Re: Dominion East Ohio Gas, Countywide Landfill Case No. 09-1960-GA-BLN

Dear Ms. McCauly:

In compliance with the Staff Investigation Report and Recommendation ("Staff Report") No. 7, Dominion East Ohio Gas ("DEO") submits for Staff review and approval the following plan for removal or abandonment-in-place of the existing pipeline:

The project will change the location of a major portion of the existing 20-inch High Pressure mainline L#6123 that traverses the Countywide Landfill. Approximately 2994 feet of existing 20-inch mainline will be cut, purged and abandoned in place as noted on pages 3 and 4 of the attached drawings. The new location of the replacement pipeline will allow Countywide to be able to use additional property for landfill activity. DEO contractor shall make the south tie in into the existing mainline at station 0+00 as shown on page 2 of 4 of the attached drawings. The new mainline shall be routed as shown to the eastside of the property. The new mainline will eventually be installed to the west to tie back into the existing mainline at station 70+00, as shown on page 3 of 4 of the attached drawings.

With the filing of this plan, DEO has complied with all the Staff's recommendations as set forth in the Staff Report. DEO plans to begin construction of this project approximately June 13, 2011.

If you have any questions, please call me at the number listed above.

Sincerely.

Sally W. Bloomfield
