PUCO

To whom it may concern:

This correspondence is to formally request that the Public Utilities Commission of Ohio grant an extension of the completion date for Case No. 10-618-RR-FED to September 19, 2011. The IORY has successfully met all dates with regard to the Railroad portion of this project; warning device installation has been completed and this crossing was placed in service on June 09, 2011. It is currently operating simultaneously with the adjacent traffic signal system per instruction received from the ORDC on June 07, 2011, and therefore does not yet fulfill the operational requirement of advanced pre-emption as set forth by PUCO Case No. 10-618-RR-FED and associated documentation. The IORY has been notified by the ORDC of an availability lead time of up to 60 days for modules that will allow for advanced pre-emption operation of the interconnected traffic control system. The IORY therefore requests an extension of this project's completion date to accommodate future mobilization of personnel, configuration of equipment and testing required upon the installation of necessary traffic control system components by ODOT District 5.

If you have any questions, please feel free to contact me.

Thank you,

Larry Romaine
AVP - Engineering Services

cc: Joe Spirk - Regional Chief Engineer
Mr. Bill Kelly - General Manager (IORY)
Mr. Terry Frank - Project Manager (Xorail)
