**Construction Notice
for the
Rebuild of the Foster-Bath/Sugarcreek-Greene 345 kV Line
And the Trebein-Glady Run 138 kV Designed Line
For the Greene County Airport Runway Extension**

Case No. 09 - 779 - EL - BNR

Dear Mr. Pawley:

This letter is confirmation and notification of completion of construction work performed on the above noted case for the Dayton Power and Light Company transmission line relocation project at the Greene County Airport. Specifically, construction started on October 19, 2009, with initial structural work on the replacement steel pole structures. All structural work, conductor relocation and placing the lines back in normal operation was completed on November 20, 2009. Clean up and right of way restoration followed, but this was not totally completed until the week of February 8, 2010, when the original steel pole structures could be removed from the project site on frozen ground without causing damage to the airport property.

Should you have any questions regarding the above information, or if you would like to meet at the project site any time to review the completed installation, please give me a call at (937) 776-8109 or call Greg Tokar at (937) 331-4647.

Sincerely,

A handwritten signature in black ink that reads "Philip D. Robertson".
