>
D	MM-D-010	291.5	Level 2	1/8/2009	1/14/2009	"Contractors have requested an additional water discharge location for hydrostatic testing of pipeline facilities. All discharge location is to upland area with no discharge to surface waters.	Variation in construction sequence have resulted in new hydrostatic test segment location. No Indiana permit is required for upland discharge. Section pipe that is being tested is 42" O.D. x .888 WT	Approved	

This is a modification to the

Hydrostatic test plan previously submitted as part of the Rockies Express Implantation Plan in accordance with Condition #19.  Please see attached alignment sheet for discharge locations as well as noted sections that is being tested. Co Alliance water works is a prior approved water source that will be used for testing."

F1	WS-F1-032 Rev 3	380.56	Level 2	12/19/2008	Price Gregory International, Inc. request 30 ft. of extra work space from Sta. 20093+83 to Sta. 20097+83 for approximately 400 ft. on the south side of the right of way for spoil storage.	This additional WS is required due to side hill slope on the ROW, where the trench line is on the low side of the ROW. All additional spoil will be placed in this WS. Tree clearing will be required. Sixteen percent of the trees in this WS are equal to or greater than 8-inched in diameter. These trees will be removed and with the landowners request, placed off ROW. This area is in a bat habitat. This WS is not in AG land. Resources are protected using all REX environmental procedural guidelines.	Approved
F1	WS-F1-041 Rev 2	383.04	Level 2	1/5/2008	Price Gregory International, Inc. request 50 ft. of extra work space from Sta. 20224+68 to Sta. 20226+68 for approximately 200 ft. on the south side of the right of way for spoil storage.	Due to the undulating topography of the ROW, additional topsoil storage is requested. In addition this area will be utilized for spoil storage from WB-N-FR-383.4B. The spoil will be relayed back to the requested WS from the noted WB. All REX environmental guidelines will be followed. No trees will equal to or greater than 8-inches in diameter will be cut. This area is in agricultural land. This area is within the bat habitat. However, there are no trees at this location.	Approved

F1 WS-F1-059 Rev 1	379.16	Level 2	12/19/2008	1/8/2009 Price Gregory International, Inc. request 100 ft. additional extra work space from Sta. 20019+50 to Sta. 20021+97 for approximately 247 ft. on the south side of the right of way for spoil storage.	This extra WS is required since the trenchline is on the low end of a sidehill cut. This ATWS will be used to store the material that will be cut from the ROW to meet grade. Tree clearing will be required. Thirty percent of the trees in this WS are equal to or greater than 8-inches in diameter. These trees will be removed and placed off ROW. This area is in a bat habitat. This WS is not in AG land. Resources are protected using all REX environmental procedural guidelines.	Approved	
F1 WS-F1-060 Rev 1	379.4	Level 2	1/2/2009	1/9/2009 Price Gregory International, Inc. request 65 ft. additional extra work space from Sta. 20032+52 to Sta. 20033+52 for approximately 100 ft. on the south side of the right of way for spoil storage.	This additional workspace is required due to the trench line location on the low side of the ROW which will require additional cut. The ROW grade will move all overburden material to this workspace for storage. Tree clearing will be required. Sixteen percent of the trees in this WS are equal to or greater than 8-inches in diameter. These trees will be removed and placed off ROW. This area is in a bat habitat. This WS is not in AG land. Resources are protected using all REX environmental procedural guidelines.	Approved

F1	WS-F1-061 Rev 1	380.23	Level 2	12/19/2008	1/14/2009 Price Gregory International, Inc. request 75 ft. additional of extra work space from Sta. 20076+15 to Sta. 20077+27 for approximately 112 ft. on the north side of the right of way for spoil storage.	This requested WS will be utilized for the storage of spoil removed from the west bank of WB-IN-380-4A. Tree clearing will be required. Ten percent of the trees in this WS are equal to or greater than 8-inches in diameter. These trees will be removed and with the landowners request, placed off ROW. This area is not in AG land. This area is in a bat habitat. Resources are protected using all REX environmental procedural guidelines.	Approved	Maintain at least 50' buffer from waterbodies WB-IN-380-4A and WB-IN-380-CCCC as they are located on the north side of the ROW.
F1	WS-F1-062	380.08	Level 2	1/12/2009	1/14/2009 Price Gregory International, Inc. request of extra work space of 35' on the east end at STA 20070+68 going in an western direction for 268 ft and ending at STA: 20068+00 at the corner of the ATWS on the south side.	Due to the undulating terrain the use of this extra work space will allow the right of way to be constructed in a manner that will provide a safe work area for the project. This area is not in AG land. Tree cutting will not be required. This is in bat habitat. Resources are protected using all REX environmental procedural guidelines.	Approved

F1	WS-FI-063 Rev 1	381.93	Level 2	1/13/2009	Price Gregory International, Inc. request 50 ft. additional of extra work space from Sta. 20166+14 to Sta. 20168+14 for 200 ft. on the north side of the right of way for spoil and top soil storage.	The use of this extra work space will allow the abundance of spoil from the pipe trench that will be removed in the excavation of Salt Creek to be stored in an area where the topsoil will be protected for the project. The spoil from excavating Salt Creek will be placed in this area for storage until the pipe has been installed in the crossing. All guidelines will be followed with a 50 ft. set back from the waterbody and all ECD's will be put in place including silt fence as a barrier between the ATWS and the waterbody.	Approved
F1	WS-FI-072	389.19	Level 2	1/9/2009	Price Gregory International, Inc. request 50 ft. additional extra work space from Sta. 20549+00 to Sta. 20550-85 for 185 ft. on the south side of the right of way for spoil storage.	This additional WS is required as a result of slope and grade, a measured twenty three percent slope requiring an area for additional spoil storage. Tree clearing will be required. A little more than one-third of the trees in this WS are equal to or greater than 3-inches in diameter. These trees will be removed and with the landowners request, placed off ROW. This area is in a bat habitat. This WS is not in AG land. Resources are protected using all REX environmental procedural guidelines.	Pending FERC

F2	WS-F2-012	416.08	Level 2	1/10/2009	1/14/2009 Gregory & Cook Construction is requesting 1.86 acres of additional temporary workspace (ATWS). The ATWS is located on both sides of the CSX Railroad between Station No. 21968+81 and Station No. 21978+98.	The approved ROW is approximately 20 feet higher than the CSX Railroad. A significant amount of spoil will have to be removed on both sides of the CSX Railroad in order to provide a safe work area for the crew performing the bore. The existing approved ATWS's are not adequate to store the volume of spoil that will be generated, and allow for it to be placed a safe distance away from the bore pits.	Approved	
G	AR-G-001	450.94	Level 2	1/7/2009	1/8/2009 Gregory & Cook Construction is requesting a reroute of the temporary access road across Tract No. OH-WA-063.000. The AR is approximately 1508' x 40'.	The proposed reroute of the access road reflects what was purchased from and agreed to by the landowner.	Approved	
H	WS-H-001	509.7	Level 2	1/10/2009	1/12/2008 Gregory & Cook Construction is requesting 1.9 acres of additional temporary workspace (ATWS) adjacent to the temporary access road into the Big Darby Creek HDD entrance pad.	The temporary access road off of Darby Road is located close to a curve. There are also private drives located across from the temporary access road entrance. The ATWS will provide an area for tractor trailer rigs to pull in off of Darby Road, and then turn around prior to turning back onto Darby Road. The use of this ATWS will allow for safer traffic flow through this area. The ATWS will be matted to limit disturbance to the area.	Approved

FERC Weekly Report

**Landowner Complaint Resolution**

Date	Mile Post	Tract	Description	Resolution	Status
9/22/2008	201.24	IL-DG-083.000.1	LO is asking for 7' depth of cover. REX told him 1' below any tile plan he has. LO drew a line on exhibit A and declared it a tile plan. REX asked him to provide a tile plan from a tile installer to verify the depth the tile would be placed so the drainage system would operate to the capacity necessary.	REX attorneys are in negotiations with LO attorneys to find a resolution to this issue.  01/14/09 update: No new information received from R.O.W. office.	Pending.
12/31/2008	566.3	OH-MK-003.00	LO complained that surveyors left property in an unacceptable condition.	Agent has left voice mail for landowner but has not made contact yet.  No new informational updates as of 01/14/09.	Pending.
