Kim Wissman, Executive Dir.  
Ohio Power Siting Board  
180 E. Broad St.  
Columbus, OH 43215

Dear Kim Wissman,

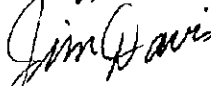

I am writing in opposition to Buckeye Wind, Case No.:08-0666-EL-BGN and Black Fork Wind, Case No.09-0546-EL-BGN and other such rural wind farms proposed for Ohio. I write to you and the entire board to plead, beg, and demand that you consider the entire body of new evidence which brings into question, in a real sense, the entire issue of global warming and the idea that more government and corporate greed will make it better. Please think about what you are doing to our state in the long run, and oppose the development of these wind farms. Prevent the destruction of mid-western Ohio.

I strongly believe that there will be a political price to be paid in Ohio if these projects are stamped for approval. I also believe that the average citizen of this great state does not want the landscape changed in this way. We don't want our government, federal or state, mandating use of large sums of our tax dollars to be used to fund even more government and corporate greed in the name of green energy tax credits.

At this point in our history, you have been given the authority and many, many reasons to save our state from ruin. I am a life long resident of Ohio and believe that "keeping OHIO Beautiful" is much more important than the possible, maybe, or maybe not of some fractional degree of change in temperature and all the scare tactics that go along with such a movement.

You are extremely important to me and the other residents of Ohio who don't even know yet what is about to land in their countryside. Please don't be pushed by politics and uncertain rhetoric.....Ohio's natural landscape will certainly be destroyed if you do.

Sincerely,

  
Jim Davis
