RECEIVED-DOCKETING BAK
2009 DEC -1 PM 3:30
PLCO

As a pilot, I have grave misgivings about the planned placement of over 30 492-foot wind turbines from 2 to four miles east of Grimes Field Urbana, Ohio. Whether flying IFR or VFR, wind turbines located that close to Grimes field would present a safety issue for my flight in and out of Grimes. I firmly believe that wind turbines should strictly adhere to the FAA guidelines as per title 14 CFR part 77, objects affecting navigable airspace. All wind turbines that have been issued an FAA Determination of Hazard should not be built.
