PUCO

RE: Columbia Gas of Ohio, Inc.  
Construction Notice:  
South Avenue and South Detroit Avenue High Pressure Pipeline Replacement Project,  
Phase 4  
PUCO Case No. 09 - GA-BNR 10-0542 - GA-BNR

Dear Ms. Jenkins:

In accordance with Ohio Administrative Code (OAC) §4906-11-02, Columbia Gas of Ohio, Inc. (Columbia) hereby transmits one (1) original and eleven (11) copies of the enclosed proposed pipeline project known as the South Avenue and South Detroit Avenue High Pressure Pipeline Replacement Project, Phase 4.

This project will complete the last phase of work which was started in the summer of 2009. The first three phases were completed under OPSB Filing #09-345-GA-BNR. That case number was closed at the request of Mr. Jon Pawley, the OPSB case manager, when the construction work that was planned for 2009 finished up. Mr. Pawley suggested that Columbia Gas should apply for a new case number in 2010 rather than carrying the other number over from the previous year.

Please be advised of the following:

1. **Project Name:** South Avenue and South Detroit Avenue High Pressure Pipeline Replacement Project
2. **Project Description:** Columbia Gas of Ohio, Inc. plans to retire approximately 100 feet of 16" bare steel pipe and replace it with 12" treated steel pipe. One existing block valve setting is also scheduled to be retired and replaced with new facilities.

This is to certify that the images appearing are an accurate and complete reproduction of a case file document delivered in the regular course of business.  
Technician SM Date Processed APR 22 2010

This project meets the requirements of a Construction Notice at it falls under "rerouting or extension or new gas transmission line and associated facilities, not greater than one mile in length." (OAC 4906-1-01, Appendix B).

3. **Project Need:** Columbia Gas is performing this work due to the age and condition of the existing facilities.
4. **Schedule:** Construction is planned to start as early as July 1, 2010 and expected end by September 3, 2010.
5. **Capital Cost:** The capital cost of the project is estimated at \$345,000.00.
6. **Operating Features:** The proposed project includes approximately 100 feet of 12-inch high pressure steel main. The maximum allowable operating pressure will be 145 PSIG, although operating pressure is planned to be approximately 144 PSIG. All facilities will be installed inside of public right-of-way.
7. **Map and Directions:** A map of the project location is attached to this Construction Notice. In order to locate the proposed site, take US Route 23 west to OH 15 West. Take OH15 West to US Route 68 North. Take US Route67 North to Interstate 75 North. Take exit #192 onto Interstate 475 North. Take exit #8 and turn right on Airport Highway (OH 2). After approximately 3 miles take a right onto South Byrne Road. Then turn right on Glendale Avenue. Follow Glendale Avenue until it intersects with South Detroit Avenue. Follow South Detroit Avenue until it intersects with South Avenue. Turn left and follow South Avenue until you come to the RR tracks, just west of Thad Street.
8. **Easements / Land Agreements:** Columbia Gas does not require additional easement or Right of Way for this project.

After docketing this filing, please return one time-stamped copy of the Construction Notice for our records to us in the enclosed envelope. We have provided a copy of the Construction Notice by certified mail, with return receipt requested, to each official of the political subdivisions immediately affected by the proposed project as listed in the attached Exhibit 1. Copies of the transmittal letters addressed to the local government representatives of the City of Toledo and Lucas County are enclosed for your file.

Should staff of the Ohio Power Siting Board desire further information or discussion of this submittal, please contact me at (419) 539-6065.

Sincerely,

Thomas W. Jadlos
