

Dear Matt Partymiller:

Hello. I am sending you questions related to the review of your Application for Certification as an Ohio Renewable Energy Resource Generating Facility. The responses to these questions will make it possible for Commission Staff to perform a comprehensive and timely review of your application. Please file your responses in the PUCO Docketing Information System under case number 10-0809-EL-REN. Feel free to copy and paste the questions into a word document in order to provide your answers and/or photos for the purpose of e-filing the document.

The application will be approved 60 days after the date the application and affidavit were submitted, unless it is suspended or denied by the commission, therefore please submit your responses within 5 business days to avoid the case being suspended. Make sure that you file/title your responses as 'reply to staff inquiries'. If you have any questions, please feel free to reply to this email or call (614)466-6493.

Thank you.

Krystina Schaefer

Public Utilities Commission of Ohio

DRAFT This document was created only for the purpose stated within it. It is for staff discussion only and does not reflect the view of the Commission.

**Case No. 10-0809-EL-REN
Stocker Residence Solar Array
Staff Interrogatories – Initial Set**

Question 1: On April 6, 2010 a revised version of the application for certification as an Ohio Renewable Energy Resource Generating Facility became available which included an additional Section O. After April 16, 2010 the old versions of the application were no longer accepted. Since the application which was used for your application was an older version please fill out Section O below to update the information necessary for the newest application.

Answer 1:

,

O. Start date for reporting generation data to an attribute tracking system

In the Commission's June 17, 2009 Entry on Rehearing in Case No. 08-888-EL-ORD, the Commission found it to be appropriate to recognize the creation of RECs back to July 31, 2008, when the Ohio alternative energy portfolio standard law became effective, provided that the facility was a participant in an existing attribute tracking system during that time, or had a meter in place which can accurately demonstrate generation levels from July 31, 2008, forward (page 34). If the facility is not registered with and reporting to an attribute tracking system please provide a methodology and documentation which will support the specific generation output that would be reported to the attribute tracking system for the period from the placed-in-service date of the facility to the date the facility is scheduled to be certified, which is usually 61 days from the filing date of the application. The documentation may include dated photographs of the inverter and utility

grade meters, written documentation of meter and inverter readings and measures, and entries of meter readings in a spreadsheet.

INSERT PHOTOGRAPH(S) OR DOCUMENTATION - see following

Please state the specific start date that will be used to report generation output to the attribute tracking system, either the placed-in-service date or other: 6/2/10, placed in service date

In the Commission's Entry on Rehearing, the Commission explained that consistent with its policy on double counting, the Commission will not retroactively recognize any past RECs which have been sold or otherwise consumed (page 34).

Has any of the generation of the facility been tracked as RECS that have been sold or otherwise consumed? No NO
