TARIFF FORMAT

- A. Sheet Numbering** - Sheet numbers appear in the upper right corner of the page. Sheets are numbered sequentially. When a new sheet is added between sheets already in effect, a decimal is added. For example, a new sheet added between sheets 14 and 15 would be 14.1.
- B. Sheet Revision Numbers** - Revision numbers also appear in the upper right corner of each page. These numbers are used to determine the most current sheet version on file with the Commission. For example, the 4th revised Sheet 14 cancels the 3rd revised Sheet 14. Consult the Check Sheet for the sheet currently in effect.
- C. Paragraph Numbering Sequence** - There are nine levels of paragraph coding. Each level of coding is subservient to its next higher level:
- 2.
 - 2.1.
 - 2.1.1.
 - 2.1.1.A.
 - 2.1.1.A.1.
 - 2.1.1.A.1.(a).
 - 2.1.1.A.1.(a).I.
 - 2.1.1.A.1.(a).I.(i).
 - 2.1.1.A.1.(a).I.(i).(1).
- D. Check Sheets** - When a tariff filing is made with the PUC of Ohio, an updated Check Sheet accompanies the tariff filing. The Check Sheet lists the sheets contained in the tariff, with a cross reference to the current revision number. When new sheets are added, the Check Sheet is changed to reflect the revision. All revisions made in a given filing are designated by an asterisk (*). There will be no other symbols used on this sheet if these are the only changes made to it (i.e., the format, etc. remain the same, just revised revision levels on some sheets.)

SECTION 2 - RULES AND REGULATIONS, CONT'D.

2.19 Service Provider Number Portability

SPNP-LRN depends on AIN/IN technology. LRN is a 10 digit number used to uniquely identify a switch that has ported numbers. The LRN for a particular switch must be a native NPA-NXX assigned to the local exchange provider for that switch and serves as a network address. Telecommunications Carriers routing telephone calls to an end-user that has ported their telephone number from one Telecommunications Carrier to another must perform a database query to obtain the LRN that corresponds to the dialed telephone number. The N-1 telecommunications provider (the next to the last terminating carrier) is responsible for determining the LRN for the call being terminated. The database query is performed for all calls where the NPA-NXX of the called number has been marked in the switch as portable. The Telecommunications Carrier routes the call to the appropriate Telecommunications Carrier based on the LRN.

Service Provider Number Portability (SPNP) is only available to telecommunication carriers for use in the provision of a telecommunications service as specified and to the extent required by the Telecommunications Act of 1996, Pub. L. No. 104-104, 110 Stat. 56 (1996) ("the Act") and the rules and regulations of the Federal Communications Commission and the Public Utilities Commission of Ohio.

Service Provider Number Portability is a service arrangement provided by the Company to Telecommunication Carriers whereby a customer, who switches subscription to local exchange service from the Company to a Telecommunication Carrier is permitted to retain for their use the existing Company assigned telephone number provided that the customer's service location remains within the same Company rate center.

SECTION 2 - RULES AND REGULATIONS, CONT'D.

2.19 Service Provider Number Portability, (Cont'd.)

2.19.1 Rules and Regulations

SPNP service is only available to Telecommunication Carriers.

SPNP service and facilities will only be provided where technically feasible, subject to the availability of facilities and pursuant to FCC Docket No. 95-116 and PUCO Case No. 95-845-TP-COI, and may only be furnished from properly equipped central offices. SPNP service and facilities are not offered for Mass-Calling NXX Codes, NXX Codes 555, 976 and 960.

General Regulations as found in this Tariff apply to this Section unless otherwise specified in this Section. The term "customer", which appears herein, is the equivalent of the term "telecommunication carrier" as used in this Section.

Telecommunication Carriers will be assessed Local Number Portability (LNP) Query Charges as defined in the Company's FCC Access Services Tariff, as SPNP-LRN becomes available in an area if the Company performs an LNP database query on behalf of the Telecommunications Carrier.

Interim Arrangements (SPNP-Remote and SPNP-Direct) are only available to Telecommunications Carriers in areas where SPNP-Location Routing Number (LRN) is not available. Telecommunications Carriers shall migrate from Interim Arrangements to SPNP-LRN as soon as practicable, but no later than 120 days from the last day which the FCC has mandated SPNP-LRN be available in a particular Metropolitan Statistical Area (MSA). Requests for Interim Arrangements will also not be processed after the last days which the FCC has mandated SPNP-LRN be available in a particular Metropolitan Statistical Area. (MSA). The parties shall provide long-term number portability to each other in accordance with rules and regulations prescribed by the FCC and/or the PUCO.

Should a dispute or discrepancy arise regarding the authority of a Telecommunication Carrier to act on behalf of the end-user, the Telecommunication Carrier is responsible for providing a signed letter of authorization, to the Company. In the event that the Telecommunication Carrier is unable to provide such authorization, the Company may either refuse to disconnect the end-user's service and establish SPNP service are requested by the Telecommunication Carrier or, where the conversion from en-user to SPNP service has already occurred, my choose to restore the end-user's prior service with the Company and terminate the SPNP service for that particular end-user. In such event, the Telecommunication Carrier is responsible to compensate the Company for its cancellation costs if the end-user's service had not been disconnected and SPNP service had not yet been established or to pay all applicable restoral costs for terminating the SPNP service and restoring the end-user's prior service with the Company.

In the event that the Company determines in its sole judgment that Telecommunication Carrier will likely impair or is impairing, or interfering with any equipment, facility or service of the Company or any of its end-users, the Company may either refuse to provide SPNP service or terminate it in accordance with other provisions of the Company's tariff.

The Telecommunication Carrier is responsible for providing an appropriate intercept announcement service for any telephone numbers subscribed to SPNP service for which it is not presently providing local exchange service or terminating to an end-user.

The Telecommunication Carrier is responsible for designating to the Company at the time of its initial service request for SPNP service one for the following options for the handling and processing of Calling Card, Collect, third party, and other operator handled non-sent paid calls from or to SPNP assigned telephone numbers: (1) the Connecting-Carrier may request that the Company block all such calls; (2) the Telecommunication Carrier may accept billing from the Company for such calls; or (3) the Telecommunication Carrier may negotiate a separate, detariffed billing and collection agreement with the Company establishing the calling handling, processing and billing responsibilities of the parties.

2.19 Service Provider Number Portability, (Cont'd.)

2.19.4 Limitations of Service

The Company is not responsible for adverse effects on any service, facility or equipment from the use of SPNP service.

3.2 Timing of Calls

Where applicable, the following rate period and timing parameters apply:

- 3.2.1** Initial Period - The initial period is the length of a call for minimum billing purposes. The initial period varies by rate schedule and is specified in individual product rates sections of this tariff.
- 3.2.2** Additional Period - The additional period is the rate element used to bill chargeable time when a call continues beyond the initial period. The additional period starts when the initial period ends. Additional period rates apply to any fraction of the time period for chargeable time beyond the initial period. Additional periods vary by rate schedule and are specified in the individual product rates sections of this tariff.
- 3.2.4** Chargeable time for all calls ends when one of the parties disconnects from the call.
- 3.2.5** Time of day designations are used in this tariff to indicate rate period boundaries. Rate periods begin at the first time of day designation and continue up to but not including the second time of day designation.

SECTION 3 - DESCRIPTION OF SERVICE AND RATES, CONT'D.

3.3 Calculation of Mileage and Rate Bands

For mileage-sensitive schedules, the distance between the originating and terminating points is calculated by using the "V" and "H" coordinates of the rate centers as defined by BellCore (Bell Communications Research), in the following manner:

- Step 1: Obtain the "V" and "H" coordinates for the rate center or network access point serving the Customer's location and the called/calling station.
- Step 2: Obtain the difference between the "V" coordinates. Obtain the difference between the "H" coordinates.
- Step 3: Square the differences obtained in Step 2.
- Step 4: Add the squares of the "V" difference and "H" difference obtained in Step 3.
- Step 5: Divide the sum of the square obtained in Step 4 by ten (10). Round to the next higher whole number if any fraction results from the division.
- Step 6: Obtain the square root of the whole number obtained in Step 5. Round to the next higher whole number if any fraction is obtained. This is the distance between the originating and terminating locations of the call.

Formula:

$$\sqrt{\frac{(V_1 - V_2)^2 + (H_1 - H_2)^2}{10}}$$

SECTION 3 - DESCRIPTION OF SERVICE AND RATES, CONT'D.

3.4 Network Switched Service

3.4.1 General

Network Switched Service is provided via one or more channels terminated at the Customer's premises. Each Network Switched Service channel corresponds to one or more analog, voice-grade telephonic communications channels that can be used to place or receive one call at a time.

Network Switched Service provides a Customer with a connection to the Company's switching network which enables the Customer to:

- receive calls from other stations on the public switched telephone network;
- access the Company's local calling service;
- access the Company's (or its underlying carrier's) operators and business office for service related assistance; access toll-free telecommunications services such as 800 NPA; and access 911 service for emergency calling; and
- access the service of providers of interexchange service. A Customer may presubscribe to such provider's service to originate calls on a direct dialed basis or to receive toll-free service from such provider, or may access a provider on an ad hoc basis by dialing the provider's Carrier Identification Code (such as 10XXX or 101XXXXX).

Business or Residential Access Lines are provided for connection to Customer-provided terminal equipment. Nonrecurring, recurring, and usage charges apply as described herein.

The local calling area (i.e, exchange and EAS calling) mirrors the local calling area for basic local exchange service provided by the incumbent local exchange company for the same exchange.

A white pages standard directory listing is included with each unit of wireline service.

3.5.3 Customer Local Area Signaling Services (CLASS) Blocking

A. Per Call Blocking (Calling number delivery blocking)

This blocking enables Customers to prevent the disclosure of their telephone number on a per call basis to the called party. The disclosure of the calling party's number can be prevented on a per call basis by dialing *67 from a touch-tone phone, or 1167 from a rotary dial phone, to activate the block. This action must be repeated each time a call is made to prevent the disclosure of the calling party's telephone number. If the called party has a display device, a privacy indication will appear instead of the calling party's telephone number. Per Call Blocking will be provided on a universal basis to all eligible customers. All public and semi-public payphones of the Company will be equipped with Per Call Blocking. This service will be provided free of charge.

B. Per Line Blocking (Calling Number Delivery Suppression)

This blocking enables Customers to prevent the disclosure of their telephone number on all outgoing calls, without the necessity of an activation code. If the called party has a display device, a privacy indication will appear instead of the calling party's telephone number. Per Line Blocking will be provided at no monthly charge on an optional basis to published and non-published customers at their discretion. To deactivate the privacy status, the Customer must dial *82 from a touch-tone phone or 1182 from a rotary dial phone before placing a call. After completion of the call, the line reverts back to the privacy status. Law Enforcement, domestic Shelters and other special agencies will be offered free Per Line Blocking. Per Line Blocking will not be available to public, semi-public, two-party and four-party service Customers.
