RECEIVED-DOCKETING DIV

2011 SEP 16 AM 9:24

To Whom it concerns. I would like to state that I am ^{2011 SEP 16 AM 9:24} opposed to the proposed windmill project in Lawford & Rippland Counties of Ohio. At first I was for these. But after attending some of the meetings and doing research I feel there are to many known and unknown problems. Listed are just a few of my concerns.

The threat to the wildlife in this area including but not limited to bats, eagles, deer, turkey, I understand that not only does it take air from the lungs of the flying mammals but also the effect of the low pitch noises.

The strobe effect thrown off. I or my husband can function with strobes, even from a simple flashlight. I for one pass out when exposed to the strobe effect. Even police lights.

The effect this will have on our health is just not worth the risk of providing electric especially to the East Coast. And when this energy must be used because of no way to store it. And still needing electric to run them when there isn't enough wind. Seems like a lot of bugs to work out yet.

The effect these will have on our water in the area. There are several areas here, incl., Swisher & Ross Creek area, that either have no wells or bad wells. So this creates another real problem.

Of course I can cont. to list my concerns but I think you get the idea. I feel there needs to be alternative energy sources but to what damage to those of us living within the proposed area.

This is to certify that the images appearing are an accurate and complete reproduction of a case file document delivered in the regular course of business.
Technician MA Date Processed SEP 16 2011

So for the record I am against the proposed
Windmill Farm, at this time.

Respectfully submitted
