Important Information About the Coverage Map

Map may include areas served by unaffiliated carriers, and may depict their licensed area rather than an approximation of the coverage there. Actual coverage area may differ substantially from map graphics, and coverage may be affected by such things as terrain, weather, foliage, buildings and other construction, signal strength, customer equipment and other factors. AT&T does not guarantee coverage. Charges will be based on the location of the site receiving and transmitting the call, not the location of the subscriber.

Why Switch to AT&T Wireless?

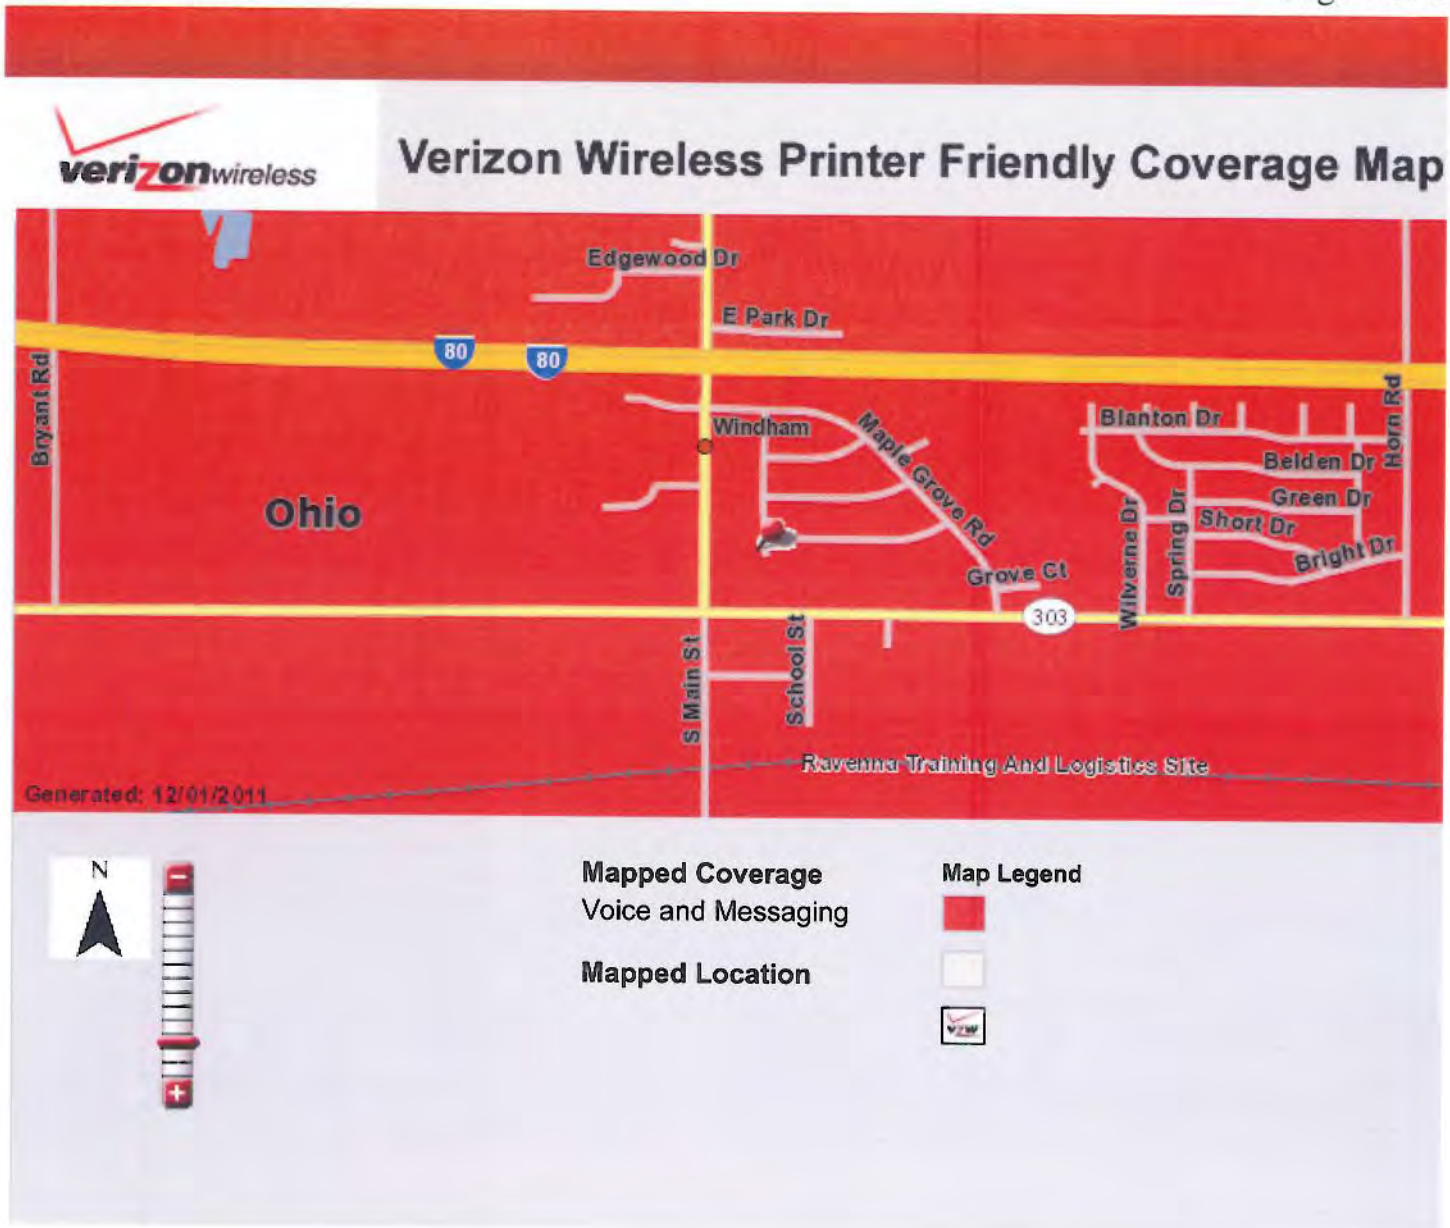

Our Service

Phones are just the beginning. It's our cell phone service and popular features like wireless Rollover® Minutes that keep our more than 92 million customers connected.

Our Technology

With the introduction of 4G LTE*, AT&T is also the only carrier that offers two layers of network technology delivering 4G speeds: HSPA+ and LTE. This means you'll enjoy fast 4G speeds on both the HSPA+ network and on the LTE network where available. This combination adds up to a smoother, more consistent 4G experience overall.

These Coverage Locator depictions apply to the following calling plans:

These Coverage Locator maps depict predicted and approximate wireless coverage. The coverage areas shown do not guarantee service availability, and may include locations with limited or no coverage. Even within a coverage area, there are many factors, including customer's equipment, terrain, proximity to buildings, foliage, and weather that may impact service. Some of the
