RE: Black Fork Wind Energy, LLC  
Case # 10-2865-EL-BGN

Dear Board Members,

I received a copy of Staff Report of Investigation, Black Fork Wind Project, and dated August 31, 2011. On August 30, 2011 an entry into the docketing record noted that I was granted intervention status. Listed below are the issues that I have regarding this project. This list is cursory. A more detailed presentation will be forwarded prior to the September 15, 2011 deadline.

1. Setback requirement as stated and impact on my property value. Item (5) page 18, page 27
2. Use of property in the project area that has economic uses other than agricultural. Item (6) page 18-19
3. Consideration for Environmental Justice in section "Nature of Probable Environmental Impact". Pages 18-26, 27-29.
4. Consideration of private residential potable water sources. Item (21) & (22) page 24, Page 31, 57
5. Consideration of TV, radio, digital and wireless. Items (31), (32) & (34) page 26, 36, 58
6. Aesthetics of my property and its value. Lack of interest by applicant in making commitment to residents to overcome. Page 29
7. Public interaction has been inclusive of government officials and participating landowners. There has been a lack of environmental justice. Pages 47-48
8. The economic consideration reports only include those who directly will gain from the project. The economic impact on those not participating is not included. Economic impact on my family business. Page 49
9. There are many references in the report to noise, flicker, and shadow. Effects on my life and mitigation responsibility.

Thank you for the opportunity to be a part of the process.

Respectfully,

Margaret D. Rietschlin
