Belmont County

Dear Mr. O'Dell,

As per our recent discussion, the construction status of several American Transmission Systems, Incorporated and/or FirstEnergy operating company's transmission projects submitted to the Ohio Power Siting Board under Letter of Notification or Construction Notice filings is provided below. These projects are identified in the following table that provides the case number, project title and the construction status of each of these projects. I have also added one application filing to the list for the North Medina Transmission Substation project, and the two associated Letters of Notification for transmission line work, as construction of that project is also completed but not indicated within the Docketing database. With the exception of two LON or CN projects, case numbers 07-1111-EL-BLN and 07-1171-EL-BLN identified below with construction not started, as well as open application projects not listed below, I believe that construction has been completed (or we have previously indicated that

This is to certify that the pages appearing are an
