> RE: DP&L ESP Filing, Case No. 08-1094-EL-SSO

Dear Ms. Jenkins:

Enclosed are deposition transcripts of Shelley J. Dickstein and Mark R. Frye, for filing in the above-captioned matter. These depositions were recently received by DP&L, and are being filed pursuant to DP&L's Notice of Filing Depositions, which was filed on February 6. 2009.

Very truly yours,

R Haltyman Hedrich

A. No. Q. Who are — If you had to list your largest four or five clients in the state over the last five years, who would those be? A. Probably the Northwest Ohio Aggregation Coalition, or NOAC, which is the governmental aggregation in Northwestern Ohio, Cleveland Schools, 10 Toledo Public Schools, the Northeast Ohio Public 11 Cenergy Counsel, or NOPEC. Q. Is the bulk of your work testifying or consulting? A. Consulting. A. Consulting. A. Consulting. A. Consulting. G. Have you done any consulting work askde for me testimonial-related work, for either Honda or Cargill? A. No. Q. Who have you done the most consulting work for in the last few years? A. Define "most." Monetarily or time-wise? A. Define "most." Monetarily or time-wise? A. Define "most." Monetarily or time-wise? A. No.Q. Che Northwest Ohio Aggregation Coalition. A. No. A. A. Five. C. A. No. A. Che, the Northwest Ohio Aggregation Coalition. A. Five. C. A. A. Five. C. A. A. Five. A. I generally reviewed the entire case that was put forward by DPAL, reviewed responses to questions, various information on the market. I reviewed the — briefly reviewed the entire case that was put forward by DPAL, reviewed responses to Questions, various information on the market. I reviewed the — briefly reviewed the annual report and some financial data on the DPAL website. Cleviously I reviewed 221 — Senate Bill A. Yes, I did. A. Yes, I did. A. Yes, I did. C. Which other ones? A. I nerve what you meant. A. Five. A. I have you did but with the court reporter I wanted to make sure it was clear. Let's see, those are the things that come to mind. The probably reviewed other things as well but I can't recall anything else off the top of my head. Q. Did you offer testimony in other utilities' ESP cases? A. In the both First Energy SP case it was on behalf the NOAC, Northwest Ohio Aggregation Coakiton, and NOPEC. And on the case of AEP, that was on behalf of the school |

| | Page 8 | | | Page 11 |
|----------|---|--------------|--|---------|
| 1 | Q. And on whose behalf was that testimony | 1 | A. Depends on the circumstances. They could | |
| 3 | offered? A. That was also on behalf of NOAC and | 3 | do either one depending on the individual set of circumstances. | |
| 4 | NOPEC. | 1 4 | Q. In what circumstances do you believe that | |
| 5 | Q. Have you ever offered testimony | 5 | a deferral would promote rate stability? | |
| 6 | previously in any DP&L case of any kind? | 6 | A. If the deferral term was long enough and | |
| 7 | A. No, I have not. | 7 | the impact on the customers was going to be | |
| 8 | Q. Did you review DP&L's ETP stipulation or | 8 | substantial enough, in that light there may be stability promoted. | |
| 10 | the Commission's order approving that stipulation? A. No, I did not. | 10 | Q. And when you said that the impact was | |
| 11 | Q. Dld you review DP&L's 2003 RSP | 111 | significant enough, my words paraphrasing what you | |
| 12 | stipulation from the 2002 case or the Commission's | 12 | had said, what do you mean by that? | |
| 13 | order approving that stipulation? | 13 | A. What percentage increase the customers | |
| 14 | A. No, I did not. | 14 | would otherwise see. | |
| 15 16 | Q. Did you review DP&L's 2005 RSP stipulation or the Commission's order approving that | 15 | Q. And at what point would that criterion be triggered in your mind? | |
| 17 | stipulation? | 17 | A. I don't know, it's not that simple a | |
| 18 | A. Yes, I did. | 18 | thought process. Because you need to evaluate not | |
| 19 | Q. What did you do to become familiar with | 19 | just what the impact of the increase is, you have to | |
| 20 | Honda's business to prepare your testimony in this | 20 | also look at the costs of those increases over the | |
| 21 | Case? | 21 | long term and how they're collected later. | |
| 22 23 | A. I spoke with counsel about generally what Honda consumed and various formats held, what level | 22 23 | Q. You said earlier that deferrals may sometimes undermine rate stability. In what | |
| 24 | of voltage did they consume the electricity at from | 24 | circumstances do you believe deferrals undermine rate | |
| 25 | the DP&L system. And spoke with them about generally | 25 | stability? | |
| | | ╁ | · | |
| | Page 9 | | | Page 12 |
| 1 | about consumption, demand, things like that. | 1 | A. Deferrals can undermine rate stability | |
| 2 | MR, PETRICOFF: 1 will interpose an objection here at this time. I will not object to or | 2 3 | when you have a structure that creates a substantial impact in later years on consumers' costs and | |
| 3 4 | move to strike this answer, but we are in the area | 4 | effectively you're borrowing short-term cost control | |
| 5 | now we're getting close to attorney/client privilege | 5 | for longer term problems. | |
| 6 | or work product, and Mr. Frye is retained by me, not | 6 | Q. So rate stability trying to understand | |
| 7 | Honda. | 7 | your answer here. | |
| 8 | MR. SHARKEY: Are you asserting that | 8 | Deferrals undermine rate stability when | |
| 9 10 | communications let me step back. MR. PETRICOFF: The answer he just gave | 10 | there is a subsequent recovery that results in a substantial short-term increase? | |
| 11 | is that he had talked to me. And I think I'm not | 111 | A. It can. | |
| 12 | going to object to that, but I wanted to indicate | 12 | Q. Are there other circumstances in which a | |
| 13 | that we are drawing the line here and if we went | 13 | deferral could undermine rate stability? | |
| 14 | further into what did counsel tell you, what kind of | 14 | A. Sure. To the extent that it would | |
| 15 16 | information that you got, what did you discuss, that would probably cross the line. | 15 16 | depend on who it applies to. For instance as I mentioned in my testimony, that the deferral applies | |
| 17 | MR. SHARKEY: I'm not sure that it would, | 17 | to all customers and those charges for somebody who's | |
| 18 | since he's a testifying witness and I don't believe | 18 | shopping, like Cargill and Honda, and acquiring their | |
| 19 | he's your client. | 19 | third-party supply, if those customers were paying | |
| 20 | MR. PETRICOFF: It's attorney/client | 20 | those charges today and then would have to pay | |
| 21 22 | privilege for work preparation. But let's continue on because let's see what the next question is. | 21 22 | somebody else's charges in the future, that would undermine their rate stability. | |
| 23 | MR. SHARKEY: It may not matter. | 23 | Q. So you're saying if it's a fuel deferral | |
| 24 | BY MR, SHARKEY: | 24 | as DP&L has proposed, it's your opinion that it | |
| 25 | Q. What did you do to prepare for your | 25 | should be avoidable when it's to be recovered later? | |
| | | | | |
| | Page 10 | | | Page 13 |
| 1 | testimony here on behalf of Cargill? | 1 | A. I think my testimony says that if a | |
| 2 3 | A, I spoke with counsel and one representative of Carqill in regards to similar | 3 | customer is shopping, if there's a third-party | |
| 3 4 | representative of Cargiii in regards to similar matters; voltage levels, what they produce at the | 3 4 | supplier who is serving that customer and they are being billed for that consumption, that fuel is going | |
| 5 | various (acilities, the locations of the facilities | 5 | into the input of the plants or what have you, then | |
| 6 | and the like in the DP&L service territory. | 6 | the net result is they're consuming that fuel today, | |
| 7 | Q. Do you have a copy of your testimony in | 7 | they are not consuming fuel that's generating the | |
| 8 | front of you? | 8 | power to go to non-shopping customers. | |
| 9 10 | A. I do. Q. Can you turn please to page 6, line 11. | 9 10 | Q. Is it your understanding that Honda and Cargill are currently shopping customers and don't | |
| 11 | There's a sentence there it says there are times when | 11 | take generation service from the Dayton Power and | |
| 12 | rate stability may be so critical that the problems | 12 | Light Company? | |
| 13 | deferrals create are outweighed by the need to phase | 13 | A. It's my understanding that they accept | |
| 14 | in cost. | 14 | third-party supply. | |
| 15 16 | Can you tell me what that means? A. In my opinion that means that power | 15 16 | Q. And is it your understanding that they will be accepting third-party supply in 2009 and | |
| 17 | prices and fuel costs can be high enough that the | 17 | 2010, barring some unforeseen circumstance default by | |
| 18 | impact on customers the incremental increase if | 18 | a supplier or otherwise? | |
| 19 | there were not deferrals would be sufficient to cross | 19 | A. That's my understanding, yes. | |
| 20 | a threshold of a percentage increase that consumers | 20 | Q. For customers that take generation | |
| 21 22 | would not be comfortable with and the Commission would not be comfortable in instituting, and in that | 21 22 | service from the Dayton Power and Light Company in | |
| 23 | light they may choose to institute deferrals. | 23 | 2009 and 2010, do you have an opinion regarding whether they should pay the deferral, assuming it's | |
| 24 | Q. Do you consider deferrals to promote rate | 24 | granted, starting in 2011 if they were to switch in | |
| 25 | stability or to undermine rate stability? | 25 | 2011 to an alternative supplier? | |
| | | | | |

| _ | | | | | |
|--|--|-------|---|---|----------|
| 1 2 3 4 5 6 7 8 9 10 11 12 13 14 15 16 17 18 19 20 21 22 23 24 25 | A. Could you repeat that question please? Q. Yeah, the idea is customers taking generation service from the Dayton Power and Light Company in 2009 and 2010, but as the fuel costs' deferred, 2011 they switch to a CRES provider, the Dayton Power and Light Company is now seeking to recover its costs from 2009 and 2010, the question is do you have an opinion as to whether or not such a customer should be required to pay the deferral or not? A. To the extent that the Commission would grant the deferral and the customer under the circumstances you've provided accepted standard service offer supply, if the Commission granted a deferral to the company and the customer shopped in 2011, then yes, they should be obligated to repay those charges. Q. You said earlier that you reviewed Senate Bill 221. Do you remember which sections of Senate Bill 221 that you reviewed? A. The entire thing. Q. I'm going to show you a copy of 4928.143? A. Are you asking me to review the entire section, Mr. Sharkey, or are you going to point out a section to me? | ge 14 | 1 2 3 4 5 5 6 7 8 8 9 10 11 12 13 14 15 16 17 18 19 20 21 22 23 24 25 | statute was enacted had incurred any significant increases in costs to provide standard service offer? A. Could you repeat the question again please? Q. Setting aside fuel costs. A. Okay. Q. The question is, are you aware whether the Dayton Power and Light Company has incurred significant increases in any other cost item that the DP&L needs to provide standard service offer to its customers between 2005 and a time Senate Bill 221 was enacted? A. I'm aware that DP&L has made various statements in the application that they have incurred other charges. As to whether those — to the extent those are significant, I don't know whether they are significant, but I know — it's my understanding that DP&L has asked for charges due to the what I think you could characterize or DP&L characterized as significant increases. Q. What other cost items are you referring to? A. There was commentary about various other components that would go into power plants, | Page 17 |
| _ | Pag | e 15 | j _ | | Page 18 |
| 1 2 3 4 4 5 6 7 8 9 10 11 12 13 14 15 16 17 18 19 20 21 22 23 24 25 | Q. Everybody in the room will be glad to know that I'm not going to ask you to review all of 4928.143. I would like to turn your attention to 4928.143(D), which is on page 3 of the document that I've handed to you. Q. Are you familiar with the subsection to which I've pointed to? A. Yes, I am. Q. That subsection provides that it applies, and I'm reading from the end of the first line, to "electric distribution utility that has a rate plan that extends beyond December 31, 2008." MR. SMITH: Mr. Sharkey, can we stipulate that Mr. Frye Is not a lawyer? MR. SHARKEY: We can certainly stipulate that he's not a lawyer. And I intend to ask him a factual question, I'm not going to ask him to interpret that section. Q. The factual question to you is are you aware of any electric distribution utility in Ohlo other than the Dayton Power and Light Company that had an electric distribution rate plan that extended beyond December 31, 2008 at the time this section was enacted? | | 1 2 3 4 5 6 7 8 9 10 11 12 13 14 15 16 17 18 19 20 21 22 23 24 25 | limestone, urea, various other components that would be included in an operation of coal-fired power plant. Q. And you understand the Dayton Power and Light Company considers those to be fuel-related costs? A. Generally, Q. Do you agree with or disagree with that characterization? A. They are related to generating the electricity in the facilities that Dayton Power and Light owns. Q. Any other cost increases of which you are aware subject to the description of the prior question? A. My recollection is that the company's application also mentioned increases in purchased power costs as well. Q. Anything else? A. Not in regards to generation service. Q. Are you aware of any increases the Dayton Power and Light Company has incurred as to transmission or distribution service? A. I don't recall anything in the application regarding transmission. I do recall | . 350 10 |
| - | | | | | |
| 1 2 3 4 4 5 6 6 7 8 9 10 11 12 13 14 15 16 17 18 19 20 21 22 22 22 22 22 22 25 | A. No, I'm not. Q. You would agree with me that at the time this was enacted, DP&t. did in fact have such a rate plan. A. It's my understanding that is a fact. Q. And would you agree with me that the Dayton Power and Light Company will incur fuel costs to provide a standard service offer to its customers? A. Directly or indirectly it would incur fuel costs to standard service offer customers. Q. When you say "directly," for the plants that it owns or partially owns it's going to have to acquire coal or natural gas or other items to fuel those plants, correct? A. Correct. Q. And when you say "indirectly," to the extent the Dayton Power and Light Company needs to make purchases in the market to supply its standard service offer customers, there's going to be some cost component presumably in that amount that would cover fuel from whoever the seller is. A. Correct. Q. Other than fuel costs, set those aside for a moment, are you aware whether the Dayton Power and Light Company from 2005 until the date this | e 16 | 1 2 3 4 5 6 7 8 9 10 11 12 13 14 15 16 17 18 19 20 21 22 22 23 24 25 | various expenditures that were mentioned in the application regarding distribution. Q. Are you referring to the expenditures the Dayton Power and Light Company states that it will incur to comply with the alternative energy and renewable energy targets in Senate Bill 221? A. Will incur or have already incurred I believe. The application mentions that some of that work was already underway. Q. As to DP&L's request for a fuel deferral, were there any factors or matters that you considered and then but are not addressed in your testimony? A. Not that I can think of, no. Q. If you could turn your testimony to page 4. A. Page 4 you said? Q. Please. There's a question on line 21, your answer begins on line 23, and in that testimony — in that answer rather, you discuss DP&L's costs comparing a 2007 number of 2 cents to a 1.64 cents figure for 2008, both figures being based on nine moths. Do you see that? A. I do. Q. And my question to you is, do you know | Page 19 |

| | | | _ | | |
|----------|--|-----|----------|---|-------------|
| | Page | 20 | | and the same of the labels of the same of | Page 23 |
| 1 2 | whether DP&L's coal strike that whether DP&L's fuel costs have Increased since 2005? | | 1 2 | attachment, it's labeled appendix A. A. Uh-huh. | |
| 3 | A. I've not reviewed any data that would | | 3 | Q. And if what if I understand this | |
| 4 | Indicate that it has or hasn't. | | 4 | correctly, you show here the financial affect of a | |
| 5 | Q. In making this cost comparison did you | | 5 | hypothetical annual deferral of \$10 million in 2009 | |
| 6 | look only at DP&L's costs for the first nine months | | 6 | and an additional \$10 million deferral in 2010, | |
| 7 | in 2007 and compare it to DP&L's costs for the first | | 7 | correct? | |
| 8 9 | nine months in 2008? A. Could you repeat that question again | | 8 | A. Correct. And if I understood your testimony | |
| 10 | please? | | 10 | correctly, to calculate the amounts shown on | |
| 11 | Q. Let me rephrase it. Poorly worded. | | 11 | appendix A, you started with the Dayton Power and | |
| 12 | Did you make any other comparisons of | | 12 | Light Company's 13.32 percent carrying charge, gross | |
| 13 | DP&L's costs in other periods? For example, dld you | i | 13 | that amount up for taxes, and then perform these | |
| 14 | look at DP&L's fuel costs for the first nine months | | 14 | calculations resulting in the \$52 million total | |
| 15 16 | in 2006 or 2005? A. No, I did not. | | 15 16 | recovery; is that correct? A. That's correct, | |
| 17 | Q. So your opinion relating to whether the | 1 | 17 | Q. And I believe in your testimony you opine | |
| 18 | Dayton Power and Light Company has experienced a | | 18 | that if DP&L is to defer fuel costs, it should be at | |
| 19 | large increase in fuel costs is limited to a | | 19 | a carrying cost of 9.36 percent; is that right? | |
| 20 | comparison of what happened to DP&L's fuel costs for | | 20 | A. My recollection of the testimony is that | |
| 21 | the first nine months in 2007 to DP&L's fuel costs | | 21 | I took the position that DP&L should be consistent | |
| 22 23 | for the first nine months in 2008? A. No, I wouldn't characterize it that way. | | 22 | with its carrying costs. Q. Can you explain what you mean by that? | |
| 24 | O. How would you characterize it? | | 24 | A. Well, in the IIR it's my recollection or | |
| 25 | A. That sentence merely is intended to point | - (| 25 | understanding of the application that DP&L is going | |
| | | - | | | |
| | Page | 21 | | An annual limit at the limit of the control of the | Page 24 |
| 1 | out that DP&L in its application discusses large | J | 1 | to overcollect at the beginning of the collection | |
| 3 | increases in fuel costs, and it's my understanding in the application they aren't asking for an increase | Ì | 2 3 | period and then undercollect later, and that it was providing interest or providing value through that | |
| 4 | for 2008, they're asking for increases in 2009 and | ļ | 4 | 9.32 percent carrying charge and grossing up those | |
| 5 | 2010 for fuel costs. | Ì | 5 | collections for later. | |
| 6 | What that is intended to point out is | Ţ | 6 | It seems to me that if they're going to | |
| 7 | that from 2007 to 2008 during those two nine month | ı | 7 | provide consumers 9.32 percent benefit for | |
| 8 | snapshot periods that fuel costs had actually | Į | 8 | overcollection, then they should be consistent with | |
| 9 10 | decreased in DP&L and not risen and that, generally speaking, as I go on to discuss later on in my | | 10 | that when they were asking for carrying charges on any deferral that might be granted by the Commission. | |
| 11 | testimony, that fuel costs in general, natural gas | ľ | 11 | Q. So the record's clear, you said | |
| 12 | costs, and other commodity costs, have actually | | 12 | 9.32 percent? | |
| 13 | declined in general over the last 12 months rather | l | 13 | A. I believe that's what it was. That's my | |
| 14 | than risen. | - 1 | 14 | recollection. | |
| 15 16 | Q. Why didn't you look at DP&L's 2005 fuel costs? | ļ | 15 16 | Q. Your testimony says 9.36 percent. A. My apologies, my recollection was subject | |
| 17 | A. I didn't review 2005 fuel costs because | | 17 | to check. I'm sure that my testimony is accurate, | |
| 18 | this is about 2009 and 2010, not about 2005. | I | 18 | 9.36 percent, | |
| 19 | Q. Did you consider it relevant to whether | | 19 | Q. So you would if the Dayton Power and | |
| 20 | DP&L has experienced a long-term trend of increasing | | 20 | Light Company were to propose the deferral at a | |
| 21 | fuel costs? | ı | 21 | 9.36 percent carrying cost, what conclusion would | |
| 22 23 | A. In reviewing the application it was clear to me that the stipulation that DP&L entered into in | ı | 22 23 | that lead you to? A. That the request would at least be | |
| 24 | 2005 I believe in the RSP case indicated that it | l | 24 | consistent with what they were providing consumers on | |
| 25 | already anticipated fuel cost increases in 2009 and | l | 25 | the IIR carrying cost. | |
| | | | | | |
| | Page | 22 | | | Page 25 |
| 1 | 2010 and understood that going into that stipulation | Į | 1 | Q. In that circumstance you would not object | |
| 2 | at that point in time they knew that trend was coming. | [| 2 | to strike that. Your testimony doesn't cover | |
| 4 | Q. The question to you is did you consider | ļ | 4 | appropriate strike that again. | |
| 5 | whether the Dayton Power and Light Company had | [| 5 | Your testimony does not address whether a | |
| 6 | experienced a long-term trend in fuel costs above the | (| 6 | 9.36 cents is or is not an appropriate carrying cost, | |
| 7 | fuel costs DP&L experienced in 2005? | - 1 | 7 | correct? | |
| 8 | A. No, 1 did not consider that. | ļ | 8 | A. My testimony doesn't discuss whether | |
| 9 10 | Q. Have you made any effort to determine the amount of fuel cost recovery that is included in the | - 1 | 9 10 | 9.36 percent is an appropriate carrying cost. O. So if the Dayton Power and Light Company | |
| 11 | Dayton Power and Light Company's current rates? | 1 | 11 | proposed to defer fuel costs at the 9.36 cents, you | |
| 12 | A. It's my understanding that currently | | 12 | would not object to the least carrying cost that it | |
| 13 | there are two fuel-related charges or partially | - 1 | 13 | was using, correct? | |
| 14 | related charges totaling, according to the | - 1 | 14 | A. Not correct. | |
| 15 | application, about 1.8 cents, although one/half of | } | 15 | Q. Can you explain? | |
| 16 17 | one cent per kilowatt hour of that is the RSS charge and part of that is fuel related and part of that is | | 16 17 | A. Sure. In reviewing the testimony, it's still unclear to me what Dayton Power and Light is | |
| 18 | POLR related — provider of last resort related, | | 18 | going to request or project in fuel cost recovery. | |
| 19 | excuse me. | | 19 | So to the extent that at least in my | |
| 20 | Q. Everybody reading this testimony will | - 1 | 20 | opinion I don't believe that deferrals are beneficial | |
| 21 | know what POLR is. | - 1 | 21 | over the long term for customers at all to the extent | |
| 22 | A. I understand. | 1 | 22 | that the Commission elected or determined in their | |
| 23 24 | Q. For the court reporter it's P-O-L-R. If you could turn to the appendix to your | ļ | 23 24 | minds that it was appropriate to have such carrying costs, then a consistent carrying cost between DP&L's | |
| | | - { | 25 | deferrals and any overcollections should be applied. | |
| | testimony, I want to discuss with you the first | | | | |

| 1 2 | Page 2 Q. Do you know whether DP&L's 13.32 percent carrying charge had already been grossed up for | 6 | Q. If the Commission were to determine that there should be some recovery of fuel-related costs | Page 29 |
|----------|--|--------------|---|---------|
| 3 4 | taxes? A. It's my recollection from the application | | B for the Dayton Power and Light Company, do you | |
| 5 | that it had not been. Q. If I told you that it had been, would you | 5 | you recommend that the recovery should be by deferral | |
| 7 | agree that the numbers shown on your appendix A, in | 6 | 7 A. For what time period? | ı |
| 8 9 | particular the \$52 million, was overstated? A. Could you clarify the question please? | 1 8 | | |
| 10 11 | Q. Sure. If I told you that the Dayton Power and Light Company in fact Intended to use a | 10 | O question it would be as DP&L proposed deferring costs | |
| 12 | carrying cost of 9.32 percent and grossed that amount | 12 | recovering those costs over ten years. | |
| 13 14 | up for taxes to 13.32 percent, would you agree with me that the amounts shown on your appendix A, and in | 1.1 | would the deferral be? How much money are we talking | |
| 15 16 | particular the \$52 million figure, were overstated? A. With that stipulation, yes, I would agree | 15 | | |
| 17 18 | to that. Q. And from your testimony, page 5, line 14, | 17 | | |
| 19 | it appears that the total collection would drop | 19 | Q. As to the carrying charges let's assume | |
| 20 21 | 34 percent; is that correct? A. That's what the testimony says. | 20 21 | | |
| 22 23 | Q. In fact that's also shown on appendix A, isn't it? | 27 | | |
| 24 25 | A. Yes, It is. Q. On your testimony, page 7, line 11, you | 22 | A. And your base question is do I think that | |
| 23 | Q. On your testimony, page 7, line 11, you | +2 | S Should be deterred? | |
| 1 | Page 2 refer to deferring a distribution cost rather than a | 1 | Q. Or recovered in 2009-2010. | Page 30 |
| 2 | generation cost. | 1 2 | A. It should be recovered in 2009 and 2010. | |
| 3 | Can you tell me what it is that you've got in mind? What it is that you're describing in | 3 | | |
| 5 | that piece of testimony? A. Sure. A shopping customer by taking | 5 | <u> </u> | |
| 7 8 | power from a CRES supplier, C-R-E-S, a CRES supplier, is not obviously taking SSO service. | 7 8 | not increase rates to the point where I think that | |
| 9 | To the extent that the Commission elects | و إ | 9.36 percent plus federal tax gross up. | |
| 10 11 | to grant a deferral, and to the extent that the Commission decides that the deferral should be | 10 | | |
| 12 13 | non-bypassible for consumers, and to the extent that should be non-bypassible for consumers beginning in | 12 13 | | |
| 14 15 | 2011 as proposed in the application, then what this refers to is a potential structure that would | 14 | Q. Why not? | |
| 16 | maintain consistency for consumers who were shopping | 16 | enough incremental charge in order to make it worth | |
| 17 18 | or who were electing to take CRES supplier power supplies rather than SSO. | 17 18 | Q. At what point do you believe the | |
| 19 20 | And that would create a level playing field so that if there was going to be a credit or | 19 | |] |
| 21 22 | a deferral, excuse me, a deferral in 2009 and 2010, that that deferral would apply both to shopping | 21 22 | | \$ |
| 23 | customers and SSO supplied customers. | 23 | Q. Correct. | |
| 24 25 | This is supposed to be one potential mechanism that might be used to create the level | 24 25 | | |
| | Page 2 | - | | Page 31 |
| 1 2 | playing field for those customers electing to take CRES supplier status in 2009 and 2010. | 1 2 | | _ |
| 3 | Q. Do you have any particular distribution | 3 | A. Probably deferral may start | |
| 5 | costs in mind that would be deferred in circumstances you just described? | 5 | Q. Correct. | 1 |
| 6 7 | A. No, I do not. Q. Do you believe that the Dayton Power and | 5 7 | | l |
| 8 | Light Company's proposed deferral in this matter would promote rate stability? | 8 | that would create enough of a rate impact to in my |] |
| 10 | A. No. | 10 | appropriate at those kind of carrying charges. | 1 |
| 11 12 | Q. Why not? A. By creating a deferral today of an | 11 12 | (Off the record.) | 1 |
| 13 14 | unknown size and basically recovering it over ten years, what that does in my opinion is create an | 13 14 | | ľ |
| 15 16 | increased potential for a price spike in 2011 and impacting customers with greater instability in the | 15 16 | 05-276-EL-AIR case. | 1 |
| 17 | future. | 17 | you've read this document before? | - |
| 18 19 | To me price stability is not should not be a two-year snapshot evaluation, it should be | 18 19 | what was in the application, that was included in the | |
| 20 21 | looked at over a longer term. Q. If the deferral was to be recovered over | 20 21 | | Ì |
| 22 23 | a period longer than ten years, do you believe that the deferral the Dayton Power and Light Company | 22 23 | the application. | |
| 24 | proposes in this case would promote rate stability? | 24 | A. Believe it was. | |
| 25 | A. I don't know. | 25 | | |
| | to the second of | | 하는 그는 사람들이 가장하는 것이 되었다. 그 사람들이 있는 그는 그리고 있는 사람들이 되었다. | |

| | | | | | • |
|---|---|------|---|---|---------|
| 1 2 3 4 4 5 5 6 6 7 7 8 8 9 9 100 111 12 13 144 15 15 16 17 18 19 20 21 22 23 24 25 | A. If you're stipulating it was included in the application, I would stipulate that I read it. Q. Counsel's corrected me, it is included in the application. You in fact discuss this document in your testimony, don't you? Starting on page 7, line 27. A. Yes. Q. Do you recall the particulars of the 05-276-EL-AIR stipulation? A. Generally. Q. Are there any provisions in that stipulation that expressly prohibit a deferral? A. I would have to review the document. I can't recall anything but I would have to review the document to verify that. Q. Please do. (Pause.) A. Now could you repeat that question again, Mr. Sharkey? Q. Yes. Are there any provisions in the stipulation and recommendation from case No. 05-276 that expressly prohibit a deferral of fuel costs? A. During what term? Q. As proposed by the Dayton Power and Light Company in this matter. | e 32 | 1 2 3 4 5 6 7 8 9 10 11 12 13 14 15 16 17 18 19 20 21 22 23 24 25 | negotiations to modify the agreement if the legislation had affected its terms and rates. Do you see that testimony? A. I see that. Q. And your clients Honda and Cargill were both parties to the 2005 stipulation we were just looking at, correct? A. Yes, it's my understanding they were. Q. Can you tell me what it is that you believe should occur under the section of that 2005 stipulation that you're discussing? A. I think the document speaks for itself; good faith negotiations to modify the agreement for subsequent legislation. Q. And how do you believe that relates to DP&L's request for a fuel deferral in this case? A. The rates are and terms are being modified that's put forward in the application. It's my understanding from counsel that negotiations did not occur. Q. Is it your opinion that if — strike that. If Senate Bill 221 creates new costs for the Dayton Power and Light Company in 2009 and 2010 beyond what were provided for in the 2005 rate | Page 35 |
| 1 2 3 4 4 5 6 7 8 8 9 10 11 12 13 14 15 16 17 18 19 20 21 22 23 24 25 | A. It's my understanding that this stipulation sets the rates for 2009 and 2010. So to the extent that DP&L agreed to in this stipulation set the prices for 2009 and 2010, deferrals shouldn't be necessary, because they've already agreed to them. Q. Do you know whether strike that. Do you consider a deferral of costs for a certain period to be the same as a recovery of costs and rates during the same period? A. I believe that if you defer something in the future, that doesn't eliminate the liability and the obligation to repay it. So it the extent that DP&L would defer costs for generation in 2009 and 2010 for later collection, those costs would be impacting 2009 they would be 2009 and 2010 costs collected at a later date. Q. I don't think that answers my question. The question is, do you consider a recovery of costs in a certain period to be the same as deferring those costs, recovering them in a subsequent period? A. Define "the same." Q. I'm not sure I understand why you need the word "same" defined. Identical. | e 33 | 1 2 3 4 5 6 7 8 9 10 11 12 13 14 15 16 17 18 19 20 21 22 23 24 25 | stabilization stipulation we were looking at, do you believe that Honda and Cargill would have an obligation to negotiate with the Dayton Power and Light Company to restore to DP&L the benefit of its bargain under the 2005 stipulation? A. Could you repeat that question again please? Q. Yes. If Senate Bill 221 imposed new costs upon the Dayton Power and Light Company beyond the costs imposed by the 2005 stipulation and recommendation we were looking at, do you believe Honda and Cargill would have an obligation to enter negotiations with DP&L to restore to DP&L the benefit of its bargain from the '05 stipulation? A. To the extent that DP&L was seeking additional maney, the initiation of the negotiations in my fudgment should occur from the DP&L side. Q. Not asking you about who should initiate the negotiations, the question is would Honda and Cargill have such a responsibility under the 2005 stipulation? MR. SMITH: I object to the extent it asks for legal conclusion. The document speaks for itself what the obligations are. THE WITNESS: Is counsel instructing me | Page 36 |
| 1 2 3 4 5 6 7 8 9 100 111 122 133 144 155 166 17 18 19 200 211 22 23 24 25 | A. They're not identical because there's other charges that would be applied and they would be collected later from other customers. So are they costs incurred in 2009 and 2010 collected later? They are, based upon the applications put forward. Q. So you A. But they're collected from different consumers in later years presumably based upon my understanding of the application, with interest. Q. Do you consider a deferral strike that. Do you consider DP&L's request to defer cost it incurs in 2009 and 2010 for recovery starting 2011 to be a rate increase in 2009? A. Would not be a rate increase in 2009 but it would incur incremental liability and obligation on behalf the consumers for the extended time frame In 2011. Q. On page 8, line 25 A. Are you still looking at the stipulation? Q. No, I apologize, from your testimony. A. Okay. Q. You refer to, starts on line 24, the stipulation providing that if it was modified by legislation, the parties would enter in good faith | 34 ; | 1 2 3 4 5 6 7 8 9 10 11 12 13 14 15 16 17 18 19 20 21 22 23 24 25 | not to answer? MR. SMITH: No, I'm not instructing you not to answer. THE WITNESS: Okay. MR. SMITH: I am Instructing you not to provide legal advice. A. Could you repeat the question again please, Mr. Sharkey? MR. SHARKEY: Can you reread the second question I asked? (Record read.) A. I believe that would force me to draw a legal conclusion, and since I am not an attorney, I'm uncomfortable in drawing such a conclusion. Q. If you defer to your testimony, page 9, line I, you opine "DP&L simply attempts to circumvent provisions in the stipulation approved by the Commission that specifically calls for negotiations." You offer an opinion there, haven't you, that the Dayton Power and Light Company has an obligation to enter into negotiations with your clients Honda and Cargill, correct? A. I provide an opinion there, I don't believe that crosses the line to a legal conclusion in my judgment. | Page 37 |

| 1 2 3 4 5 5 6 7 8 9 10 111 12 13 14 15 16 17 18 19 20 21 22 | Q. How does the question I asked you cross the line into a legal opinion in your estimation different than your answer on page 9, line 1, as I referred you to? A. Which question are you referring to, Mr. Sharkey? Q. The question that I've asked you and that the court reporter had read to you. A. In reviewing that, the question that you asked me and my opinion, it called for me to draw specific legal conclusion, and I'm not an attorney. I don't believe that my statements there in the testimony do that. That's my opinion. Q. Let me ask you this, if the facts were as I described in my prior questions, namely that the Senate Bill 221 imposed new costs upon the Dayton Power and Light Company above and beyond those provided for in the 2005 stipulation we looked at, do you believe any obligation would be triggered on behalf of Honda and Cargill under stipulation paragraph G cited in footnote 7 in your testimony on page 8? | Page 38 | 1 2 3 4 5 6 7 8 9 10 11 12 13 14 15 16 17 18 19 20 21 22 | have left DP&L's service should pay the RSS charge and should be permitted to return to DP&L at the fixed SSO price from the 2005 stipulation? A. It's my understanding that the DP&L tariff under certain circumstances provides for that as it currently stands today and that the application proposes to amend that. Q. I'm trying to figure out what it is that you propose. A. What I propose is that that continues. Q. Let me ask you some questions about your testimony about DP&L's proposed IIR rider. You testify that Honda and Cargill currently have their own realtime metering, correct? A. That's my understanding, that's correct. Q. Do you know whether the Dayton Power and Light Company has its own meters in addition for the Honda and Cargill facilities? A. I presume that in order to involce customers that Dayton Power and Light has meters attached to be able to read customers' consumption, yes. | Page 41 |
|---|--|---------|---|--|---------|
| 23 | What costs? What type of costs? Q. Question doesn't identify any particular | | 23 | Q. So do you know what Honda and Cargill do with the information they receive from the meters | |
| 25 | costs. If you feel you needed to qualify your answer | | 25 | they own? | |
| | | Page 39 | | | Page 42 |
| 1 2 3 4 4 5 6 6 7 8 9 10 11 12 13 14 15 16 17 18 19 20 21 22 23 24 25 | by identifying costs, that would be that would make a difference to your answer, please do. THE WITNESS: Could you repeat that question back again please? (Record read.) A. I believe that that would require me to draw a legal conclusion because you're citing the stipulation in that regard and I'm uncomfortable drawing that conclusion, Mr. Sharkey. Q. You offer on page 8 in your answer starting on line 22 an opinion regarding obligations the Dayton Power and Light Company has under stipulation paragraph G, don't you? A. I offer my opinion of the simple reading of the document. Q. Can you give me your opinion of the simple reading of the document the obligations that section imposes upon Honda and Cargill? A. My simple reading of that would be that if DP&L requested negotiations, that Cargill and Honda would have the obligation to negotiate. Q. Let me ask you a question I meant to ask you at the very beginning but forgot. Do you have any corrections or changes to your testimony? | rayess | 1 2 3 4 5 6 7 8 9 10 11 12 13 14 15 16 17 18 19 20 21 22 23 24 25 | A. No, I do not. Q. Based on your experience in the industry, what would you do with that kind of information if it was available to you? A. I would attempt to optimize the operations to maintain a balance between power supply costs and operational characteristics as necessary to make particular products that Cargill and/or Honda would be making. I would review that data for various things depending on the individual circumstances that the operations might need. And every customer is different in that regard. Some customers are very concerned about power quality, for instance. Some customers aren't as concerned about those types of things. I would review the data for any factors that would impact the costs of the operations negatively relative to the charges in the tariffs DP&L provides for or that the CRES supplier might have various charges included in the agreement that might cost them additional monies and that they could by controlling the operational status and the consumption thereby control their charges. Q. Would do you understand that for the | raye +2 |
| - | | Page 40 | | | Page 43 |
| 1 2 3 4 5 6 7 8 9 10 11 12 13 14 15 16 17 18 19 20 21 22 23 24 25 | A. No, I do not. Q. Let me switch topics on you. Starting on page 9 of your testimony there's a heading that says "Return to SSO," and on page 12, line 17 of that testimony, you refer to a stay out provision in the Duke ESP case. Do you see that? A. Yes. Q. Can you tell me what you've got in mind there? A. It's my understanding that in the Duke Ohlo case — In the Duke Ohlo ESP case as I cited there, 08-920, that customers who elect to take CRES service would be able to avoid certain charges in return for agreeing to stay away and not purchase SSO supplies for a specific period of time. And in return for that they were able to bypass certain charges, they were able to avoid certain charges. MR. SHARKEY: Can you read that answer back to me. (Record read.) Q. If I understand your testimony on the SSO points we've — that are covered in pages 9 to 12 of your testimony, is it your opinion that customers who | | 1 2 3 4 5 6 7 8 9 10 11 12 13 14 15 16 17 18 19 20 21 22 23 24 25 | Dayton Power and Light Company to implement time-of-use and critical peak pricing for Cargill and Honda, that DP&L intends to install its own meter for those facilities — advanced meters for those facilities I should say? A. I understand from the application that DP&L intends to Install new meters for all customers. Q. And as to Honda and Cargill, that new meter would presumably replace the existing DP&L meter? A. Presumably it would replace the existing DP&L meter. Q. Are you proposing that DP&L not install advanced meters for Honda and Cargill? A. It's unclear to me from the application of exactly what incremental benefit the companies would get or Honda and Cargill would get out of changing the meters from the existing meter structures which, my understanding, have interval meter capabilities and other information already provided, to the advanced metering that is contemplated by the companies, whatever those specifically might be. Q. If it were true that DP&L needed to install new meters for Honda and Cargill to implement | |

| 1 2 3 4 4 5 6 6 7 8 9 10 11 12 13 14 15 16 16 17 18 19 20 21 22 23 24 25 | time-of-use pricing and critical peak pricing, would you agree then that it was appropriate for DP&L to install new advanced meters for Honda and Cargill? A. Can you repeat that question again please? Q. Yeah, if the Dayton Power and Light Company in fact needed to install new advanced meters for Honda and Cargill to implement time-of-use pricing and critical peak pricing for Honda and Cargill, would you agree that it was appropriate for the Dayton Power and Light Company to install new advanced meters for Honda and Cargill? A. Would the companies Cargill and Honda have requested these critical peak pricing changes? Or not? Q. Why don't you answer that question both ways; assuming they have and assuming they haven't. A. To the extent that Cargill and Honda requested a meter change, to that extent, yes. To the extent that they didn't sorry, I'm getting lost in my own train of thought. Could you repeat that one more time, Mr. Sharkey, please? Q. Sure. Suppose DP&L needed to Install advanced meters to implement time-of-use and critical peak pricing for Honda and Cargill. | Page 44 | 1 2 3 4 5 6 6 7 8 9 10 11 12 13 14 15 16 17 18 19 20 21 22 23 24 25 | not be made up in other ways by utilizing that capacity for other purposes, no. Q. And can you explain to me the basis of your objection for the Dayton Power and Light Company's recovery of lost generation revenues? A. Sure. The generation is never purchased by the companies or it is sold to other providers to the extent that it's generating electricity itself, and in that regard those revenues should not be recovered from customers. Q. I'm not sure I understood your answer so perhaps these questions would help me to understand. Is your answer limited to switching customers? A. No. Q. Explain then if you would, please, the basis of your objection to the Dayton Power and Light Company recovering lost generation revenues from customers that have not switched. A. If a customer conserves electricity, a portion of the supplies that are purchased by the companies are power supply related purchases. If a customer conserves one kilowatt hour, that generation is not purchased by the company, no liability is created and no recovery of | Page 47 |
|--|--|---------|---|---|---------|
| 1 2 3 4 4 5 6 7 8 8 9 9 10 11 12 13 14 15 16 17 18 19 20 21 22 23 24 25 | Would you agree that it was appropriate for the Dayton Power and Light Company to install new meters for Honda and Cargill? A. Are we stipulating that the Commission has ordered those implementation of those procedures and rates? Q. Yes. A. Are we stipulating that the existing meters do not have that capability today? Q. Yes. A. Then, yes, they would need to install new metering capacity with those stipulations. Q. Nothing in your testimony addresses whether the company should or should not on a system-wide basis implement AMI or Smart Grid, correct? A. Correct. Q. I'll refer you to page 13 of your testimony. There's a question and answer there at which you address lost revenues. A. I see that. Q. Do you oppose the recovery by the Dayton Power and Light Company of lost distribution revenues that are lost associated with the CCEM programs? A. Define "distribution revenues." | age 45 | 1 2 3 4 4 5 6 7 8 9 10 11 12 13 14 15 16 17 18 19 20 21 22 23 24 25 | revenue should be permitted. If it is generated by the companies in a similar light, the companies either don't incur the costs of generating that power directly or sell that power to some other third party. So to that extent the revenue that the companies would otherwise receive is not lost, it is just sold to somebody else. Q. Let's assume the Dayton Power and Light Company was not able to sell the generation — strike that. Let's assume the Dayton Power and Light Company was not able to sell all of the freed up generation that resulted. As to the portion that was not sold would you support the Dayton Power and Light Company's recovery of fixed costs that were not saved? A. Can we stipulate this is not purchased power? Q. Yeah, we're not talking about purchased power. A. Just about facilities that are owned by the Dayton Power and Light Companies. Q. Correct, yes. A. We're talking about fixed assets for | Page 48 |
| 1 2 3 4 5 6 7 8 9 10 11 12 13 14 15 16 17 18 19 20 21 22 23 24 25 | Q. Are you familiar with the fact that the Dayton Power and Light Company has a distribution rate in its tariffs? A. I am. Q. And that DP&L strike that. Also familiar with the fact that the proposed CCEM programs that DP&L would implement would reduce consumption of generation by DP&L's customers? A. That is what's proposed in the application, I'm familiar with that, yes. Q. And that if that reduction happens, DP&L would recover less distribution revenue under the distribution rate we mentioned, correct? A. Correct. Q. That's what I mean by lost distribution revenues. A. For the distribution revenue portion I'm not opposed to collection of the revenue that would be created off the distribution rates. Not generation or transmission. Q. Do you oppose the recovery of lost transmission revenues by the Dayton Power and Light Company? A. To the extent that those revenues would | age 46 | 1 2 3 4 5 6 7 8 9 10 11 12 13 14 15 16 17 18 19 20 21 22 23 24 25 | generation that we stipulate could not be sold. Q. That's correct. A. No, I wouldn't support the recovery of generation in that regard. Q. Why not? A. The generation facilities are owned by the Dayton Power and Light Company and the people who are conserving the electricity, to the extent that that is occurring, are already paying for that gen those fixed costs in the existing rate structures. Q. But if the customer as a result of these programs reduced its generation usage, the costs DP&L would recover to compensate it for those fixed costs would be reduced, wouldn't they? A. No, I think those charges would still be recovered through the rate structures. Q. How? A. The fixed costs would be billed to other customers as on an ongoing basis. Q. How? A. It would be recovered on a charge per kilowatt hour, cost per kilowatt hour, demand charges, whatever might be in the individual demand rate structures that would be recovered from customers. | Page 49 |

| Q. For that to happen there would have to be a rate increase, so should generation, wouldn't there? A. Are we presuming that this power couldn't be sold anywhere else? This can't be sold? Q. Yeah, presumably some of the power DP&L will sell. I'm not asking about that power. I'm talking about power that DP&L was unable to sell. A. Has the facility been completely paid off or not? Q. The question didn't include an assumption on that. If you think that that matters, go ahead and explain why it does in your answer. A. With the stipulations that you're providing, presuming of course that if the facility's been paid off, then — by the consumers through the recovery of rates, then, no, I don't believe so. To the extent the facility has not been paid off by the rate payors and to the extent It can't be resold, theoretically, yeah, there would be potentially some liability there. Q. In that circumstance would you support the recovery of lost revenue for fixed generation costs for the Dayton Power and Light Company? A. That's an awful lot of stipulations for | 9 50 S | 1 2 3 4 5 6 7 8 9 10 11 12 13 14 15 16 17 18 19 20 21 22 23 24 25 | those customers were all shopping. Q. The rates on line 7 and line 9, are those the same rates that would apply to shopping customers and non-shopping customers? A. No, the point that the comparison is to show is what is the revenue collected by DP&L as proposed if the customers were shopping versus the revenue DP&L collects to propose in their estimate on schedule C5.1, line 8. Q. Then can you walk me through what's shown on lines 42 through 46? That's just the same calculation but for high voltage customers; is that correct? A. That's correct. Q. Then what's shown on line 48 through line 54? A. Line 48 is the summation of all the various rates from residential 111, residential 141 and 151, commercial/industrial rates, secondary, primary, and primary with substation, and the high voltage. The sum of those lost revenues between all those different rate categories is about \$909,000 a lost kilowatt hours. | Page 53 |
|---|--|--|--|--|
| | | \vdash | | D- C- |
| me, Mr. Sharkey. Potentially. I would have to see the specifics. Q. There is attached to your testimony a document that's labeled MRF-2. A. Uh-huh. Q. Can you describe for me what MRF-2 is intended to show? A. It's intended to show the differential between what was proposed by the companies for revenue recovery under the CCEM under the EER rider effectively, the monies going to be collected over the term in the document, against what otherwise would be recovered under what the companies identified is their shopping rate recovery level. And just a comparison between the two that created a differential in revenue collections. Q. If you could turn to MRF-2, can you walk me through what's shown on lines 1 through 10? For just 2009. A. For just 2009 lines 1 through 10? Q. Yes. A. Basically line 1 as I mention here in the first column the second column technically, since the line number is the first column, energy | e 51 | 1 2 3 4 5 6 7 8 9 10 11 12 13 14 15 16 17 18 19 20 21 22 23 24 25 | Q. Okay. A. Line 50 is basically the \$909,000, which is the lost revenue if everybody was shopping, divided by the lost kilowatt hours or the conserved kilowatt hours that you are proposing for 2009, creating the average if everybody was shopping the average lost revenue would be about 1.7 cents per kilowatt hour. Q. Then line 52 through 54? A. Lines 52 through 54 is basically that's what DP&L proposes to collect, their expectation of tost revenues as proposed in schedule C5.1. The lost kilowatt hours are the same, and the difference basically line 52 which is the proposed lost revenue divided by the lost kilowatt hours, or the conserved kilowatt hours I should say, is about 6.3 cents. Q. And what conclusion does this chart lead you to? A. That if everybody was shopping, that the collection to the companies would be substantially lower because it is attempting to collect for generation revenues in addition to distribution revenues in the proposed EER rider. Q. Would be or should be? A. That's what you're proposing. | Page 54 |
| efficiency net revenue requirements of \$13 million, a little over \$13 million, and the lost revenue is a little less than \$3.4 million, that is 26 percent of the total. It's basically line 2 divided by line 1. Over on the far right-hand column it shows where specifically in the application those documents occur. Those are the lost revenues that are created through conservation. The residential rate 111, your application projects a little over 1.8 million-kilowatt hours of lost revenue. The shopping lost revenue or average rate if a customer who was a residential rate 111 customer was shopping, they would be about 3 cents a kilowatt hour is what the companies are proposing to recover if they were shopping those kilowatt hours basically on an annualized basis then. So effectively the non-summer months would be 18.4 million-kilowatt hours approximately. Once again, the average revenue in the non-summer months if a customer were shopping of a little over 3 cents a kilowatt hour, once again creating a basically a lost revenue calculation of line 6 times line 7 plus line 8 times line 9, creates 612, almost | e 52 | 1 2 3 4 5 6 7 8 9 10 11 12 13 14 15 16 17 18 9 20 21 22 23 24 25 | Q. What do you believe is appropriate? A. I believe that DP&L should be able to recover for lost distribution revenues for conservation. Q. Let me ask you about your testimony on page 14, line 22, regarding the mercantile customer opt out in 4928.56. A. I see that. Q. Are you familiar with the Commission's rule-making process associated with the mercantile customer opt out? A. Generally. Q. I assume that you, like me, don't know what the result of that rule-making process is going to be? A. No, I don't have a crystal ball in that regard. Q. I assume you don't object to the Dayton Power and Light Company complying with the final rules once they're promulgated. A. If the Commission issues final rules and to the extent that there's no appeals, I obviously have no problem with them complying with those rules. Q. Do you believe that there's something | Page 55 |
| | Q. For that to happen there would have to be a rate increase, so should generation, wouldn't there? A. Are we presuming that this power couldn't be sold anywhere else? This can't be sold? Q. Yeah, presumably some of the power DP&L will sell. I'm not asking about that power. I'm talking about power that DP&L was unable to sell. A. Has the facility been completely paid off or not? Q. The question didn't include an assumption on that. If you think that that matters, go ahead and explain why it does in your answer. A. With the stipulations that you're providing, gresuming of course that if the facility's been paid off, then by the consumers through the recovery of rates, then, no, 1 don't believe so. To the extent the facility has not been paid off by the rate payors and to the extent it can't be resold, thenericially, yeah, there would be potentially some liability there. Q. In that circumstance would you support the recovery of lost revenue for fixed generation costs for the Dayton Power and Light Company? A. That's an awful lot of stipulations for Pag me, Mr. Sharkey. Fortentially. I would have to see the specifics. Q. There is attached to your testimony a document that's labeled MR?—2. A. Uh-huh. Q. Can you describe for me what MRF-2 is intended to show? A. It's intended to show the differential between what was proposed by the companies for revenue recovery under the CCEM under the EER rider effectively, the monies going to be collected over the term in the document, against what otherwise would be recovered under what the companies identified is their shopping rate recovery level. And just a comparison between the two that created a differential in revenue collections. Q. If you could turn to MRP-2, can you walk me through what's shown on ilines 1 through 10? Q. Yes. A. Basically line 1 as I mention here in the first column - the second column technically, since the line number is the first column, energy efficiency net revenue requirements of \$13 million, a little over \$13 million, and the lost reve | a rate increase, so should generation, wouldn't beer? A. Are we presuming that this power couldn't be sold anywhere else? This can't be sold? Q. Yeah, presumably some of the power DP&L will sell. I'm not asking about that power. I'm talking about power that DP&L was unable to sell. A. Has the facility been completely paid off or not? Q. The question didn't include an assumption on that. If you think that that matters, go ahead and explain why it does in your answer. A. With the stipulations that you're providing, presuming of course that if the facility's been paid off, then by the consumers through the recovery of rates, then, no, I don't believe so. To the extent the facility has not been paid off by the rate payors and to the extent it can't be resold, theoretically, yeach, there would be potentially some liability there. Q. In that circumstance would you support the recovery of lost revenue for fixed generation costs for the Dayton Power and Light Company? A. That's an awful lot of stipulations for Page 51 me, Mr. Sharkey, Fotentially, I would have to see the specifics. Q. There is attached to your testimony a document that's labeled MRF-2. A. Uthuhn Q. Can you describe for me what MRF-2 is intended to show? A. It's intended to show the differential between what was proposed by the companies for revenue recovery under the CCEM under the EER rider effectively, the mones going to be collected over the term in the document, against with otherwise would be recovered under what the companies identified is their shopping rate recovery level. And just a comparison between the two that created a differential in revenue collections. Q. If you could turn to MRF-2, anyou walk me through what's shown on times I through 10? Q. Yes. A. Basically line 1 as I mention here in the first column: the second column text through 10? Q. Yes. A. Basically line 1 as I mention here in the first column: a shows where specifically in the application those documents occur. Those are the lost revenue is a littl | Q. For that to happen there would have to be a rate increase, so should generation, wouldn't there? A. Are we presuming that this power couldn't be sold anywhere else? This can't be sold? Q. Yeah, presumably some of the power DPSL will sell. I'm not asking about that power. I'm 7 talking about power that DPSL was unable to sell. A. Has the facility been completely paid off 9 or not? O. The question didn't include an assumption 10 or not. If you think that that matters, go alead and explain why it does in your answer. A. With the stipulations that you're providing, presuming of course that if the facility's been paid off, then by the consumers through the recovery of rates, then, no, I don't believe so. To the cotent the facility has not been paid off they are payors and to the extent it can't be resold, theoretically, yeah, there would be potentially some lability there. Q. In that circumstance would you support 21 payors of the Dayton Power and Light Company 24. A. That's an awful but of stipulations for 25 me, Mr. Sharkey. Potentially, I would have to see the specifics. Q. There is attached to your testimony a document that's labeled MRF-2. A. Uith-luh. Q. Can you describe for me what MRF-2 is intended to show the differential between the Was proposed by the companies for revenue recovery under the CCEM - under the EER 11 not show? A. It is intended to show the differential between what was proposed by the companies for revenue recovery under the CCEM - under the EER 11 not show? A. It is intended to show the differential between what was proposed by the companies for revenue recovery under the CCEM - under the EER 11 not show and the companies for revenue recovery under the CCEM - under the EER 11 not show and the recovery of the companies for revenue requirements of \$13 million, a differential in revenue collections. Q. They out old time to MRF-2, can you walk me through what is shown on lines I through 10? Por 12 pays 12009 lines I through 10? Por 12 pays 12009 lines I through 10? Por 12 pays 12009 line | Q. For that to happen three would have to be a rate harveles, so round generation, wouldn't them. Are we presuming that this power couldn't be seen any of the sound generation. A great presuming that this power couldn't be seed anywhere less? This can't be sould? Q. York, presumably some of the power DPML was unable to seed. Seed anywhere less? This can't be countred. The country of the coun |
