**Re: PIR High Pressure 12-Inch Distribution Line Segment
Replacement, Cedar Lake Farm
Ohio Power Siting Board Case No. 11-4796-GA-BNR**

Dear Ms. Wissman and Ms. McCauly:

Dominion East Ohio Gas Company ("DEO") filed a Construction Notice for authority to remove from service less than one mile of a high pressure 12-inch segment, #1157 and reroute the pipeline segment consisting of approximately 2,200 feet of 12-inch high pressure line. This new pipeline segment will serve the same function as the existing, 12-inch distribution natural gas pipeline segment.

The current segment is located in Green Township on the Cedar Lake Farm and traverses the property diagonally. Currently the owner's greenhouses are located above a portion of the segment to be replaced. The new pipe segment will also be located solely on the same landowner's property but will be placed around the greenhouses.

Dominion East Ohio will be submitting payment of \$2,000 in accordance with Ohio Administrative Code Rule 4906-6-11(I) so that the Construction Notice would be considered on an expedited basis. If you have any questions please call at the number listed above.

Sincerely,

Sally W. Bloomfield
