Columbus, OH 43229

Subject: AMP Generating Station
Case Number 06-1358-EL-BGN

Dear Mr. Kiesewetter,

Staff attended your October 1, 2009, pre-construction conference pertaining to the continuation of an access road from the proposed fertilizer storage facility to stack # 1 for the generating facility. In-ground steel and rebar work for stack #1 was also indicated for this phase. This work may commence so long as AMP has secured all necessary permits for this portion of work. Staff requests that AMP first contact and receive approval from the Ohio Department of Natural Resources for any access road work in the Tupper Run pool, which should include appropriate silt fencing.

As previously noted, an environmental specialist needs to be on site during construction. Please keep Staff informed of progress of site activities, and notify the Board when construction is completed for this phase. Also, please coordinate with Staff any permit approvals or pre-construction meetings for additional phases of work as they become known.

Very truly yours,

Klaus Lambeck, Chief
Facilities, Siting & Environmental Analysis Division
Ohio Power Siting Board
