RECEIVED-DOCKETING DIV

To whom it may concern:

This notice is concerning the Public Utilities Commission of Ohio, Case No. 10-2863-RR-STP, and authorization of the Indiana & Ohio Railway to install an Active Grade Crossing Warning Device in Champaign County.

The original PUCO order stated that site plans and cost estimates be submitted to both the PUCO Rail Division and ORDC no later than March 08, 2011. Preliminary site plans and estimates were submitted on March 07, 2011, via Docket System and email, however, the PUCO has deemed the information provided to be insufficient to move forward with this project at this time. The IORY respectfully requests that an extension of the original due date, to April 11, 2011, be granted to allow for revision of the previously submitted exhibits.

We are providing this notification of delay for your records, and request formal acceptance of the extension request for our file records.

Should you need to further discuss this matter or have any questions or comments, I can be reached at (904) 538-6057.

Sincerely,

Charles A. Stone
General Director Engineering Services
