## SECTION 6 – OPTIONAL CALLING FEATURES

### 6.1 Optional Calling Features

Optional Calling Features are made available on an individual basis, as part of multiple feature packages or as part of a bundled service. All features provided are subject to availability. Certain features may not be available with all classes of service.

#### 6.1.1 Description of Optional Calling Features

**Call Blocking** - Permits the Customer to automatically reject incoming calls when the call originates from a telephone number which has blocked delivery of its calling number.

**Caller ID** - Allows the Customer to preview the number of an incoming call before the call is answered. Caller ID records the number, date and time of each incoming call. Caller ID requires the use of specialized Customer Premises Equipment (CPE) not provided by the Company. It is the responsibility of the Customer to provide the necessary CPE.

**Caller ID with Name** - Allows the Customer to preview the name associated with the number of an incoming call. Caller ID records the name, date and time of each incoming call. Caller ID requires the use of specialized Customer Premises Equipment (CPE) equipment not provided by the Company. It is the responsibility of the Customer to provide the necessary CPE.

**Call Forwarding** - This service allows the Customer to automatically forward all incoming calls to another telephone number.

**Call Return** - This service allows the Customer to return a call to the last incoming call. Upon activation, the number will be redialed automatically every 45 seconds for up to 30 minutes or until a connection is established. The Customer is alerted with a distinctive ringing pattern when the busy number is free. When the Customer answers the ring, the call is then completed. The calling party's number will not be delivered or announced to the call recipient under any circumstances.

**Call Trace** - Allows the tracing of nuisance calls. The tracing is activated upon entering the specified dial code. The originating telephone number, outgoing trunk number or terminating number, and the time and date are generated for every call.

**Call Waiting** - This service permits the Customer engaged in a call to receive a tone signal indicating a second call is waiting and, by operation of the switch hook, to place the first call on hold and answer the waiting call. The Customer may alternate between the two calls by operation of the switch hook, but a three-way conference call cannot be established.

---

SECTION 6 – OPTIONAL CALLING FEATURES, (Cont'd.)

6.1 Optional Calling Features, (Cont'd.)

6.1.1 Description of Optional Calling Features, (Cont'd.)

Continuous Redial – Allows the Customer to automatically redial a number after having received a “busy” signal for up to thirty (30) minutes. A distinctive ring will let the Customer the line is no longer busy and the call will connect.

Per Call Number Blocking – Prevents the display of the calling telephone number on an individual call when the caller dials an activation code prior to placing the call.

(N)  
(N)

Per Line Number Blocking - Prevents the display of the calling telephone number on all calls dialed from an exchange service equipped with this option. It is not necessary to dial an activation code prior to placing the call.

Repeat Dialing - Allows the Customer to have calls automatically re-dialed when the first attempt reaches a busy number. The line is checked every 45 seconds for up to 30 minutes and alerts the Customer with a distinctive ringing pattern when the busy number and the Customer's line are free. The Customer can continue to make and receive calls while the feature is activated.

Three Way Calling - Allows the Customer to add a third party to an established connection. When the third party answers, a two-way conversation can be held before adding the original party for a three-way conference. The Caller initiating the conference controls the call and may disconnect the third party to reestablish the original connection or establish a connection to a different third party. The feature may be used on both outgoing and incoming calls.

This modification does not automatically result in a change in the prices, terms, or conditions of those services to which you currently subscribe.
