

Case No.: 10-0362-EL-REN

Date: 5/11/10

Subject: Addendum filed in response to missing Section O

To Whom It May Concern:

Sol Systems was notified May 10, 2010 of a missing Section O for Case No. 10-3062-EL-REN. Sol Systems has provided a completed Section O for this case below.

O. Start date for reporting generation data to an attribute tracking system

The operational start date for the subject system in Case No. 10-0362-EL-REN was December 22, 2009. Prior to the operational start date, a utility grade dedicated solar meter was installed at the property and calibrated to read "0 KILOWATTHOURS". The methodology employed in determining the specific generation output that would be reported to the attribute tracking system for the period from the operational start date and the date the facility is scheduled to be certified would be to subtract "0" from the current meter reading. Or, as indicated below:

Reported Meter Reading = Meter Reading at time of Certification – Meter reading at time of installation

Sol Systems thanks you for notifying us of the missing Section O.

Regards,

Sol Systems
