

**Case No. 10- 0097-EL-REN
Upper Scioto Valley Wind
Staff Interrogatories – Second Set**

Question 1: In section B of the application, the Name of the Facility Owner was left blank. A certificate is like a check, the renewable energy credits you receive from GATS can be traded for cash by the entity listed on the certificate. Most businesses use the legal name of the company or LLC, whereas most homeowners use their first and last names. What name of the facility owner would you like to appear on the certificate?

Answer 1: Scioto Valley Wind LLC

Question 2: In section G.2 you list the device specifications for the meter that will measure the output of the facility. For accuracy the specification states, “Better than 0.2% of reading (at 25 C, pf \geq 0.5) for most parameters.” Is watt hours one of those parameters? We require that facilities with a capacity greater than 6 kW measure the output of the facility with a utility grade meter that meets ANSI 12.1, which calls for an accuracy of +/- 2%.

Answer 2:

The meter must comply with 2001 ANSI C12.1 standards. As seen here <http://www.elkor.net/WattsOn.htm> the transducer meets ANSI C12.20 Class 0,2 Accuracy compliance.

Question 3: Section K.1 asks for the generation ID number that you have been assigned by GATS. You list 10-97. Most GATS numbers that have been supplied to us start with either MSET or NON followed by a set of numbers. Once you are certified as an Ohio renewable generation facility GATS will assign you a generation ID number, you

then have 30 days to submit this information to the PUCO. Will you comply with this requirement?

Answer 3:

The facility is not currently registered by GATS. However, once the state identification number is issued the GATS application will be complete and we will have a GATS certification number shortly. We will send updated GATS generation numbers to PUCO within 30 days of receiving them.
