Letter of Notification
Bayshore-Maclean-Lemoyne 138 kV Transmission
Line Reconductoring and Intermediate Structure Placement Project
Case No. 10-1149-EL-BLN

Dear Mr. Lambeck,

This letter is in response to the Letter of Notification on the above referenced project filed on August 13, 2010, and approved February 7, 2011. In accordance with Ohio Administrative Code § 4906-5-02(A) (5), please be advised that construction on this project is expected to begin on or shortly after March 7, 2011. We will notify you once the project has been completed.

The OPSB staff report listed one condition for this project. This condition applies to only one property crossed by the project as existing easements provide the necessary rights to construct the balance of the project. We have reached a verbal agreement for this easement with the representative of the owner of this parcel, -a cousin of the owner who farms the property, who has assured us that the property owner will sign the easement. The property owner is currently in Florida and we intend to obtain the signed easement as soon as practical. We plan to begin construction on the balance of the project and will only begin work on this last parcel after we have the signed easement.

If you have any questions regarding this project, please contact me at (330) 384-2526.

Sincerely,

Scott M. Humphrys
Associate Distribution Specialist
Energy Delivery Transmission and Substation
Design
FirstEnergy Service Company
