COMPLAINT DESCRIPTION:

why are you letting firts energy jam light bulbs down our throats and then charge us regardless. in fact you have allowed them to charge us and not even give them out. i have already updated many of my lights and should not, and will not be charged for them to distribute out-dated lights. then we have to question why you would allow them to distribute bulbs with mercury in them when it should be led technology. you make no sense. if you want to push people to save energy, push them to led not flourescent. if you would do that, it would drive down the cost of led's and everyone would be able to afford them. instead of charging households create grants to change city lights that use old mercury vapor technology that just eat electric. pushing street lights and citioes to led technology is a much

bigger savings than changing fluorescent bulbs in a light bulb. are you really this dumb. anyway i am filing my complaint now to stop first energy from charging me for lights bulbs that i will not use. once again you must put a stop to this. i honestly cannot believe you approved it. it is obviously politically driven to help GE and the white house. if you want people to save energy, you would get us discounts on LED. i have spent hundreds of dollars to reduce my electric and LED is the only way to go! besides everyone is going to throw the mercury filled flouresecent bulbs in the trash, then it is in our land fills. are you really this dumb to allow this to happen!
