To Whom It May Concern:

You had no right to allow First Energy to discontinue the All Electric Discount given out over 30 years ago in the early 1970's. This was a legal contract, both verbal, and written given to Builders of electric homes, and its residential customers (All Electric Homes) to encourage the building, and ownership of all electric homes! Nothing was ever mentioned about all electric discount being temporary! We demand that you give us our discount back on permanent basis now!
