Subject: Tell Duke: Clean & Green for New Richmond!

Aug 23, 2011

Public Utilities Commission

Duke ratepayers want clean energy!

As a leader in the field of energy, Duke Energy has important responsibilities to the citizens of this community -- both today's citizens and those future citizens.

Duke Energy should move forward with energy efficiency and renewables like wind and solar. Ohio ratepayers would like to see the economic development fund for New Richmond include clean energy to create jobs in the community. We would also like to see Duke replace the Beckjord coal plant with clean energy instead of natural gas.

Do the right thing, Duke: invest in energy that is renewable, good for environment, and will not deplete limited resources.

Thank you.

We have a responsibility to provide green jobs to workers in communities affected by coal plant retirement. Duke can make this transition easier for the New Richmond community by focusing their economic development fund on clean energy.

Sincerely

Mr. Denis Walsh
