Docketing Case No.: 10-0176-EL-ATA

Notes: I like most are very pleased the electric rates for all electric homes will be restored but after seeing one of your members at a meeting in North Ridgeville Thursday night, I must say he was a poor representative from your legal department to speak for you. I found him uninformed and unprepared but neither was the rest of the panel. Since some for your budget moneys come from the utility companies I must count that as a factor. Your staff could not have looked to hard to see the electric usage of a all electric home. In many letters to you from my development we told you this and that the electric company gave builders money to help with paper advertisements also that there was a verbal contact between the electric company the builder and the buyer. The 400,000 all elect homes in Ohio are not being subsidized by the other costumers. We had to have an 80 gallon water tank or larger and spent money up front for better built homes to be more energy wise. When every you buy in large amounts the price is always less. I do not mind an increase but there must be a bulk discount. I also would not mind an increase if I know our nations grid was getting the money for improvements and not so Ohio Edison could buy out a PA electric company for 6.9 billion dollars. They can not service us now. Being bigger is not better, remember EN-RON and how Cleveland Airport went dark from salt build up on a transformer. I also found out at the meeting how First Energys bills are full of codes were I could be charged for there poor investments. Boy, the banks would love to have that deal. That's right we helped them out too. We are watching!! now more the every. A good deal for long term profits can be worked out. The key word is Long Term. Thank you don
