TO THE PUCO :ABOUT CASE #10-388-EL-SS)

April 17, 2010

Dear PucO,

I have been very upset with all the increases to my electric bill in the past year and now I hear there will be even more. I am 87 and came from Germany 1956. I never know of a company to keep charging more and more and more in such a short time. I am on fixed income and pay hundreds of dollars each month just for medicine I need. Family helps me when they can. I live alone and can't afford a higher electric bill. I have to keep my house colder in the winter than I like-68. Why don't the electric company take care of their equipment all along instead of doing it all at once. Maybe there wouldn't have been bonuses at times but sometimes you don't make so much. I thought you made extra money when you do a good job and not just ask all of us to pay extra for expense that comes with what you sell us, electricity. How can we buy our food and medicines pay house taxes when we not know how much the electric will cost us next week. Everyone hurting now. Why can't the elec company make a little less for a while and cut back in their lives like all of us. I can't go to those meetings to talk is why I am writing.
