

Case No. 09-664-EL-REN
Crayola Solar
Staff Interrogatories – Initial Set

Question 1: You must submit a signed and notarized affidavit with your filing. Please file this affidavit with your application.

Answer 1: Affidavit attached.

Question 2: You identify the facility as distributed generation with a net metering and interconnection agreement with a utility. With what utility do you have an interconnection agreement?

Answer 2: Interconnection Agreement is with MetEd/FirstEnergy, the utility, and Crayola, owner of the land and crayon manufacturing facility.

Question 3: While you identify your facility as a net metered project, you also report in Section G that the output of the facility will be metered at the point of connection of customer switchgear, and in Section M, that PJM is the balancing authority. Please reconcile your statements as it appears that your project is not a net-metered facility.

Answer 3: Question J.3 on the initial application should have been checked “Other”. The facility will be net metered as a behind-the-meter project with MetEd/FirstEnergy, the utility.

Question 4: Your application indicates that you have an account with GATS, but does not convey a GATS generation ID number. Has your facility been assigned such a number, and if so, what is it?

Answer 4: No number has been assigned yet.

Question 5: Question G, Certification Criteria 2, seeks a written description of your facility. Included in this is a description of how the facility will be measured and verified. Please provide details addressing these issues.

Answer 5: The meter will be located at the point of connection. PPL will remotely read the meter through its SCADA system.

Question 6: Your application does not provide certain information (i.e., meter specifications, meter photo, etc), presumably because your facility is not yet on-line. Please acknowledge that this required information will be provided when available consistent with the directions in the Filing Instructions.

Answer 6: Meter information will be provided when available.

As your responses will be used to supplement your application, please sign the following attestation before returning the responses. Also, please file your responses in the PUCO Docketing Information System under case number 09-664-EL-REN. Thank you.

1. I am the duly authorized representative of PPL Renewable Energy, LLC on behalf of Crayola Solar.
2. I have personally examined and am familiar with all information contained in the foregoing responses, including any exhibits and attachments, and that based upon my inquiry of those persons immediately responsible for obtaining the information contained in the responses, I believe that the information is true, accurate and complete.
3. I am aware that there are significant penalties for submitting false information, including the possibility of fine and imprisonment.
