Subject: Tell Duke No Nuke! We Want Low-Cost Efficiency and Renewables!

Feb 11, 2011

Public Utilities Commission

Docket # 10-503

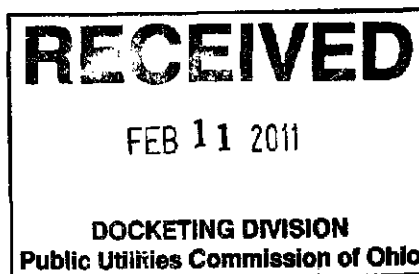

Ohio utilities rely too heavily on dirty and expensive fossil fuels. Ohio's new law that requires utilities to invest in efficiency and renewables is a step in the right direction - creating jobs, protecting public health, and cleaning our air. But Duke wants to be let off the hook for its efficiency responsibilities and has proposed to build an expensive new nuclear plant instead. Please hold Duke accountable! Ohioans want efficiency and renewables - not a new nuclear plant!

Many market potential studies have proven that it's cost effective for Duke to go well beyond its efficiency requirements, and many renewable technologies are far cheaper than building a nuclear plant. Efficiency and renewables are the most cost effective ways of shielding consumers from high energy costs and protecting the environment.

If Duke is let off the hook for its energy efficiency requirements, every utility in the state may try to follow suit. Please protect all customers and the environment through strong enforcement of SB221.

Sincerely

Mr. Kurtis Helman

Subject: Spam: Spam: Case No. 10-176-ET-ATA the All-Electric Home Discount

I own an all-electric home and am writing to get your support to have the PUCO permanently reinstate the discount: Case Number 10-176-EL-ATA.

I am lucky enough to be working. But where I work we did not receive a pay raise in 2009 or an end of year bonus. It is 2010 and

I am trying to survive on the income I was making two years ago. Yet First Energy is raising utility prices to ridiculous

levels. I didn't get a 60 to 100 percent pay increase last year. But my electric bill has increased that much!

You need to intervene and stop the uncontrolled greed of First Energy.

The following need to be done as a permanent solution regarding the all-electric home discount:

1. A permanent, all-electric rate differential on generation and distribution charges for nine months of the year for

all-electric heating, load management, and water heating customers that stays with the property upon transfer to a

new owner, including homes, apartments, and condos.

The rate differential should be equivalent to the pre-2007 declining block structure.

2. The rate differential should be given to EVERY property, even those currently excluded because they were built

or converted to all-electric after Jan 1, 2007.

3. Overcharges made by FirstEnergy between May 2009 and May 2010 should be refunded in full.

4. FirstEnergy must NOT raise the rates of other ratepayers, but rather absorb the cost of this program which benefited FirstEnergy for the last 30 years.

FirstEnergy made verbal and written promises to owners and builders alike to entice them to go all-electric, and they must not be allowed to break these promises and charge others for their breach of contract!

At the end of 2009 I owed a difference of \$500. My first bill in January, 2010 I owed a difference of \$300. In one month I owed a difference that was 60% of the entire previous 12 months.

Every two months I am making the equivalent of a mortgage payment that is going the Electric company not my mortgage holder.

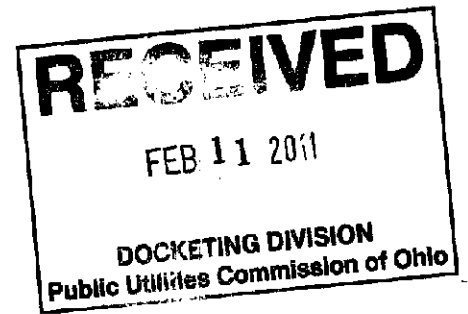

Without the above four actions taking place Ohio will have hundreds of thousands of homes that can not be sold because the high cost of electricity to all-electric homes. This will create another housing catastrophe.

Sincerely,
Lloyd Amster

Subject: Spam: COLLABORATE WITH ME AND...

From The Desk of: Mr. Tim J.W. Tookey
Group Finance Director of
Lloyds Banking Group
25 Gresham Street, London EC2V 7HN
www.lloydsbankinggroup.com

Good day,

I am Mr. Tim J W Tookey, the Group Finance Director of Lloyds Banking Group. I personally discovered a dormant account with a total sum of \$85,000,000.00 [EIGHTY FIVE MILLION DOLLARS] during our Bank's Annual Year Account Auditing.

Since the death of the deceased, nobody has operated in this account till date. Moreover, this account has NO BENEFICIARY attached to it.

Definitely, this fund will be confiscated by our BANKING CODE OF ETHICS if it remains dormant for a period of [10] year without any claims.

In this regard, I earnestly need your full cooperation in transferring this money out of our bank to avoid our bank confiscating this fund.

HOW THE TRANSACTION CAN BE HANDLED:

As the group finance director of our bank, all client's account details and files are in my possession and that makes it easy for me to include your name as the beneficiary of the fund in all necessary documents involving the money we wish to transfer out from our bank.

Most importantly, you will be required to:

- (1). Act as the original beneficiary of the funds.
- (2). Receive the funds into a business/private bank account.
- (3). At the completion of this transaction, the sharing rates shall be 50% for me while 50% for you.

Note: I will split the transfer into two 2 stages for easy and smooth transfer.

Firstly, the sum of \$80,000,000.00 will transfer to any valid foreign account you will nominate, then upon a successful transfer without any disappointment from our side; I will then fly to meet you in your home destination for sharing, thereafter we will jointly transfer the remaining balance of \$5,000,000.00. I will also like us to invest some part of the money in your country.

If you accept to work with me, you will be given 50% of the total money as your share and 50% for me. So the main question is, will you partner me in this transaction?.

If you are willing to cooperate in this project, Kindly view my identification link below and also contact me through my private email (tookeytim2011@live.com) In the meantime, I suggest we communicate strictly via electronic post(email).

I AWAIT YOUR URGENT REPLY.

Yours Truly,
Tim J.W. Tookey
