(B) (Cont'd)

(5) Presubscription Charge Application (Cont'd)

(f) Interexchange Carrier Pays Billing Option

The Interexchange Carrier Pays (IC Pays) Billing Option is an agreement between the Telephone Company and an Interexchange Carrier (IC) under which the Presubscription (PIC) change charge is assessed to the IC instead of being charged to the end user customer when the Telephone Company changes an end user's primary IC assignment.

The PIC change may be requested via an IC-provided end user or an agent list submitted in the Customer Account Record Exchange (CARE) format (IC Pays – Carrier Initiated) or by the end user customer directly to the Telephone Company (IC Pays – Customer Initiated).

ICs that subscribe to "IC Pays – Carrier Initiated" have the option to redirect billing of the PIC change charge on a case by case basis.

For ICs that subscribe to "IC Pays – Customer Initiated", all billing of end user PIC changes to the IC's CIC (and at the IC's option, changes from the IC's CIC to "No PIC") initiated through the Telephone Company will be redirected to the IC. (N) (N)

The IC submitting the PIC change must sign an IC Pays Billing Option agreement with the Telephone Company for either of the IC Pays Billing Options to apply.

When these conditions have been met, the end user customer will not be assessed the Presubscription change charge for the PIC change. The IC participating in the IC Pays Billing Option will be charged the Presubscription change charge per line or trunk as set forth in Section 4.2 (C) following.
