

## Case No. 11-0082-EL-REN

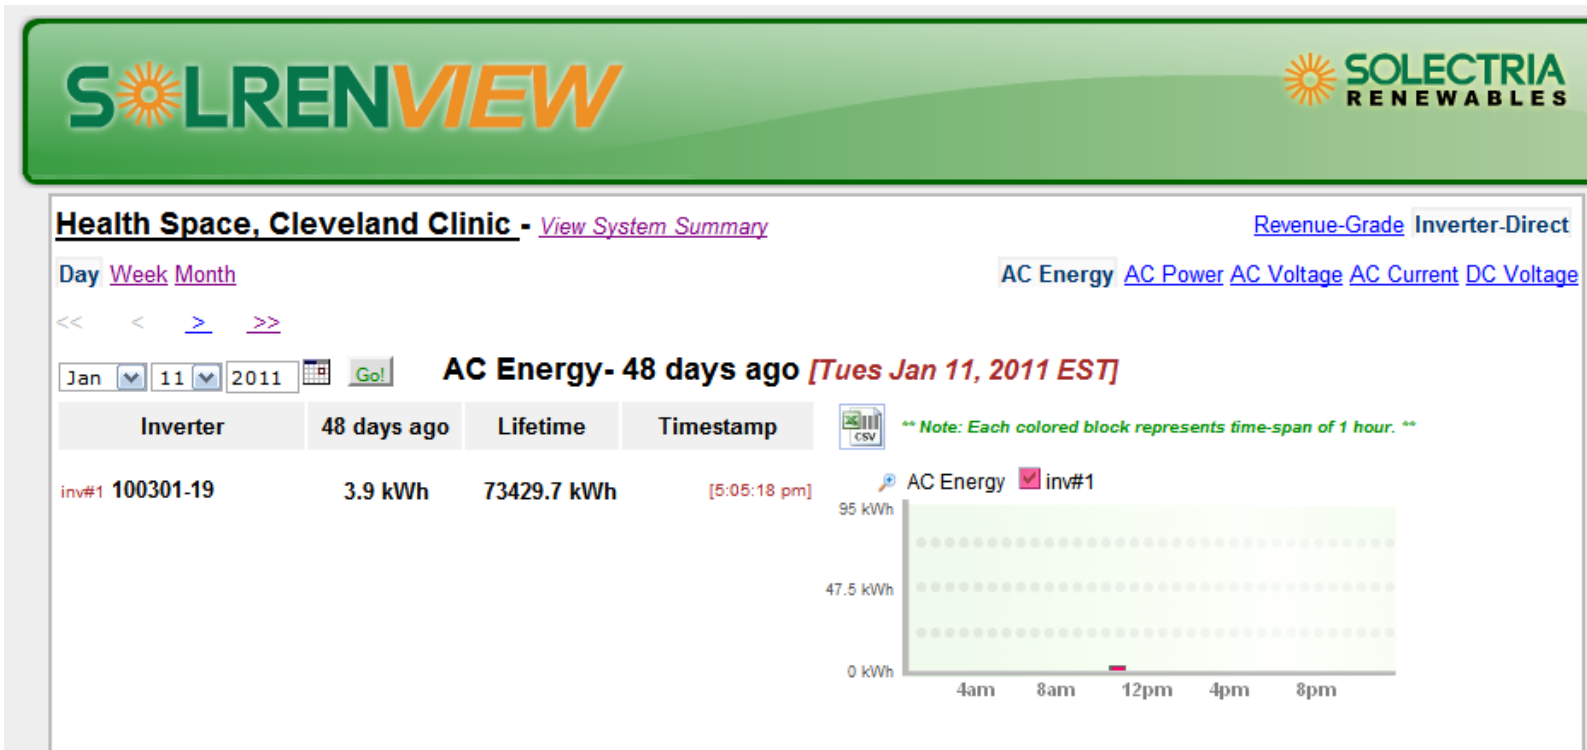

### Health Space PV System

#### Staff Interrogatories – Second Set

Question 1: In your response to the initial interrogatory you stated the remote monitoring system was connected 1/10/11. If you would like to start counting generation from that date submit documentation from the remote monitoring system that shows your system was generating on that date. Lack of documentation will result in the certification date being the date your can start reporting from.

Answer 1:

The remote monitoring system started to track generation data on 1/11/2011. See the below screen shot from the system showing that generation took place on 1/11/2011.
