Call Transfer: Allows a station line user to transfer any established call to another station line inside or outside the Subscriber group without the assistance of the attendant.

2.39 Directory Listings

- (A) The Company does not publish a directory of subscriber listings. The Company, however, does arrange for the Subscriber's main billing number to be placed in the directory of directories of the dominant local exchange carrier.
- (B) The rates and regulations specified herein for directory listings apply only to the alphabetical section of the directory. Listings are intended solely for the purpose of identifying subscriber's telephone number and as an aid to the use of telephone service.
- (C) The listings of subscribers, either without charge or at the rate specified within this tariff for other listings are arranged alphabetically and are not intended for special prominence of arrangement. In accepting listings as requested by subscribers or prospective subscribers, the Company will not be a party to controversies between subscribers as result of the publication of such listings in the directories.

REGULATIONS

2.39 Directory Listings (cont.)

- (D) Listings must conform to the Company's specifications with respect to the directories. The Company reserves the right to reject listings which in, its sole judgment, such listings would violate the integrity of company records and the directories, confuse individuals using the directory, or when the Subscriber cannot provide satisfactory evidence that he or she is authorized to do business as requested.
- (E) The Company reserves the right to limit the length of any listing to one line in the directory by use of abbreviations when, in its sole judgment, the clearness of the listing and the identification of the subscriber is not impaired.
- (F) Generally, the listed address is the location of the subscriber's place of business.
- (G) In the event the Company omits a Subscriber's listing from the white pages of the telephone directory or lists an incorrect phone number, the Company shall issue the Subscriber a credit for the equivalent of not less than three months local service charges. Such credit shall not apply in cases where the Subscriber has provided such listing information after the deadline for directory publication. The Subscriber shall be given the option of taking the credit or pursuing other remedies.
- (H) Generally, a business listing consists of a name or dual name, a designation descriptive of the subscriber's business if not self-explanatory, the address, and business telephone number. The main listing is ordinarily the name of the individual, firm or corporation which contracts for the service or the name under which a business is regularly conducted.

REGULATIONS

2.40 Cancellation of Service by the Subscriber

- (A) Subscriber may cancel service by providing 30 days written notice to the Company.
- (B) If a Subscriber cancels a Service Order or terminates services before the completion of the term for any reason whatsoever other than a service interruption (as defined in Section 2.25, supra), the Subscriber agrees to pay to the Company termination liability charges, as defined below. These charges shall become due and owing as of the effective date of the cancellation or termination and be payable within the period, set forth in Section 2.35.
- (C) The Subscriber's termination liability for cancellation of service shall be equal to:
 - (1) all unpaid Non-Recurring charges reasonably expended by the Company to establish service to the Subscriber; plus
 - (2) any disconnection, early cancellation or termination charges reasonably incurred and paid to third parties by the Company on behalf of the Subscriber; plus
 - (3) all Recurring Charges specified in the applicable Service Order Tariff for the balance of the then current term discounted at the prime rate announced in the Wall Street Journal on the third business day following the date of cancellation; minus
 - (4) a reasonable allowance for costs avoided by the Company as a direct result of the Subscriber's cancellation.

REGULATIONS

2.41 Cancellation of Application for Service

- (A) Where, prior to cancellation by the Subscriber, the Company incurs any expenses in installing the service or in preparing to install the service that it otherwise would not have incurred, a charge equal to the costs incurred by the Company, less net salvage, shall apply, but in no case shall this charge exceed the sum of the charge for the minimum period of services ordered, including installation charges, and all charges others levy against the Company that would have been chargeable to the Subscriber had service commenced (all discounted to present value at six percent).
- (B) Where the Company incurs any expense in connection with special construction, or where special arrangements of facilities or equipment have begun, before the Company receives a cancellation notice, a charge equal to the costs incurred by the Company, less net salvage, applies. In such cases, the charge will be based on such elements as the cost of the equipment, facilities, and material, the cost of installation, engineering, labor, and supervision, general and administrative expense, other disbursements, depreciation, maintenance, taxes, provision for return on investment, and any other costs associated with the special construction or arrangements.
- (C) The special charges described in 2.41(A) and 2.41(B) will be calculated and applied on a case-by-case basis.

Cancellation or termination for service interruption is permitted only if any circuit experiences a single continuous outage of 8 hours or more or cumulative service credits equaling 16 hours in a continuous 12-month period. The right to cancel service under this provision applies only to the single circuit that has been subject to the outage or cumulative service credits.

The Company expressly retains the right to refuse or discontinue service without incurring any liability for any of the following reasons, provided that, unless otherwise stated, the Subscriber shall be given 7 days written notice to comply with any rule or to remedy any deficiency:

- (A) For the nonpayment of any amounts owing to the Company, the Company may, by giving 7 days prior written notice to the Subscriber, discontinue or suspend service without incurring any liability.
- (B) For the violation and/or noncompliance of any of the other material terms or conditions for furnishing service as established by the applicable tariff rules or Commission's administrative regulations pertaining to said service, the Company, after having first made a reasonable effort to obtain the Subscriber's compliance, may, after giving notice to the Subscriber, discontinue or suspend service without incurring any liability if such violation continues during that period.
- (C) Upon any federal, state, or local governmental prohibition or required alteration of the services to be provided or any violation of an applicable law or regulation, the Company may, by giving notice, discontinue service without incurring any liability. The Company may immediately discontinue service if said governmental entity orders for the immediate termination thereof.
- (F) In the event of fraudulent use of the Company's network as set forth and defined in the Company's tariff, the Company will attempt to notify the Customer prior to disconnecting service.
- (G) Without notice, in the event anyone tampers with any of the Company's equipment or services installed at or provided to Subscriber's premises.
- (H) For the use of telephone service for any property or purpose other than that described in the application.

2.43 Discontinuance of Service (Cont.)

Upon the Company's discontinuance of service to the Subscriber under Section 2.43 (A) or 2.43 (B), the Company, in addition to all other remedies that may be available to the Company at law or in equity or under any other provision of this tariff, may declare all future monthly and other charges that would have been payable by the Subscriber during the remainder of the term for which such services would have otherwise been provided to the Subscriber to be immediately due and payable (discounted to present value at six percent).

Disconnection notices shall clearly state the following:

- (A) A statement that failure to pay the amount required at the Company's office or to one of its authorized agents by the date specified on the notice may result in the disconnection of local or toll or optional services.
- (B) The earliest date when disconnection will occur.
- (C) The reason(s) for disconnection and any actions which the subscriber must take in order to avoid the disconnection, including the total amount required to be paid (which shall not be greater than the past due balance).
- (D) The total amount due to avoid disconnection of local exchange service as defined in paragraph (A) above.
- (E) The total amount due for toll charges and a statement that nonpayment of toll charges may result in the disconnection of toll service.
- (F) The total amount due for nonregulated charges and a statement that nonpayment of such charges cannot result in the disconnection of basic local service or regulated toll service.
- (G) The address and telephone number of the office of the Company that the Subscriber may contact in reference to his/her account.
- (H) A statement that the Commission Staff is available to render assistance with unresolved complaints, and the then-current address and local/toll-free telephone numbers and TDD/TTY number of the Commissions public interest center.
- (I) A statement that an additional charge for reconnection may apply if service is disconnected. The statement shall also include a notice that payments to an unauthorized payment agent may result in the untimely or improper crediting of the Subscriber's account.

APPLICATION OF RATES

3.1 Introduction

The regulations set forth in this section govern the application of rates for services contained in other sections of this tariff.

3.2 Charges Based on Duration of Use

Where charges for a service are specified based on the duration of use, such as the duration of a telephone call, the following rules apply:

- (A) Calls are measured in durational increments identified for each service. All calls that are fractions of a measurement increment are rounded-up to the next whole unit.
- (B) Timing on completed calls begins when the call is answered by the called party. Answering is determined by hardware answer supervision in all cases where this signaling is provided by the terminating local carrier and any intermediate carrier(s). Timing for operator service person-to-person calls start with completion of the connection to the person called or an acceptable substitute, or to the PBX station called.
- (C) Timing terminates on all calls when the calling party hangs up or the Company's network receives an off-hook signal from the terminating carrier.
- (D) Calls originating in one time period and terminating in another will be billed in their entirety based upon the rates of the originating time period.
- (E) All times refer to local time.

APPLICATION OF RATES**3.3 Rates Based Upon Distance**

Where charges for a service are specified based upon distance, the following rules:

(A) Distance between two points is measured as airline distance between the rate centers of the originating and terminating telephone lines. The rate center is a set of geographic coordinates, as referenced in the Local Exchange Routing Guide issued by Bellcore, associated with each NPA-NXX combination (where NPA is the area code and NXX is the first three digits of a seven-digit telephone number). Where there is no telephone number associated with an access line on the Company's network (such as a dedicated 800 or WATS access line), the Company will apply the rate center of the Subscriber's main billing telephone number.

(B) The airline distance between any two rate centers is determined as follows:

- (1) Obtain the "V" (vertical) and "H" (horizontal) coordinates for each rate center from the Bellcore Local Exchange Routing guide referenced in Section 3.3(A).
- (2) Compute the difference between the "V" coordinates of the two rate centers; and the difference between the two "H" coordinates.
- (3) Square each difference obtained in step (2) above.
- (4) Add the square of the "V" difference and the square of the "H" difference obtained in step (3) above.
- (5) Divide the sum of the squares by 10. Round to the next higher whole number if any fraction is obtained.
- (6) Obtain the square root of the whole number result obtained above. Round to the next higher whole number if any fraction is obtained. This is the airline mileage.

(7) FORMULA =
$$\sqrt{\frac{(V1 - V2)^2 + (H1 - H2)^2}{10}}$$
