**Letter of Notification
Evergreen-Ivanhoe 138 kV Transmission Line
To Marvin Group Start of Construction
Case No. 10-0597-EL-BLN**

Dear Mr. Lambeck,

This letter is in response to the Letter of Notification on the above referenced project filed on April 30, 2010, and approved June 28, 2010. The Letter of Notification indicated that construction on the project will begin on approximately July 2, 2010 and we had previously notified you that we expected construction to begin on or shortly after September 4, 2010. In letters dated September 14, 2010 and October 1, 2010 we provided supplemental engineering information on the project to the OPSB staff, and we deferred start of construction pending the OPSB staff's review of the supplemental engineering information. Based on our conversation this morning, I understand that the OPSB staff has no objections with construction starting on the project and we therefore plan to begin construction on the project as soon as possible and expect that construction will likely start on October 14, 2010. We will notify you once the project has been completed.

If you have any questions regarding this project, please contact Scott Humphrys at (330) 384-2526 or me at (330) 761-4268.

Sincerely,

Ted Krauss

General Supervisor Transmission Siting, ROW
Engineering and Survey
Energy Delivery Transmission and Substation Design
FirstEnergy Service Company
