To whom it may concern:

We are writing regarding the Black Fork Wind Project that is being considered for our community in Shelby, Ohio.

We are very much against this project for very good reasons.

The proposed wind turbines will be only 1850 feet from our home. Not only will they produce noise and "strobe like" vision, they will most definitely decrease our property value.

We are not against wind energy, but very strongly believe the turbines are not suited for such a highly populated residential area.

Please don't allow this company to come in and ruin our community!

Thank you.

Sincerely,

Mike Hart
