TARIFF FORMAT

- A. Sheet Numbering – Sheet numbers appear in the upper-right corner of the page. Sheets are numbered sequentially. However, new sheets are occasionally added to the tariff. When a new sheet is added between sheets already in effect, a decimal is added. For example, a new sheet added between Sheets 14 and 15 would be 14.1.
- B. Sheet Revision Numbers – Revision numbers also appear in the upper-right corner of the page. These numbers are used to determine the most current sheet version on file with the OHPUC. For example, the 4th revised Sheet 14 cancels the 3rd revised Sheet 14. Because of various suspension periods, deferrals, etc. the OHPUC follows in their tariff approval process, the most current sheet number on file with the Commission is not always the tariff page in effect. Consult the Check Sheet for the sheet currently in effect.
- C. Paragraph Numbering Sequence – There are nine levels of paragraph coding. Each level of coding is subordinate to its next higher level:
- 2.
 - 2.1
 - 2.1.1
 - 2.1.1.A.
 - 2.1.1.A.1
 - 2.1.1.A.1 (a)
 - 2.1.1.A.1 (a).1.
 - 2.1.1.A.1 (a).1.(I)
 - 2.1.1.A.1 (a).1.(I)(I)
- D. Check Sheets – When a tariff filing is made with the OHPUC, an updated check sheet accompanies the tariff filing. The check sheet lists the sheet contained in the tariff, with a cross-reference to the current revision number. When new pages are added, the check sheet is changed to reflect the revision. All revisions made in a given filing are designated by an asterisk (*). There will be no other symbols used on this sheet if these are the only changes made to it (i.e., the format, etc. remains the same, just revised revision levels on some pages). The tariff user should refer to the latest check sheet to find out if a particular sheet is the most current sheet on file with the OHPUC.

- B Service is provided for a minimum period of at least one month, 24 hours a day. A month is considered to have thirty days unless otherwise specified. At the expiration of the initial terms specified in each service order, or in any extension thereof, service shall continue on a month to month basis at the then current tariffed, month to month rates, unless terminated by the Customer. Any termination shall not relieve the Customer of its obligation to pay any charges incurred under the service order and this tariff prior to termination. The rights and obligations which by their nature extend beyond the termination of the term of the service order shall survive such termination.
- C This tariff shall be interpreted and governed by the laws of the State of Ohio without regard for the State's choice of laws provisions.
- D Another telephone company must not interfere with the right of any person or entity to obtain service directly from the Company.
- E The services the Company offers shall not be used for any unlawful purpose or for any use as to which the Customer has not obtained all required governmental approvals, authorizations, licenses, consents and permits.

1.5 Liability of the Company

- F Approval of limitation of liability language by the PUCO does not constitute a determination by the Commission that the limitation of liability imposed by the Company should be upheld in a court of law. Approval by the Commission merely recognizes that since it is a court's responsibility to adjudicate negligence and consequent damage claims, it is also the court's responsibility to determine the validity of the exculpatory clause.

1.5.1 With Respect to Emergency Number 911 Service

A This service is offered solely as an aid in handling assistance calls in connection with fire, police and other emergencies. The company is not responsible for any losses, claims, demands, suits or any liability whatsoever, whether suffered, made, instituted or asserted by the Customer or by any other party or person for any personal injury to or death of any person or persons and for any loss, damage or destruction of any property, whether owned by the Customer or others, caused or claimed to have been caused by: (1) mistakes, omissions, interruptions, delays, errors or defects in the provision of this service, or (2) installation, operation, failure to operate, maintenance, removal, presence, condition, location, or use of any equipment and facilities furnishing this service.

Minimum Telephone Service Standards (MTSS) language: "All telephone companies are subject to the commission's rules for minimum telephone service standards (MTSS) found in chapter 4901:1-5 of the Administrative Code. Customers have certain rights and responsibilities under the Minimum Telephone Service Standards. These safeguards can be found in the Appendix to Ohio Adm. 1.7 Interruptions in Service

An interruption is deemed to have occurred when the phone lines of the underlying provider are inoperative. If a Customer reports a facility, service or circuit to be inoperative but declines to release it for testing and repair, it is considered to be impaired, but not interrupted.

1.7.1 Temporary Suspension for Maintenance

A The Company's underlying provider shall have the right to make necessary repairs or changes in its services at any time and will have the right to suspend or interrupt service temporarily for the purpose of making the necessary repairs or changes in its system. When such suspension or interruption of service for any appreciable period is necessary, the Company will give the Customers who may be affected as reasonable notice thereof as circumstances will permit, and will perform the work with reasonable diligence, and if practicable at times that will cause the Customer the least inconvenience. When the Company's services are being repaired or changed, it shall take appropriate precautions to avoid unnecessary interruptions of Customer's service.

1.7.2 Credit Allowance for Interruptions

A Interruptions of 24 hours or more, are reported to or detected by the Company, and which are not due to negligence or willful act of the Customer are credited to the Customer at the pro rata monthly charge involved for each twenty-four hours or fraction thereof of interruption. Credit is not allowed for interruptions to service of less than 24 hours. Credit allowances for service outages that exceed 24 hours in duration will be rounded up to the next whole 24 hours.

B For calculating credit allowances, every month is considered to have 30 days. A credit allowance for up to 48 hours is applied on a pro rata basis against the monthly recurring charges. A credit of at least one third of a month will be made for interruptions of 48 to 72 hours, and a credit of at least two-thirds of a month will be made for interruptions of 72 to 96 hours, with a full month credit for interruptions in excess of 96 hours. Only those facilities on the interrupted portion of circuit will receive a credit.

2.2 Feature Descriptions

- A The Company's local exchange services have a variety of available features that let the Customer design a service tailored to meet their needs. Below are feature descriptions.

Caller ID with Number

Allows for the automatic delivery of a calling party's number to the called customer. The telephone number is displayed on customer-provided equipment. If the Customer has call waiting on the same line, they will hear the call waiting tone, but the new incoming call number will not be displayed.

Caller ID with Name and Number

Allows for the automatic delivery of a calling party's name and number to the called party. The name and number are displayed on customer-provided equipment. If the Customer has call waiting on the same line, they will hear the call-waiting tone, but the new incoming name and number will not be displayed.

Caller ID Blocking Per Line

Provides default blocking of delivery of the calling customer's telephone number. Blocking can be deactivated by the customer by dialing an access code before each call. When the customer hangs up, the default blocking is reinstated.

Caller ID Blocking Per Call

Provides blocking of delivery of the calling customer's telephone number on a per call basis. Blocking can be activated by the customer dialing an access code before each call.

2. Local Exchange Service Descriptions (cont'd)

2.2 Feature Descriptions (cont'd)

Call Forward

This optional feature allows all calls directed to a telephone number to be routed to a user defined telephone number. The user can activate/deactivate Call Forward and define a telephone number where all calls will be forwarded. Calls cannot be forwarded to an International Direct Distance Dialing (IDDD) number.

Call Forward Busy Line

This optional feature forwards calls to a busy station to a predetermined number. Calls cannot be forwarded to an International Direct Distance Dialing (IDDD) number. The user is charged any applicable usage charges for the forwarded call.

Call Forward Don't Answer

Allows users to re-route a call to a predetermined station in the event that the call is not answered within a customer-specified number of rings. Users are charged for any applicable usage charges on the forwarded call.

Call Pick Up

This optional feature allows a call to be answered from a different line by dialing a code. All lines in the group must be equipped with this feature. The Customer can have an unlimited number of lines in a Call Pick Up group.

2. Local Exchange Service Descriptions (cont'd)

2.2 Feature Descriptions (cont'd)

Call Transfer

This optional feature allows the user to transfer any established call to another telephone number (inside or outside of the system) without the assistance of an attendant.

Call Waiting

This optional feature provides a tone to notify a Customer on an existing call that a second call is waiting.

Consultation Hold

This temporary hold feature is inherent in Call Transfer and Three Way Calling. It is activated by depressing the switch hook.

Direct Connect Hotline

This optional feature allows a Customer to automatically dial a designated number whenever the originating telephone goes off hook. This feature is assigned to a phone which is used only for this purpose.

Hunting

This standard feature routes a call to an idle line in a prearranged group when the called telephone number is busy. Typically this feature is used with the customer's main telephone number and several subtending lines so that the customer can receive calls on several lines, although all calls are placed to the same number. Hunting will not work with Call Forward Busy and Don't Answer.

Speed Dial

This optional feature allows a Customer to designate up to six numbers to be called by dialing a code.

Speed Dial, Expanded
