14	EXAMINER PIRIK: We'll go back on the
15	record.
16	At this time we'll have a closed session
17	with regard to certain proprietary information that the
18	Bench has held proprietary in this matter. On
19	cross-examination, Mr. Weston.
20	MR. WESTON: Thank you, your
21	Honor.
22	<b></b>
23	FURTHER CROSS-EXAMINATION
24	BY MR. WESTON:
25	Q. Dr. Currie, remember we were considering some

- numbers that you had calculated? I know you -- I know
- 2 how you probably feel about the assumptions in that
- analysis, but could you just tell us what those
- 4 proprietary numbers are?
- 5 A. Those assumptions that we made previously result
- in \$368,532 per month. And you also asked to calculate
- 7 the number on an annual basis, and multiply it by 12;
- 8 \$4,422,382 per year.
- 9 Q. And the way you got to the monthly figure was
- multiplying times the cost to Ohio Bell purchase use of
- 11 the operator service which was what, about 27 cents?
- 12 A. Was approximately 27 cents, plus some change,
- 13 that I used that I multiplied against the other
- 14 components that we discussed earlier.
- MR. WESTON: Thanks, Dr. Currie.
- 16 THE WITNESS: You are welcome.
- 17 EXAMINER PIRIK: Thank you, Mr.
- 18 Weston.
- 19 Ms. Henkener?
- MS. HENKENER: Thank you.
- 21 - -
- 22 FURTHER CROSS-EXAMINATION
- 23 BY MS. HENKENER:
- Q. Can you give me your calculation which is the
- 25 result of --

- 1 A. At Page 7?
- 2 Q. Yes, Page 7, let's see, dividing --
- 3 A. These constructions.
- 4 Q. Line No. 23 by Line No. -- by \$3.50.
- 5 A. So 23 divided by 22, and I am going to give it to
- 6 you in percent, for Automatic Callback it is 54.3
- 7 percent, and for Caller ID it is 82.2 percent. And
- 8 that is using the list price information that appears
- 9 on Page 7.
- 10 Using the Page 8 information that is used using
- 11 the minimum tariff rate, the comparable numbers are for
- 12 Automatic Callback, 36.4 percent, and for Caller ID,
- 13 75.8 percent.
- 14 Q. And concerning the prices for the 5 ESS switch,
- do you have those numbers, or I may have a document
- 16 that can help you.
- 17 A. The price for Caller ID and 5 E switch, at the
- time of this document, and it has subsequently been
- 19 changed, and I think I remember at least one of the
- subsequent prices, appears in several forms, and that
- is part of the reason why in my testimony I went
- through this multifaceted example, the vendors don't
- 23 necessarily make it easy on us to make these choices,
- 24 but first if I buy all the Phase-1 features as a
- 25 package in the 5 E, which I can do, I have two choices;

- I can buy it either on a per-line basis, or I can buy

  it on a switch mod, and a switch mod is one of the

  building blocks within the 5 E switch.
- At the time we did the original work, the cost per-line is \$30 per-line. You would do that when, essentially, you are going to have very few lines.

And at the time we did this, it is \$5,700 per switch mod. I would have to read this to make sure. I think I apply an 11 percent discount in addition to that. This, I think, is what is called the Bell list price to which discounts apply.

My recollection is, today, at this moment, we are paying a net price for the Phase-1 per switch mod of \$3,990. I can check that, but that is my recollection.

In other words, we have, subsequently, in the last year or so, gotten a better price for this particular component from AT&T, and that is the primary price, as I understand it.

I think we are, in fact, purchasing the class features and 5 E switch today. AT&T also offers other options, for Caller ID, specifically, besides the two that I have already mentioned.

And Caller ID, AT&T calls the package of Calling
Number Delivery, which is our Caller ID service, and
what they call Calling Number Delivery Blocking, which

- is the software for providing blocking that I think Ms.
- 2 Takacs talked about.
- It is called -- I won't give you the acronym.
- 4 Individuals Calling Line Identification. Telephonees
- 5 (phonetic), there is always an acronym.
- At the time of this, and I don't think this price
- 7 has changed, that is \$1,800 per switch mod, less the 11
- 8 percent discount.
- Those are the set of options, as I understand,
- that exist for Caller ID in the 5 E switch family.
- 11 Q. And what about Automatic Callback?
- 12 A. Automatic Callback is available in the Phase-1
- 13 package. It is part of that package, so we get the
- 14 same capability if you buy one of the packages, but in
- addition, AT&T offers the ability to buy it by itself.
- Now, one of the confusing parts here is that in
- 17 AT&T, they call Automatic Callback, our service,
- 18 Automatic Recall, and so the cost for Automatic Recall,
- 19 which is our Automatic Callback tariff offering that we
- are proposing, its cost, if you buy it by itself, is
- 21 \$1,800 per switch mod, less, at this time, the 11
- 22 percent discount.
- I don't know whether the discount, the 11
- 24 percent, is exactly the same or not. It is probably
- 25 fairly close.

- The 3,990 number, I think, is discounted,
- 2 although I can check that for you.
- Q. Okay. And what they call Automatic Callback,
- 4 what do we call?
- 5 A. We call that Repeat Dialing.
- 6 Q. Okay.
- 7 A. Make you thoroughly confused?
- 8 Q. And what is the -- And what is the cost per
- 9 switch mod for that?
- 10 A. The cost for that, when you buy it by itself, it
- 11 also is included in the Phase-1 features that I
- mentioned previously, but when you buy it by yourself,
- it is \$3,000 per switch mod, less any discount.
- 14 And the discounts for the software will tend to
- be the same for -- across switch mods. I want to just
- indicate that these prices represent when we are buying
- these features by themselves.
- 18 If you are doing a dial-for-dial office
- 19 replacement, essentially you are buying everything.
- The vendor may, and often does, provide better
- 21 discounts than these.
- 22 (Pause.)
- 23 Q. Why didn't you use these numbers in your answer
- to Question 78?
- 25 A. These were proprietary pieces of information, but

- a specific product, and what would be the relevant cost
- 5 for a family.

- I attempted to keep the proprietary information
- 7 to a minimum. I did reach a conclusion based on the
- 8 information that we just read, but it also included
- 9 using the 3,990 number in my evaluation.
- 10 Q. Okay. Would the analysis that you did in your
- 11 testimony still hold if you used the actual vendor
- 12 prices that we discussed here?
- 13 A. When I evaluated -- I used the 3,990. I haven't
- gone through and looked at the \$5,700. I don't know if
- it would be exactly the same, or whether it would be
- anything -- I know I have gone through and looked at
- it, and if there were anything, there was, under some
- 18 circumstances, potentially a very small piece that
- might be product specific if I were to review it again.
- But using the most current rates, there wasn't any.
- MS. HENKENER: That is all we have,
- 22 your Honor.
- 23 EXAMINER PIRIK: Thank you, Ms.
- 24 Henkener.
- Mr. Kelly, do you have any redirect?

1		MR.	KELL	Y:	No	redire	ect.	Tha	ınk
2	you.								
3		EXA	MINER	PIRIK:	We '	'll go	back	on	the
4	open record.
