SECTION 6 – OPTIONAL CALLING FEATURES, (Cont'd.)

6.1 Optional Calling Features, (Cont'd.)

6.1.1 Description of Optional Calling Features, (Cont'd.)

Continuous Redial – Allows the Customer to automatically redial a number after having received a “busy” signal for up to thirty (30) minutes. A distinctive ring will let the Customer the line is no longer busy and the call will connect.

Per Line Number Blocking - Prevents the display of the calling telephone number on all calls dialed from an exchange service equipped with this option. It is not necessary to dial an activation code prior to placing the call.

Repeat Dialing - Allows the Customer to have calls automatically re-dialed when the first attempt reaches a busy number. The line is checked every 45 seconds for up to 30 minutes and alerts the Customer with a distinctive ringing pattern when the busy number and the Customer's line are free. The Customer can continue to make and receive calls while the feature is activated.

Three Way Calling - Allows the Customer to add a third party to an established connection. When the third party answers, a two-way conversation can be held before adding the original party for a three-way conference. The Caller initiating the conference controls the call and may disconnect the third party to reestablish the original connection or establish a connection to a different third party. The feature may be used on both outgoing and incoming calls.
