I am against the distribution rate increase. My elec. budget is \$ 91.00 monthly. My furnace, water heater, clothes dryer are all gas. Why is my electric bill so high when the items that use the most power are gas? I do not understand why my electric is higher than the gas but I do know that I cannot afford an increase. I am employed and feel the pinch of high utilities -- what about people who are low income or no income? How will they ever afford the increase. Please be reasonable. Ever since deregulation of all of these utilities the costs have only gotten higher and most people's incomes have not risen at a comparable rate.
